REVISION 2021 • SEMESTER 6 • TEXTILE TECHNOLOGY

Textile Marketing & Merchandising

A full-screen, syllabus-style digital handbook for Course Code 6061A. It is written as a practical textbook with module explanations, Malayalam support notes, formulas, checklists, worked cases, lab/report guidance, revision questions, model question paper and full answer key.

COURSE CODE
6061A

COURSE TITLE
Textile Marketing & Merchandising

DEPARTMENT
Textile Technology

TYPE
Theory

SEMESTER
6

CATEGORY
Program Elective

USE
Study + notes PDF

FORMAT
Big handbook

6061A

Screen-filling handbook

Designed for desktop, mobile, classroom display and automatic PDF notes generation.

How to use this handbook

Read the overview first, then study each module with the diagram, formulas, practical tasks and model answers. For exam preparation, revise the question bank and answer key.

Course map	**objectives + outcomes**	**Module lessons**	**4 detailed units**
Formula bank	**calculations**	**Practice bank**	**questions + tasks**
Model paper	**official style**	**Answer key**	**full points**

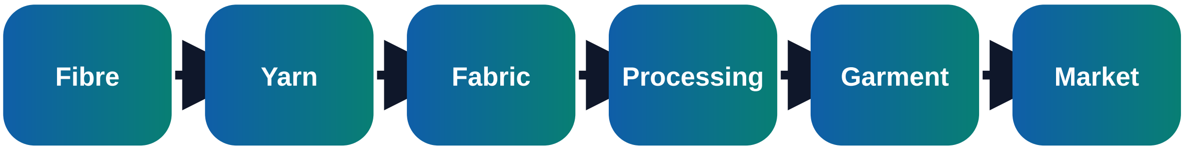
Course objectives and syllabus map

Objectives

- ✓ Explain textile market, product mix and customer behaviour
- ✓ Understand merchandising workflow from enquiry to shipment
- ✓ Prepare costing, order follow-up and buyer communication documents

□□□□□□: □ □□□□ □□□□□□□□□□□□□ □□□□□□ □□□□. Textile industry-□ real work □□□□□□□□□□□□ □□□□□□□□□□□□□□ calculation, quality check, documentation, reporting □□□□□□□□□ □□□□□□□□□□□□□□ □□□.

Visual process map



Module	Main outcome	Industrial focus	Expected evidence
M1	Textile market fundamentals	Textile market segments: fibre, yarn, fabric, garment, home textile and technical textile; Domestic and export markets, buyer types and retail channels	Short notes, calculations, diagram, checklist, viva answers
M2	Merchandising process	Role of merchandiser as link between buyer, sampling, production, quality and shipment; Enquiry, tech pack, sample development, approval, order confirmation and TNA	Short notes, calculations, diagram, checklist, viva answers
M3	Costing and pricing	Fabric consumption, yarn cost, processing cost, accessory cost and wastage; CM, overhead, margin, freight, insurance and currency effects	Short notes, calculations, diagram, checklist, viva answers
M4	Export documentation and quality	Purchase order, proforma invoice, packing list, invoice, bill of lading and certificate of origin; Inspection stages: fabric inspection, inline, midline and final inspection	Short notes, calculations, diagram, checklist, viva answers

Module-wise textbook

Each module is written in clear engineering language. Do not mug up headings only; understand the process flow, defects, records and decision points.

Module 1

Textile market fundamentals

Core explanation

- ✓ Textile market segments: fibre, yarn, fabric, garment, home textile and technical textile
- ✓ Domestic and export markets, buyer types and retail channels
- ✓ Consumer behaviour, fashion cycle, season, trend and demand forecasting
- ✓ Branding, labelling, packaging and product positioning

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

□□□□□□□: Practical answer □□□□□□□□□□□ definition □□□□□□□ □□□□. Process → parameter → defect → correction → record □□□□ flow □□□□□□□□□□.

Exam writing method

1. Start with definition or purpose.
2. Draw block diagram/process flow wherever possible.
3. List parameters, machines/tools, defects and precautions.
4. End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Module 2

Merchandising process

Core explanation

- ✓ Role of merchandiser as link between buyer, sampling, production, quality and shipment
- ✓ Enquiry, tech pack, sample development, approval, order confirmation and TNA
- ✓ Bill of materials, trims, accessories, shade approval and lab dips
- ✓ Follow-up methods, communication discipline and escalation

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

> □□□□□□□: Practical answer □□□□□□□□□□□ definition □□□□□□□ □□□□. Process → parameter → defect → correction → record □□□□ flow □□□□□□□□□□.

Exam writing method

1. Start with definition or purpose.
2. Draw block diagram/process flow wherever possible.
3. List parameters, machines/tools, defects and precautions.
4. End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Module 3

Costing and pricing

Core explanation

- ✓ Fabric consumption, yarn cost, processing cost, accessory cost and wastage
- ✓ CM, overhead, margin, freight, insurance and currency effects
- ✓ Quotation preparation and price negotiation
- ✓ Cost control without compromising quality

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

□□□□□□□: Practical answer □□□□□□□□□□□ definition □□□□□□□ □□□□. Process → parameter → defect → correction → record □□□□ flow □□□□□□□□□□.

Exam writing method

1. Start with definition or purpose.
2. Draw block diagram/process flow wherever possible.
3. List parameters, machines/tools, defects and precautions.
4. End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Module 4

Export documentation and quality

Core explanation

- ✓ Purchase order, proforma invoice, packing list, invoice, bill of lading and certificate of origin
- ✓ Inspection stages: fabric inspection, inline, midline and final inspection
- ✓ AQL concept, defect classification and buyer compliance
- ✓ Ethical sourcing, sustainability and social compliance

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

□□□□□□□: Practical answer □□□□□□□□□□□ definition □□□□□□□ □□□□. Process → parameter → defect → correction → record □□□□ flow □□□□□□□□□□.

Exam writing method

1. Start with definition or purpose.
2. Draw block diagram/process flow wherever possible.
3. List parameters, machines/tools, defects and precautions.
4. End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Formula bank and quick calculations

Formula 1

Fabric Cost = Consumption x Fabric Rate

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Formula 2

Export Price = Total Cost + Overhead + Profit + Freight

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Formula 3

Consumption = Pattern Area + Allowance + Wastage

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Formula 4

Order Lead Time = Sampling Time + Production Time + Inspection + Shipment

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Practice tasks, viva and revision

Practical / assignment tasks

- ✓ Prepare a TNA chart for a shirt order
- ✓ Calculate fabric cost for 500 garments
- ✓ Create buyer communication mail for sample approval
- ✓ Prepare a simple packing list

Important keywords

Merchandising | TNA | Tech pack | BOM | Lab dip | AQL | FOB | Shipment

Short questions

Q1.1	Explain: Textile market segments: fibre, yarn, fabric, garment, home textile and technical textile	Answer with definition, process, application and one example.
Q1.2	Explain: Domestic and export markets, buyer types and retail channels	Answer with definition, process, application and one example.
Q1.3	Explain: Consumer behaviour, fashion cycle, season, trend and demand forecasting	Answer with definition, process, application and one example.
Q2.1	Explain: Role of merchandiser as link between buyer, sampling, production, quality and shipment	Answer with definition, process, application and one example.
Q2.2	Explain: Enquiry, tech pack, sample development, approval, order confirmation and TNA	Answer with definition, process, application and one example.
Q2.3	Explain: Bill of materials, trims, accessories, shade approval and lab dips	Answer with definition, process, application and one example.
Q3.1	Explain: Fabric consumption, yarn cost, processing cost, accessory cost and wastage	Answer with definition, process, application and one example.
Q3.2	Explain: CM, overhead, margin, freight, insurance and currency effects	Answer with definition, process, application and one example.

Q3.3	Explain: Quotation preparation and price negotiation	Answer with definition, process, application and one example.
Q4.1	Explain: Purchase order, proforma invoice, packing list, invoice, bill of lading and certificate of origin	Answer with definition, process, application and one example.
Q4.2	Explain: Inspection stages: fabric inspection, inline, midline and final inspection	Answer with definition, process, application and one example.
Q4.3	Explain: AQL concept, defect classification and buyer compliance	Answer with definition, process, application and one example.

Case study

A textile unit receives customer complaint related to Merchandising. Prepare a corrective action report using observation, data collection, root cause, corrective action, preventive action and verification.

Expected answer structure: Problem statement → data/table → cause analysis → action plan → responsible person → completion date → verification evidence.

Model question paper

Use this as a sample paper. Questions are original and arranged in diploma-style sections.

PART A - Short Answer Questions (answer all)
1. Define Textile Marketing & Merchandising.
2. List four important keywords: Merchandising, TNA, Tech pack, BOM.
3. State two industrial applications of this subject.
4. Mention two common defects/problems and one preventive action.
5. Write any one important formula or calculation used in this subject.

PART B - Paragraph Questions
6. Explain the workflow of Textile market fundamentals.
7. Compare two important concepts from Merchandising process.
8. Explain the practical importance of Costing and pricing in a textile unit.
9. Write the steps for documentation/reporting in this subject.

PART C - Essay / Application Questions
10. Prepare a complete process plan for Textile Marketing & Merchandising in a textile industry situation.
11. Explain how quality, cost, safety and customer requirement are controlled in this subject.
12. Solve/interpret a simple industrial case using the formulas and checks given in this handbook.

Answer key and scoring points

Part A answer points

1. Give accurate definition and scope of Textile Marketing & Merchandising.
2. Use keywords: Merchandising, TNA, Tech pack, BOM, Lab dip, AQL, FOB, Shipment.
3. Applications must be linked to textile industry, customer requirement and quality.
4. Defects/problems should include cause and prevention.
5. Formula answers must show unit and interpretation.

Part B/C - Module 1

Textile market fundamentals

- Textile market segments: fibre, yarn, fabric, garment, home textile and technical textile
- Domestic and export markets, buyer types and retail channels
- Consumer behaviour, fashion cycle, season, trend and demand forecasting
- Branding, labelling, packaging and product positioning

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 2

Merchandising process

- Role of merchandiser as link between buyer, sampling, production, quality and shipment
- Enquiry, tech pack, sample development, approval, order confirmation and TNA
- Bill of materials, trims, accessories, shade approval and lab dips
- Follow-up methods, communication discipline and escalation

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 3

Costing and pricing

- Fabric consumption, yarn cost, processing cost, accessory cost and wastage
- CM, overhead, margin, freight, insurance and currency effects
- Quotation preparation and price negotiation
- Cost control without compromising quality

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 4

Export documentation and quality

- Purchase order, proforma invoice, packing list, invoice, bill of lading and certificate of origin
- Inspection stages: fabric inspection, inline, midline and final inspection
- AQL concept, defect classification and buyer compliance
- Ethical sourcing, sustainability and social compliance

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Final quick revision

Before exam

- Revise all formulas and keywords.
- Practise one diagram/process flow from every module.
- Prepare two industrial examples for every long answer.

Before lab/viva

- Know instrument/machine purpose.
- Know safety precautions and standard record format.
- Explain result, defect and correction logically.
