

Manufacturing Technology for

□ To provide a basic knowledge on metal casting and fabrication processes.

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTR syllabus PDF for Course 3052 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 3052.pdf from the uploaded official SITTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Automobile Engineering
Course code	3052
Course title	Manufacturing Technology for
Semester	3 Credits: 3
Course category	Program Core
Periods per week	3 (L:2, T:1, P:0) Periods per semester: 45
Periods per semester	45

Item	Official information
Credits	3
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

40 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD

How to use this lesson

First pass

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- To provide a basic knowledge on metal casting and fabrication processes.
- To acquire knowledge of machine tools for specific applications, metal forming, additive manufacturing and their applications.

Course outcomes

CO	Official outcome	Study level
CO1	Choose metal casting and powder metallurgy. 12 Applying Classify sheet metal works used in automobile	See official syllabus
CO2	manufacturing and relate a fabrication process for 11 Understanding specific automobile application. Demonstrate the working of standard machine tools such as lathe, shaping, milling, drilling	See official syllabus
CO3	11 Understanding machines and the basics of flexible manufacturing system. Outline the application of forging, rolling and	See official syllabus
CO4	additive manufacturing techniques in automobile 9 Understanding industry.	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 2
CO2	CO2 3
CO3	CO3 2
CO4	CO4 2

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Choose metal casting and powder metallurgy.	12	As specified
Module 2	particular fabrication process for specific automobile application.	11	As specified
Module 3	milling, drilling machine and the basics of flexible manufacturing system.	8	As specified
Module 4	:	9	As specified

MODULE 1

Choose metal casting and powder metallurgy.

This module is presented from the official syllabus scope for Manufacturing Technology for. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Choose metal casting and powder metallurgy.
- Official duration: As specified

- Official topic entries captured: 12
- The full source excerpt is preserved below for coverage checking.

Recall casting and pattern. 1 Remembering Outline the requirements of a pattern material

Recall casting and pattern. 1 Remembering Outline the requirements of a pattern material is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Recall casting and pattern. 1 Remembering Outline the requirements of a pattern material using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, recall casting and pattern. 1 remembering outline the requirements of a pattern material should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Recall casting and pattern. 1 Remembering Outline the requirements of a pattern material means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-പ്രതികരണ പ്രതികരണ പ്രതികരണ. 1 Remembering Outline the requirements of a pattern material പ്രതികരണ പ്രതികരണ definition/meaning പ്രതികരണ പ്രതികരണ. പ്രതികരണ പ്രതികരണ പ്രതികരണ, steps, application പ്രതികരണ പ്രതികരണ പ്രതികരണ. Technical terms English-പ്രതികരണ പ്രതികരണ.

1 Understanding and list different types of pattern materials. Classify patterns like single, split, loose piece

1 Understanding and list different types of pattern materials. Classify patterns like single, split, loose piece is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 1 Understanding and list different types of pattern materials. Classify patterns like single, split, loose piece using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 1 understanding and list different types of pattern materials. classify patterns like single, split, loose piece should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 1 Understanding and list different types of pattern materials. Classify patterns like single, split, loose piece means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-പാഠ്യ 1 Understanding and list different types of pattern materials. Classify patterns like single, split, loose piece പാറ്റേണുകൾ. പാറ്റേണിന്റെ definition/meaning പാറ്റേണിന്റെ അർത്ഥം. പാറ്റേണിന്റെ ഉപയോഗം, steps, application പാറ്റേണിന്റെ പ്രയോഗം പാറ്റേണിന്റെ ഉപയോഗം. Technical terms English-ൽ പാറ്റേണിന്റെ പാറ്റേണിന്റെ പാറ്റേണിന്റെ.

1 Understanding and sweep pattern. Define pattern allowance and define pattern

1 Understanding and sweep pattern. Define pattern allowance and define pattern is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 1 Understanding and sweep pattern. Define pattern allowance and define pattern using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 1 understanding and sweep pattern. define pattern allowance and define pattern should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 1 Understanding and sweep pattern. Define pattern allowance and define pattern means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-പാഠ്യ 1 Understanding and sweep pattern. Define pattern allowance and define pattern പാറ്റേൺ definition/meaning പാറ്റേൺ അനുമതി. പാറ്റേൺ അനുമതി പാറ്റേൺ, steps, application പാറ്റേൺ പാറ്റേൺ അനുമതി. Technical terms English-പാറ്റേൺ അനുമതി പാറ്റേൺ അനുമതി.

allowances such as shrinkage, machining, 1 Understanding draft, distortion, shake allowances. Define mould, cope, drag, runner, riser, core

allowances such as shrinkage, machining, 1 Understanding draft, distortion, shake allowances. Define mould, cope, drag, runner, riser, core is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify allowances such as shrinkage, machining, 1 Understanding draft, distortion, shake allowances. Define mould, cope, drag, runner, riser, core using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, allowances such as shrinkage, machining, 1 understanding draft, distortion, shake allowances. define mould, cope, drag, runner, riser, core should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What allowances such as shrinkage, machining, 1 Understanding draft, distortion, shake allowances. Define mould, cope, drag, runner, riser, core means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a

diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-പ്രായസ്കരണങ്ങൾ such as shrinkage, machining, 1 Understanding draft, distortion, shake allowances. Define mould, cope, drag, runner, riser, core പ്രായസ്കരണങ്ങൾ പ്രായസ്കരണ definition/meaning പ്രായസ്കരണങ്ങൾ. പ്രായസ്കരണ പ്രായസ്കരണ, steps, application പ്രായസ്കരണ പ്രായസ്കരണ പ്രായസ്കരണ. Technical terms English-പ്രായസ്കരണ പ്രായസ്കരണ.

1 Understanding and chaplets. Distinguish green sand moulding and dry sand

1 Understanding and chaplets. Distinguish green sand moulding and dry sand is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 1 Understanding and chaplets. Distinguish green sand moulding and dry sand using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 1 understanding and chaplets. distinguish green sand moulding and dry sand should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 1 Understanding and chaplets. Distinguish green sand moulding and dry sand means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related

but different term.

Malayalam support: Module 1-Chapter 1 Understanding and chaplets. Distinguish green sand moulding and dry sand moulding. Define definition/meaning of green sand moulding. Explain the steps, application of green sand moulding. Technical terms English-Chapter 1 Understanding and chaplets.

moulding and identify automotive components 1 Applying made by these processes. Explain hot chamber die casting, cold chamber die casting, centrifugal casting and

moulding and identify automotive components 1 Applying made by these processes. Explain hot chamber die casting, cold chamber die casting, centrifugal casting and is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify moulding and identify automotive components 1 Applying made by these processes. Explain hot chamber die casting, cold chamber die casting, centrifugal casting and using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, moulding and identify automotive components 1 applying made by these processes. explain hot chamber die casting, cold chamber die casting, centrifugal casting and should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What moulding and identify automotive components 1 Applying made by these processes. Explain hot chamber die casting, cold chamber die casting, centrifugal casting and means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-പ്രതിരോധ മോഡലിംഗ് and identify automotive components 1 Applying made by these processes. Explain hot chamber die casting, cold chamber die casting, centrifugal casting and പ്രതിരോധ മോഡലിംഗ് definition/meaning പ്രതിരോധ മോഡലിംഗ്. പ്രതിരോധ മോഡലിംഗ് steps, application പ്രതിരോധ മോഡലിംഗ് പ്രതിരോധ. Technical terms English-പ്രതിരോധ മോഡലിംഗ്.

1 Applying identify automotive components made these processes.

1 Applying identify automotive components made these processes. is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 1 Applying identify automotive components made these processes. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 1 applying identify automotive components made these processes. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 1 Applying identify automotive components made these processes. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related

but different term.

Malayalam support: Module 1- 1 Applying identify automotive components made these processes. ഓട്ടോമോബൈൽ ഓട്ടോമോബൈൽ definition/meaning ഓട്ടോമോബൈൽ. ഓട്ടോമോബൈൽ ഓട്ടോമോബൈൽ, steps, application ഓട്ടോമോബൈൽ ഓട്ടോമോബൈൽ. Technical terms English- ഓട്ടോമോബൈൽ ഓട്ടോമോബൈൽ.

Define various casting defects. 1 Understanding Define powder metallurgy and classify its

Define various casting defects. 1 Understanding Define powder metallurgy and classify its is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Define various casting defects. 1 Understanding Define powder metallurgy and classify its using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, define various casting defects. 1 understanding define powder metallurgy and classify its should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Define various casting defects. 1 Understanding Define powder metallurgy and classify its means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- Define various casting defects. 1 Understanding Define powder metallurgy and classify its definition/meaning. Define powder metallurgy, steps, application. Technical terms English- Malayalam.

1 Understanding merits and demerits . Illustrate the methods for making of metal

1 Understanding merits and demerits . Illustrate the methods for making of metal is an official topic in Module 1 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 1 Understanding merits and demerits . Illustrate the methods for making of metal using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 1 understanding merits and demerits . illustrate the methods for making of metal should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 1 Understanding merits and demerits . Illustrate the methods for making of metal means in the official course context
Study lens	Principle → components or stages → result → application

Official syllabus detail and terminology

The following excerpt preserves official syllabus terminology for this module. Educational explanations below are separate elaboration.

Choose metal casting and powder metallurgy.

M1.01	Recall casting and pattern.	1
Remembering		
M1.02	Outline the requirements of a pattern material	1
Understanding	and list different types of pattern materials.	
	Classify patterns like single, split, loose piece	
M1.03		1
Understanding	and sweep pattern.	
M1.04	Define pattern allowance and define pattern allowances such as shrinkage, machining,	1
Understanding	draft, distortion, shake allowances.	
	Define mould, cope, drag, runner, riser, core	
M1.05		1
Understanding	and chaplets.	
M1.06	Distinguish green sand moulding and dry sand moulding and identify automotive components	1
Applying	made by these processes.	
	Explain hot chamber die casting, cold chamber die casting, centrifugal casting and	

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 2

particular fabrication process for specific automobile application.

This module is presented from the official syllabus scope for Manufacturing Technology for. Use the topic cards for learning and the source transcript for exact

coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 2 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: particular fabrication process for specific automobile application.
- Official duration: As specified
- Official topic entries captured: 11
- The full source excerpt is preserved below for coverage checking.

1 Understanding application of sheet metal in automobile. List metals used for sheet metal work and

1 Understanding application of sheet metal in automobile. List metals used for sheet metal work and is an official topic in Module 2 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 1 Understanding application of sheet metal in automobile. List metals used for sheet metal work and using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 1 understanding application of sheet metal in automobile. list metals used for sheet metal work and should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 1 Understanding application of sheet metal in automobile. List metals used for sheet metal work and means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 2-പാഠ്യ 1 Understanding application of sheet metal in automobile. List metals used for sheet metal work and പദാർത്ഥത്തിന്റെ അർത്ഥം definition/meaning പദാർത്ഥത്തിന്റെ അർത്ഥം. പദാർത്ഥം പദാർത്ഥം പദാർത്ഥം, steps, application പദാർത്ഥം പദാർത്ഥത്തിന്റെ അർത്ഥം. Technical terms English-ഇരുമ്പിന്റെ പ്രവർത്തനം തുറന്നുവെക്കൽ തുറന്നുവെക്കൽ.

reaming, chamfering taper turning and thread cutting. Identify the components of a of shaper and demonstrate the crank and slotted lever type 1 Understanding M3.03 quick return motion mechanism.

reaming, chamfering taper turning and thread cutting. Identify the components of a of shaper and demonstrate the crank and slotted lever type 1 Understanding M3.03 quick return motion mechanism. is an official topic in Module 3 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify reaming, chamfering taper turning and thread cutting. Identify the components of a of shaper and demonstrate the crank and slotted lever type 1 Understanding M3.03 quick return motion mechanism. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, reaming, chamfering taper turning and thread cutting. identify the components of a of shaper and demonstrate the crank and slotted lever type 1 understanding m3.03 quick return motion mechanism. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What reaming, chamfering taper turning and thread cutting. Identify the components of a of shaper and demonstrate the crank and slotted lever type 1 Understanding M3.03 quick return motion mechanism. means in the official course context

Aspect	What to prepare
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-റീമിംഗ്, ചാമ്ഫറിംഗ് ടാപ്പർ തുറന്നിടലും ത്രാഡ് കട്ടിംഗ്. Identify the components of a of shaper and demonstrate the crank and slotted lever type 1 Understanding M3.03 quick return motion mechanism.

റീമിംഗ്, ചാമ്ഫറിംഗ്, ടാപ്പർ തുറന്നിടലും ത്രാഡ് കട്ടിംഗ് definition/meaning റീമിംഗ്, ചാമ്ഫറിംഗ്, ടാപ്പർ തുറന്നിടലും ത്രാഡ് കട്ടിംഗ്. റീമിംഗ്, ചാമ്ഫറിംഗ്, ടാപ്പർ തുറന്നിടലും ത്രാഡ് കട്ടിംഗ്, steps, application റീമിംഗ്, ചാമ്ഫറിംഗ്, ടാപ്പർ തുറന്നിടലും ത്രാഡ് കട്ടിംഗ്. Technical terms English-റീമിംഗ്, ചാമ്ഫറിംഗ്, ടാപ്പർ തുറന്നിടലും ത്രാഡ് കട്ടിംഗ്.

Identify the components of a drilling machine.

Identify the components of a drilling machine. is an official topic in Module 3 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Identify the components of a drilling machine. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, identify the components of a drilling machine. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Identify the components of a drilling machine. means in the official course context

Official syllabus detail and terminology

The following excerpt preserves official syllabus terminology for this module. Educational explanations below are separate elaboration.

milling, drilling machine and the basics of flexible manufacturing system.

M3.01	Identify the components of a lathe and define their functions, working and lathe specifications.	2
Understanding	Define various lathe operations such as facing, centering, drilling, plain turning, boring,	1
Understanding		
M3.02	reaming, chamfering taper turning and thread cutting.	
	Identify the components of a of shaper and demonstrate the crank and slotted lever type	1
Understanding		
M3.03	quick return motion mechanism.	
M3.04	Identify the components of a drilling machine.	1
Understanding		
M3.05	Define drilling, reaming and boring.	1
Understanding		
M3.06	Identify the components of a Column and	2
Understanding		

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 4

:

This module is presented from the official syllabus scope for Manufacturing Technology for. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: :
- Official duration: As specified
- Official topic entries captured: 9
- The full source excerpt is preserved below for coverage checking.

general classification of metal forming 1 Understanding operations.

general classification of metal forming 1 Understanding operations. is an official topic in Module 4 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify general classification of metal forming 1 Understanding operations. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, general classification of metal forming 1 understanding operations. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What general classification of metal forming 1 Understanding operations. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related

but different term.

Aspect	What to prepare
Definition/identity	What Define wire drawing and tube drawing. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4- Define wire drawing and tube drawing.

പ്രദേശം പ്രദേശം definition/meaning പ്രദേശം പ്രദേശം. പ്രദേശം പ്രദേശം പ്രദേശം, steps, application പ്രദേശം പ്രദേശം പ്രദേശം. Technical terms English- പ്രദേശം പ്രദേശം പ്രദേശം.

Define hydroforming and shot peening. 1 Understanding Summarize the fundamentals, applications,

Define hydroforming and shot peening. 1 Understanding Summarize the fundamentals, applications, is an official topic in Module 4 of Manufacturing Technology for. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Define hydroforming and shot peening. 1 Understanding Summarize the fundamentals, applications, using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, define hydroforming and shot peening. 1 understanding summarize the fundamentals, applications, should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Official syllabus detail and terminology

The following excerpt preserves official syllabus terminology for this module. Educational explanations below are separate elaboration.

:	techniques in automobile industry.	
M4.01	Summarize hot working, cold working and the general classification of metal forming operations.	1
Understanding		
M4.02	Define forging.	1
Understanding		
M4.03	Define forging, smith forging and machine forging	1
Understanding		
M4.04	Demonstrate the machine forging of crank shaft and connecting rod.	1
Understanding		
M4.05	Illustrate rolling and rolling mill configurations.	1
Understanding		
M4.06	Define direct extrusion, indirect extrusion, hot extrusion, cold extrusion, continuous	1
Understanding		

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

RAPID REFERENCE

Concept and formula bank

Answer structure

Definition → Principle → Components/steps → Application → Conclusion

Use this sequence for descriptive questions when the topic does not require a numerical formula.

Practical record

Aim → Apparatus → Procedure → Observation → Result → Safety

Use this sequence for laboratory, workshop and field activities.

OFFICIAL SELF-LEARNING

Activities from the syllabus

Use the extracted official activity wording as the record of required self-learning work.

The official PDF does not expose a separate activities heading in the extracted text; consult the source PDF pages for the exact activity list.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

Define or explain Recall casting and pattern. 1 Remembering Outline the requirements of a pattern material. (3 marks)

Answer: Begin with the standard definition or identity of *Recall casting and pattern*. *1 Remembering Outline the requirements of a pattern material*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 1 Understanding and list different types of pattern materials. Classify patterns like single, split, loose piece. (3 marks)

Answer: Begin with the standard definition or identity of *1 Understanding and list different types of pattern materials*. *Classify patterns like single, split, loose piece*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 1 Understanding and sweep pattern. Define pattern allowance and define pattern. (3 marks)

Answer: Begin with the standard definition or identity of *1 Understanding and sweep pattern*. *Define pattern allowance and define pattern*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□ □□□□□□.

Define or explain allowances such as shrinkage, machining, 1 Understanding draft, distortion, shake allowances. Define mould, cope, drag, runner, riser, core. (3 marks)

Answer: Begin with the standard definition or identity of *allowances such as shrinkage, machining, 1 Understanding draft, distortion, shake allowances*. Define *mould, cope, drag, runner, riser, core*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□ □□□□□□.

Module 2

Define or explain 1 Understanding application of sheet metal in automobile. List metals used for sheet metal work and. (3 marks)

Answer: Begin with the standard definition or identity of *1 Understanding application of sheet metal in automobile*. List *metals used for sheet metal work and*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□ □□□□□□.

Define or explain 1 Understanding standard gauge numbers used for sheet metals. Define various sheet metal operations like - shearing, cutting off, parting, blanking,. (3 marks)

Answer: Begin with the standard definition or identity of *1 Understanding standard gauge numbers used for sheet metals*. Define *various sheet metal operations like - shearing, cutting off, parting, blanking,.* State the governing principle, list the key

components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 1 Understanding punching, notching, slitting, lancing, bending, drawing and squeezing.. (3 marks)

Answer: Begin with the standard definition or identity of *1 Understanding punching, notching, slitting, lancing, bending, drawing and squeezing..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Define welding and weldability. 1 Remembering Explain the features of welding and general. (3 marks)

Answer: Begin with the standard definition or identity of *Define welding and weldability. 1 Remembering Explain the features of welding and general.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 3

Define or explain their functions, working and lathe 2 Understanding specifications. Define various lathe operations such as facing, centering, drilling, plain turning, boring,. (3 marks)

Answer: Begin with the standard definition or identity of *their functions, working and lathe 2 Understanding specifications. Define various lathe operations such as facing,*

centering, drilling, plain turning, boring, . State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain reaming, chamfering taper turning and thread cutting. Identify the components of a of shaper and demonstrate the crank and slotted lever type 1 Understanding M3.03 quick return motion mechanism.. (3 marks)

Answer: Begin with the standard definition or identity of *reaming, chamfering taper turning and thread cutting*. Identify the components of a of shaper and demonstrate the crank and slotted lever type 1 Understanding M3.03 quick return motion mechanism.. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Identify the components of a drilling machine.. (3 marks)

Answer: Begin with the standard definition or identity of *Identify the components of a drilling machine..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Define drilling, reaming and boring. 1 Understanding Identify the components of a Column and. (3 marks)

Answer: Begin with the standard definition or identity of *Define drilling, reaming and boring. 1 Understanding Identify the components of a Column and.* State the governing

principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 4

Define or explain general classification of metal forming 1 Understanding operations.. (3 marks)

Answer: Begin with the standard definition or identity of *general classification of metal forming 1 Understanding operations..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Define forging. 1 Understanding Define forging, smith forging and machine. (3 marks)

Answer: Begin with the standard definition or identity of *Define forging. 1 Understanding Define forging, smith forging and machine.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 1 Understanding forging Demonstrate the machine forging of crank. (3 marks)

Answer: Begin with the standard definition or identity of *1 Understanding forging Demonstrate the machine forging of crank.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 1 Understanding shaft and connecting rod. Illustrate rolling and rolling mill. (3 marks)

Answer: Begin with the standard definition or identity of *1 Understanding shaft and connecting rod. Illustrate rolling and rolling mill*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Recall casting and pattern. 1 Remembering Outline the requirements of a pattern material.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **1 Understanding application of sheet metal in automobile. List metals used for sheet metal work and.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **their functions, working and lathe 2 Understanding specifications. Define various lathe operations such as facing, centering, drilling, plain turning, boring,.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 4

1-mark definition: State the meaning of **general classification of metal forming 1 Understanding operations..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
