## Official Source Declaration

This educational resource is architected based on the official **Revision 2021** syllabus provided by the **State Institute of Technical Teachers' Training and Research (SITTTR), Kalamassery**. All course outcomes, module structures, and assessment patterns strictly adhere to the official document for Course Code 2008.

## Course Overview

|              |                                                                        |
|--------------|------------------------------------------------------------------------|
| Program      | Diploma in Engineering & Technology / Commercial Practice / Management |
| Course Title | Communication Skills in English Lab                                    |
| Course Code  | 2008                                                                   |
| Semester     | 2                                                                      |

|                      |                                                        |
|----------------------|--------------------------------------------------------|
| <b>Credits</b>       | 1.5                                                    |
| <b>Total Periods</b> | 45 (Practical: 3 periods/week)                         |
| <b>Prerequisite</b>  | 1st Semester Course: "Communication Skills in English" |

## Course Objectives

- Apply elements of grammar and vocabulary in formal and informal situations.
- Listen, identify, and comprehend main ideas and supporting details.
- Use language functions for technical and casual discourses.
- Develop fluent oral communication with correct pronunciation using multimedia tools.

## Course Outcomes (COs)

| CO No. | Description                                                                                                                                                                            | Duration | Cognitive Level |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|-----------------|
| CO1    | Use words, phrases and sentences accurately and with correct pronunciation in real life situations                                                                                     | 5 Hrs    | Applying        |
| CO2    | Listens to and comprehends the substance and central idea of simple narratives and descriptions.                                                                                       | 10 Hrs   | Analysing       |
| CO3    | Use apt language functions while making statements, asking questions, giving instructions, and reporting events.                                                                       | 15 Hrs   | Creating        |
| CO4    | Narrate simple experiences and series of events to convey its essence and intention and present ideas coherently, confidently and with clarity in debates, discussions and interviews. | 15 Hrs   | Creating        |

## Module 1: Pronunciation and Accuracy (CO1)

**Focus:** I am all ears & Let me try

### M1.01: Phonetics, Stress, and Accent

Correct pronunciation is the foundation of effective communication. In this module, students focus on the International Phonetic Alphabet (IPA), word stress, and rhythm.

#### Key Concept: Word Stress

In English, one syllable in a word is pronounced more forcefully than others.

- Nouns (2 syllables):** Stress usually on 1st syllable (e.g., OBject, PREsent).
- Verbs (2 syllables):** Stress usually on 2nd syllable (e.g., obJECT, preSENT).

**Malayalam support:** മലയാളത്തിൽ വാക്കുകളുടെ പ്രസ്ഥാനം (syllables) വാക്കിന്റെ പ്രസ്ഥാനം. പ്രസ്ഥാനം 'Stress' വാക്കിന്റെ പ്രസ്ഥാനം. പ്രസ്ഥാനം വാക്കിന്റെ പ്രസ്ഥാനം വാക്കിന്റെ പ്രസ്ഥാനം.

### M1.02: Real-life Usage

Applying vocabulary and phrases in daily contexts. This includes greetings, introductions, and polite expressions.

- Greeting:** "Good morning, how can I help you today?"
- Apologizing:** "I sincerely apologize for the delay in the report."

- **Requesting:** "Could you please clarify the technical specifications?"

## Module 2: Listening Comprehension (CO2)

**Focus:** Listening to Narratives and Descriptions

### M2.01: Active Listening

Listening is not just hearing; it is understanding the speaker's intent. Students practice listening to:

- Technical descriptions of machinery.
- Narratives of industrial accidents or success stories.
- Casual conversations between colleagues.

### M2.02: Gist and Discourse Conversion

After listening, the student must be able to extract the "Gist" (the main point) and convert the information into other forms like a written summary or a flow chart.

**Listening Tip:** Look for "Signpost Words" like *Firstly, However, In conclusion, Therefore*. These words tell you where the speaker is going.

## Module 3: Language Functions & Role Play (CO3)

**Focus:** Workplace Situations and Functional English

### M3.01: Workplace Role-play

Students simulate real-world engineering scenarios. Examples include:

- Explaining a circuit diagram to a supervisor.
- Reporting a fault in the production line.
- Handling a customer complaint about a faulty device.

### M3.02: Essential Language Functions

| Function            | Example Phrase                                                  |
|---------------------|-----------------------------------------------------------------|
| Giving Instructions | "First, ensure the power is off. Then, connect the red wire..." |
| Asking Questions    | "Could you explain why the pressure is dropping?"               |
| Reporting Events    | "The incident occurred at 10 AM due to a short circuit."        |
| Making Statements   | "The new design increases efficiency by 15%."                   |

## Module 4: Professional Speaking (CO4)

**Focus:** Debates, Discussions, and Interviews

### M4.01: Narrating Experiences

Sharing personal or professional experiences using correct tense and grammar.

*Example:* "During my internship, I encountered a major software bug..."

### M4.02: Debates and Interviews

This is the peak of the course, focusing on confidence and clarity.

- **Group Discussion (GD):** Practicing turn-taking, agreeing/disagreeing politely, and summarizing.

Total Words Spoken:

e.g. 300

Time Taken (Seconds):

e.g. 120

Calculate WPM

## Visual Library

The Communication Cycle: Sender, Message, Receiver, and Feedback.

## Module-wise Practice Questions

**CO1: Pronounce the following words with correct stress: 'Conduct' (Noun) vs 'Conduct' (Verb).**

**Noun:** CON-duct (Stress on first syllable).

**Verb:** con-DUCT (Stress on second syllable).

**CO2: While listening to a technical lecture, what are three things you should note down?**

1. The main topic or definition.
2. Key technical specifications or numerical data.
3. Steps in a process or sequence of operation.

**CO3: Role Play - You are an engineer reporting a machine failure to your manager. What language functions will you use?**

**Reporting:** "I am reporting that Lathe Machine #4 stopped working at 9 AM."

**Stating Cause:** "The cause appears to be a motor burnout."

**Suggesting:** "I suggest we call the maintenance team immediately."

**CO4: What is the purpose of a Group Discussion in a professional setting?**

The purpose is to exchange ideas, solve a problem, or reach a consensus while demonstrating teamwork, leadership, and communication skills.

---

## Practice Model Paper

### Lab Exam Structure (1.5 Hours)

#### Part A: Listening (20 Marks)

Listen to an audio clip and answer 10 MCQ/Short answer questions.

#### Part B: Speaking (20 Marks)

Role play or individual presentation on a given technical topic.

Part C: Group Activity (10 Marks)

Participate in a 5-minute group discussion on a current technical trend.

Quick Revision

- **IPA:** International Phonetic Alphabet helps in standardizing pronunciation.
- **Intonation:** The rise and fall of voice in speaking (Falling for statements, Rising for Yes/No questions).
- **Active Listening:** Involves paying attention, showing that you are listening, and providing feedback.
- **Soft Skills:** Eye contact, body language, and tone are as important as words.

Glossary

|             |                                                                                                                   |
|-------------|-------------------------------------------------------------------------------------------------------------------|
| Accent      | A distinctive way of pronouncing a language, especially one associated with a particular country or social class. |
| Gist        | The substance or general meaning of a speech or text.                                                             |
| Discourse   | Written or spoken communication or debate.                                                                        |
| Phonetics   | The study and classification of speech sounds.                                                                    |
| STAR Method | A structured manner of responding to a behavioral-based interview question.                                       |

□□□□□□ □□□□□□□□

□ □□□□ □□□□□□ □□□□□□□□□□ □□□□ □□□□□□□□□□□□□□□□:

1. **Phonetics (Pronunciation):** Students will learn the correct pronunciation of the words and phrases.
2. **Listening Comprehension (Listening):** Students will listen to the audio and understand the main idea and details.
3. **Language Functions (Language Functions):** Students will learn how to use the language in different contexts, such as making requests, giving information, and expressing opinions.
4. **Presentation (Presentation):** Students will present their work to the class and receive feedback.
