REVISION 2021 • SEMESTER 6 • FIRST YEAR / COMMON

Internship

A full-screen, syllabus-style digital handbook for Course Code 6007. It is written as a practical textbook with module explanations, Malayalam support notes, formulas, checklists, worked cases, lab/report guidance, revision questions, model question paper and full answer key.

COURSE CODE
6007

COURSE TITLE
Internship

DEPARTMENT
First Year / Common

TYPE
Internship

SEMESTER
6

CATEGORY
Field Training

USE
Study + notes PDF

FORMAT
Big handbook

6007

Screen-filling handbook

Designed for desktop, mobile, classroom display and automatic PDF notes generation.

How to use this handbook

Read the overview first, then study each module with the diagram, formulas, practical tasks and model answers. For exam preparation, revise the question bank and answer key.

Course map	**objectives + outcomes**
Module lessons	**4 detailed units**
Formula bank	**calculations**
Practice bank	**questions + tasks**
Model paper	**official style**
Answer key	**full points**

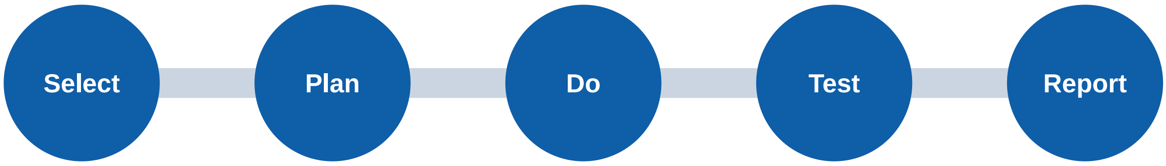
Course objectives and syllabus map

Objectives

- ✓ Connect classroom learning with actual workplace practice
- ✓ Develop discipline, reporting, safety awareness and professional behaviour
- ✓ Prepare internship diary, report and viva evidence

□□□□□□□: □ □□□□ □□□□□□□□□□□□□ □□□□□□□ □□□□. Textile industry-□ real work □□□□□□□□□□□□ □□□□□□□□□□□□□□ calculation, quality check, documentation, reporting □□□□□□□□□□ □□□□□□□□□□□□□□ □□□.

Visual process map



Module	Main outcome	Industrial focus	Expected evidence
M1	Before internship	Understand company profile, department, safety rules and reporting officer; Prepare learning objectives and daily observation format	Short notes, calculations, diagram, checklist, viva answers
M2	Workplace learning	Observe workflow, machines, quality checks and documentation; Record tools, materials, process parameters and safety precautions	Short notes, calculations, diagram, checklist, viva answers
M3	Documentation	Maintain daily diary with date, activity, learning and supervisor signature; Collect non-confidential photos/sketches when permitted	Short notes, calculations, diagram, checklist, viva answers
M4	Report and viva	Structure: introduction, company profile, department details, work learned, case study and conclusion; Use tables, flow charts and labelled sketches	Short notes, calculations, diagram, checklist, viva answers

Module-wise textbook

Each module is written in clear engineering language. Do not mug up headings only; understand the process flow, defects, records and decision points.

Module 1

Before internship

Core explanation

- ✓ Understand company profile, department, safety rules and reporting officer
- ✓ Prepare learning objectives and daily observation format
- ✓ Revise basic tools, measuring instruments and workplace terminology
- ✓ Understand attendance, punctuality and professional conduct

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

□□□□□□□: Practical answer □□□□□□□□□□□ definition □□□□□□□ □□□□. Process → parameter → defect → correction → record □□□□ flow □□□□□□□□□□.

Exam writing method

1. Start with definition or purpose.
2. Draw block diagram/process flow wherever possible.
3. List parameters, machines/tools, defects and precautions.
4. End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Module 2

Workplace learning

Core explanation

- ✓ Observe workflow, machines, quality checks and documentation
- ✓ Record tools, materials, process parameters and safety precautions
- ✓ Ask relevant technical questions without disturbing production
- ✓ Identify one small improvement idea from the workplace

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

□□□□□□□: Practical answer □□□□□□□□□□□ definition □□□□□□□ □□□□. Process → parameter → defect → correction → record □□□□ flow □□□□□□□□□□.

Exam writing method

1. Start with definition or purpose.
2. Draw block diagram/process flow wherever possible.
3. List parameters, machines/tools, defects and precautions.
4. End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Module 3

Documentation

Core explanation

- ✓ Maintain daily diary with date, activity, learning and supervisor signature
- ✓ Collect non-confidential photos/sketches when permitted
- ✓ Write process flow, machine list, quality points and safety points
- ✓ Prepare weekly summary and skill mapping

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

□□□□□□□: Practical answer □□□□□□□□□□□ definition □□□□□□ □□□□. Process → parameter → defect → correction → record □□□□ flow □□□□□□□□□□.

Exam writing method

1. Start with definition or purpose.
2. Draw block diagram/process flow wherever possible.
3. List parameters, machines/tools, defects and precautions.
4. End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Report and viva

Core explanation

- ✓ Structure: introduction, company profile, department details, work learned, case study and conclusion
- ✓ Use tables, flow charts and labelled sketches
- ✓ Prepare viva answers based on actual work observed
- ✓ Avoid fake claims, copied content and confidential data

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

□□□□□□: Practical answer □□□□□□□□□□ definition □□□□□□ □□□□. Process → parameter → defect → correction → record □□□□ flow □□□□□□□□□.

Exam writing method

1. Start with definition or purpose.
2. Draw block diagram/process flow wherever possible.
3. List parameters, machines/tools, defects and precautions.
4. End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Formula bank and quick calculations

Formula 1

Skill Score = Tasks Observed + Tasks Practised + Documentation Quality

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Formula 2

Report Quality = Clarity + Evidence + Reflection + Correct Technical Terms

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Practice tasks, viva and revision

Practical / assignment tasks

- ✓ Maintain a daily logbook for minimum one week
- ✓ Draw one process flow from workplace observation
- ✓ Prepare one improvement suggestion with expected benefit
- ✓ Give a 5-minute viva presentation

Important keywords

Diary **Supervisor** **Safety** **Workflow** **Process flow** **Evidence** **Viva** **Reflection**

Short questions

Q1.1	Explain: Understand company profile, department, safety rules and reporting officer	Answer with definition, process, application and one example.
Q1.2	Explain: Prepare learning objectives and daily observation format	Answer with definition, process, application and one example.
Q1.3	Explain: Revise basic tools, measuring instruments and workplace terminology	Answer with definition, process, application and one example.
Q2.1	Explain: Observe workflow, machines, quality checks and documentation	Answer with definition, process, application and one example.
Q2.2	Explain: Record tools, materials, process parameters and safety precautions	Answer with definition, process, application and one example.
Q2.3	Explain: Ask relevant technical questions without disturbing production	Answer with definition, process, application and one example.
Q3.1	Explain: Maintain daily diary with date, activity, learning and supervisor signature	Answer with definition, process, application and one example.
Q3.2	Explain: Collect non-confidential photos/sketches when permitted	Answer with definition, process, application and one example.
Q3.3	Explain: Write process flow, machine list, quality points and safety points	Answer with definition, process, application and one example.
Q4.1	Explain: Structure: introduction, company profile, department details, work learned, case study and conclusion	Answer with definition, process, application and one example.
Q4.2	Explain: Use tables, flow charts and labelled sketches	Answer with definition, process, application and one example.
Q4.3	Explain: Prepare viva answers based on actual work observed	Answer with definition, process, application and one example.

Case study

A textile unit receives customer complaint related to Diary. Prepare a corrective action report using observation, data collection, root cause, corrective action, preventive action and verification.

Expected answer structure: Problem statement → data/table → cause analysis → action plan → responsible person → completion date → verification evidence.

Model question paper

Use this as a sample paper. Questions are original and arranged in diploma-style sections.

PART A - Short Answer Questions (answer all)
1. Define Internship.
2. List four important keywords: Diary, Supervisor, Safety, Workflow.
3. State two industrial applications of this subject.
4. Mention two common defects/problems and one preventive action.
5. Write any one important formula or calculation used in this subject.

PART B - Paragraph Questions
6. Explain the workflow of Before internship.
7. Compare two important concepts from Workplace learning.
8. Explain the practical importance of Documentation in a textile unit.
9. Write the steps for documentation/reporting in this subject.

PART C - Essay / Application Questions
10. Prepare a complete process plan for Internship in a textile industry situation.
11. Explain how quality, cost, safety and customer requirement are controlled in this subject.
12. Solve/interpret a simple industrial case using the formulas and checks given in this handbook.

Answer key and scoring points

Part A answer points

1. Give accurate definition and scope of Internship.
2. Use keywords: Diary, Supervisor, Safety, Workflow, Process flow, Evidence, Viva, Reflection.
3. Applications must be linked to textile industry, customer requirement and quality.
4. Defects/problems should include cause and prevention.
5. Formula answers must show unit and interpretation.

Part B/C - Module 1

Before internship

- Understand company profile, department, safety rules and reporting officer

- Prepare learning objectives and daily observation format
- Revise basic tools, measuring instruments and workplace terminology
- Understand attendance, punctuality and professional conduct

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 2

Workplace learning

- Observe workflow, machines, quality checks and documentation
- Record tools, materials, process parameters and safety precautions
- Ask relevant technical questions without disturbing production
- Identify one small improvement idea from the workplace

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 3

Documentation

- Maintain daily diary with date, activity, learning and supervisor signature
- Collect non-confidential photos/sketches when permitted
- Write process flow, machine list, quality points and safety points
- Prepare weekly summary and skill mapping

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 4

Report and viva

- Structure: introduction, company profile, department details, work learned, case study and conclusion
- Use tables, flow charts and labelled sketches
- Prepare viva answers based on actual work observed
- Avoid fake claims, copied content and confidential data

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Final quick revision

Before exam

- Revise all formulas and keywords.
- Practise one diagram/process flow from every module.
- Prepare two industrial examples for every long answer.

Before lab/viva

- Know instrument/machine purpose.
- Know safety precautions and standard record format.
- Explain result, defect and correction logically.
