TED(10)-4075

SIXTH SEMESTER DIPLOMA EXAMINATION

MODEL QUESTION

COMPUTER NETWORKS

[Time :3 hrs]

(Maximum marks : 100)

PART-A

(Maximum marks : 10)

Marks

1 Answer *all* the questions in one or two sentences.Each question carries 2 marks.

1. what is flow control?
2. State the need of gigabit ethernet.
3. Differentiate between adaptive and non-adaptive routing algorithm.
4. Differentiate between user agent and message transfer agent.
5. what is hub? (5X2=10)

PART-B

(Maximum marks : 30)

II Answer *any five* questions.Each question carries 6 marks.

1. Explain bitmap protocol.
2. Differentiate between persistent and non-persistent CSMA.
3. Explain multicast routing.
4. Describe the general principles of congestion control.
5. Explain Domain Name Server.
6. Describe local internetworking.
7. Explain bluetooth architecture. (5X6=30)

PART-C

(Maximum marks : 60)

(Answer *one* full question from each unit. Each question carries 15 marks.)

UNIT-I

III Describe ISO-OSI reference model with neat diagram. 15

Or

Iv Describe ATM reference model with neat diagram. 15

UNIT-II

V (a) Explain the implimentation of connectionless service. 8

(b) Explain traffic shaping . 7

Or

VI (a) Describe distance vector routing. 8

(b) Explain subnet. 7

UNIT-III

VII (a) Explain upward multiplexing and downward multiplexing. 8

(b) Describe buffering . 7

Or

VIII (a) Explain with figures the three way handshake method to establish a connection. 8

(b) Illustrate the process of reading e-mail. 7

UNIT-IV

IX (a) Explain spanning tree bridges. 8

(b) Differentiate between MACA and MACAW. 7

Or

X (a) Explain bluetooth protocol stack. 8

(b) Explain wireless LAN. 7
