Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

22 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD

How to use this lesson

First pass

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- □ To provide basic exposure to the common raw materials and consumables used in printing and packaging practices.
- □ To guide the student to know about various substrates and other essential materials used in the printing and packaging industry.
- □ To understand the general concepts on characteristics, manufacturing and uses of primarily used raw materials in printing and packaging.
- □ To understand the role of primarily used raw materials in printing and packaging in deliver quality products at the output.

Course outcomes

CO	Official outcome	Study level
CO1	12 Understanding Summarize the various aspects of paper and	See official syllabus
CO2	12 Understanding board used in printing and packaging. Explain about various aspects of plastics used	See official syllabus
CO3	10 Understanding in printing and packaging. Describe about various aspects of	See official syllabus
CO4	9 Understanding miscellaneous printing materials.	See official syllabus

CO3	CO3 2
CO4	CO4 2

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Describe about different aspects of printing inks.	4	As specified
Module 2	packaging.	7	As specified
Module 3	Explain about various aspects of plastics used in printing and packaging.	5	As specified
Module 4	Describe about various aspects of miscellaneous printing materials.	6	As specified

MODULE 1

Describe about different aspects of printing inks.

This module is presented from the official syllabus scope for Materials for Printing and. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.

- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Describe about different aspects of printing inks.
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

Ink-introduction and components

Ink-introduction and components is an official topic in Module 1 of Materials for Printing and. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Ink-introduction and components using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, ink-introduction and components should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Ink-introduction and components means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-ഇൻക്-ഇൻട്രോഡക്ഷൻ ആൻഡ് കമ്പോണൻ്റ് ഇൻക്-ഇൻട്രോഡക്ഷൻ

Pulping - Definition, Classifications-Mechanical, Chemical, Semi - Chemical and Chemi - Mechanical pulping. Pulp Washing, Bleaching, Refining, Cleaning and Stock preparation. Paper/board making- Overview on - Manual Method and Machines used - Cylinder press and Fourdrinier machine. Manufacturing process - Forming, Draining, Pressing and Drying. Finishing and Converting- Calendaring, Coating, Slitting, Cutting, Packaging and Labeling. Mill conditioning. Paper recycling-introduction. Steps - Sorting, Deinking, Pulping and papermaking. Paper and Board Properties: Define - Printability & Runnability Properties. Optical properties- Color, Gloss, Opacity, Metamerism, Brightness, Whiteness. Structural Properties- Density, Basis Weight and Grammage, Caliper and Bulk, Wire and Felt sides, Moisture Content and Relative Humidity, Dimensional Stability, Grain Direction, Porosity, Smoothness. Mechanical properties- Tear Resistance, Tensile Strength, Bursting Strength, Folding Endurance, Stiffness, Abrasion Resistance. Paper and Board- Sizes, Classifications and their uses. Importance of BIS & TAPPI standards for paper & its relation to printing industry. is an official topic in Module 2 of Materials for Printing and. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 1 paper & its relation to printing industry. Paper and board - Introduction, invention of papermaking, raw materials used for paper and board making. Pulping - Definition, Classifications-Mechanical, Chemical, Semi - Chemical and Chemi - Mechanical pulping. Pulp Washing, Bleaching, Refining, Cleaning and Stock preparation. Paper/board making- Overview on - Manual Method and Machines used - Cylinder press and Fourdrinier machine. Manufacturing process - Forming, Draining, Pressing and Drying. Finishing and Converting-Calendaring, Coating, Slitting, Cutting, Packaging and Labeling. Mill conditioning. Paper recycling-introduction. Steps - Sorting, Deinking, Pulping and papermaking. Paper and Board Properties: Define - Printability & Runnability Properties. Optical properties- Color, Gloss, Opacity, Metamerism, Brightness, Whiteness. Structural Properties- Density, Basis Weight and Grammage, Caliper and Bulk, Wire and Felt sides, Moisture Content and Relative Humidity, Dimensional Stability, Grain Direction, Porosity, Smoothness. Mechanical properties- Tear Resistance, Tensile Strength, Bursting Strength, Folding Endurance, Stiffness, Abrasion Resistance. Paper and Board- Sizes, Classifications and their uses. Importance of BIS & TAPPI standards for paper & its relation to printing industry. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 1 paper & its relation to printing industry. paper and board - introduction, invention of papermaking, raw materials used for paper and board making. pulping - definition, classifications-mechanical, chemical, semi - chemical and chemi - mechanical pulping. pulp washing, bleaching, refining, cleaning and stock preparation. paper/board making- overview on - manual method and machines used - cylinder press and fourdrinier machine. manufacturing process - forming, draining, pressing and drying. finishing and converting-calendaring, coating, slitting, cutting, packaging and labeling. mill conditioning. paper recycling-introduction. steps - sorting, deinking, pulping and papermaking. paper and board properties: define - printability & runnability properties. optical properties- color, gloss, opacity, metamerism, brightness, whiteness. structural properties- density, basis weight and grammage, caliper and bulk, wire and felt sides, moisture content and relative humidity, dimensional stability, grain

direction, porosity, smoothness. mechanical properties- tear resistance, tensile strength, bursting strength, folding endurance, stiffness, abrasion resistance. paper and board- sizes, classifications and their uses. importance of bis & tappi standards for paper & its relation to printing industry. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

MODULE 3

Explain about various aspects of plastics used in printing and packaging.

This module is presented from the official syllabus scope for Materials for Printing and. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 3 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Explain about various aspects of plastics used in printing and packaging.
- Official duration: As specified
- Official topic entries captured: 5
- The full source excerpt is preserved below for coverage checking.

2 Understanding classification

2 Understanding classification is an official topic in Module 3 of Materials for Printing and. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 2 Understanding classification using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 2 understanding classification should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 2 Understanding classification means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

<https://www.printweek.in/features/dampening-solutions> 8.
<http://printwiki.org/Blanket> is an official topic in Module 4 of Materials for Printing and. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Plate treating solutions & Cleaning solutions. 1 Understanding Dampening solution- purpose of use, ingredients and their properties. Blanket - function and types. Adhesive: types, properties and uses. Leather - purpose of use, types. Aluminum foil - properties and application. Glass- introduction, types, properties and application. Metals - types, characteristics and use. Photographic and light sensitive materials - types, features and use. Image Carriers: Cross - sectional view and imaging features of - Lithographic plate, Gravure cylinder, Flexo plate, Screen printing stencil, and Digital imaging. Plate treating solutions. Cleaning solutions. Text / Reference: T/R Book Title/Author T1 Tulika Das, Chemistry in Printing, 2nd Edition, Barnana Prakashani, 2011. R.H. Leach and R.J. Pierce Ed, The Printing Ink Manual, 5th Edition, Kluwer R1 Academic publisher. Bishwanath Chakravarty, A Hand Book for Printing and Packaging, R2 Galgotia Publications Pvt. Ltd, 1997. GATF Staff Solving Offset Ink Problems GATF, 1998 N.R.Elred & T. Scarlet, What the Printer should know about Ink, GATF, R3 1995 N.R.Elred & T. Scarlet, What the Printer should know about Paper, GATF, R4 1995 R5 N.R.Elred & T. Scarlet, Chemistry for the Graphic Arts, GATF, 1992. R6 P. Kipphan, Handbook of Print Media, Springer, 2002. <https://en.wikipedia.org/wiki/Ink> 2. <http://printwiki.org/Ink> 3.
<https://en.wikipedia.org/wiki/Paper> 4. <http://printwiki.org/Pulping> 5.
<https://en.wikipedia.org/wiki/Plastic> 6.
[https://en.wikipedia.org/wiki/Substrate_\(printing\)](https://en.wikipedia.org/wiki/Substrate_(printing)) 7.
<https://www.printweek.in/features/dampening-solutions> 8.
<http://printwiki.org/Blanket> using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.

- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, plate treating solutions & cleaning solutions. 1 understanding dampening solution- purpose of use, ingredients and their properties. blanket - function and types. adhesive: types, properties and uses. leather - purpose of use, types. aluminum foil - properties and application. glass- introduction, types, properties and application. metals - types, characteristics and use. photographic and light sensitive materials - types, features and use. image carriers: cross - sectional view and imaging features of - lithographic plate, gravure cylinder, flexo plate, screen printing stencil, and digital imaging. plate treating solutions. cleaning solutions. text / reference: t/r book title/author t1 tulika das, chemistry in printing, 2nd edition, barnana prakashani, 2011. r.h. leach and r.j. pierce ed, the printing ink manual, 5th edition, kluer r1 academic publisher. bishwanath chakravarty, a hand book for printing and packaging, r2 galgotia publications pvt. ltd, 1997. gatf staff solving offset ink problems gatf, 1998 n.r.elred & t. scarlet, what the printer should know about ink, gatf, r3 1995 n.r.elred & t. scarlet, what the printer should know about paper, gatf, r4 1995 r5 n.r.elred & t. scarlet, chemistry for the graphic arts, gatf, 1992. r6 p. kipphan, handbook of print media, springer, 2002. online resources: sl.no website link 1. <https://en.wikipedia.org/wiki/ink> 2. <http://printwiki.org/ink> 3. <https://en.wikipedia.org/wiki/paper> 4. <http://printwiki.org/pulping> 5. <https://en.wikipedia.org/wiki/plastic> 6. Series Test II 1

Contents:

Dampening solution- purpose of use, ingredients and their properties. Blanket - function

and types. Adhesive: types, properties and uses. Leather - purpose of use, types. Aluminum

foil - properties and application. Glass- introduction, types, properties and application.

Metals - types, characteristics and use. Photographic and light sensitive materials - types,

features and use. Image Carriers: Cross - sectional view and imaging features of

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

RAPID REFERENCE

Concept and formula bank

Answer structure

Definition → Principle → Components/steps → Application → Conclusion

Use this sequence for descriptive questions when the topic does not require a numerical formula.

Practical record

Aim → Apparatus → Procedure → Observation → Result → Safety

Use this sequence for laboratory, workshop and field activities.

RAPID REVISION

OFFICIAL SELF-LEARNING

Activities from the syllabus

Use the extracted official activity wording as the record of required self-learning work.

The official PDF does not expose a separate activities heading in the extracted text; consult the source PDF pages for the exact activity list.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

Define or explain Ink-introduction and components. (3 marks)

Answer: Begin with the standard definition or identity of *Ink-introduction and components*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Ink properties. (3 marks)

Answer: Begin with the standard definition or identity of *Ink properties*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Ink manufacturing. (3 marks)

Answer: Begin with the standard definition or identity of *Ink manufacturing*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Types of printing inks 3 **Understanding Ink-** Introduction, Raw materials of printing inks - pigments and dyestuffs, oils, solvents, resins, plasticizers, driers, waxes, surfactants, antioxidants and other additives. Ink properties: Optical properties - Color, Gloss, Opacity, Transparency. Physical properties - Length, Viscosity, Tack, Flow, Adhesion, Scuff resistance. Rheological properties - plastic, pseudoplastic, dilatant and thixotropic substances, viscoelasticity. Ink drying and curing - oxidation, evaporation, penetration, precipitation, radiation curing. Ink manufacturing - Flow chart, illustration and description of- Varnish manufacture, pigment dispersal, Mixing, Milling, Filtering, Quality Check, Packing and Labeling. Name of standard ink manufactures in India and world. Types of printing inks: Offset inks- Non-Heatset (coldset) inks, Heatset inks, Quickset inks, Sheet-fed Inks, Gravure inks, Flexo inks, Screen-printing inks, Water-based Inks, Laser Ink, UV ink, Process Ink Colors, High- Fidelity Ink. Specialty ink- Non-porous ink,

Metallic ink, Fluorescent ink, Magnetic ink, Scratch and Sniff ink, Edible ink, Moisture Resistant ink, Security ink. Common ink related printing problems and their remedies-Set off, summing, hickies, picking, linting, spot, mottle, strike through. Summarize the various aspects of paper and board used in printing and. (3 marks)

Answer: Begin with the standard definition or identity of *Types of printing inks* 3 *Understanding Ink- Introduction, Raw materials of printing inks - pigments and dyestuffs, oils, solvents, resins, plasticizers, driers, waxes, surfactants, antioxidants and other additives. Ink properties: Optical properties - Color, Gloss, Opacity, Transparency. Physical properties - Length, Viscosity, Tack, Flow, Adhesion, Scuff resistance. Rheological properties - plastic, pseudoplastic, dilatant and thixotropic substances, viscoelasticity. Ink drying and curing - oxidation, evaporation, penetration, precipitation, radiation curing. Ink manufacturing - Flow chart, illustration and description of- Varnish manufacture, pigment dispersal, Mixing, Milling, Filtering, Quality Check, Packing and Labeling. Common ink related printing problems and their remedies-Set off, summing, hickies, picking, linting, spot, mottle, strike through. Summarize the various aspects of paper and board used in printing and. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.*

Malayalam support: തിരിച്ചറയ്ക്കുന്നതിനായി നിർവ്വചനം, തത്വം/ഘട്ടം, പ്രയോഗം എന്നിവ ഉൾക്കൊള്ളിക്കുക.

Module 2

Define or explain 2 Understanding raw materials used. Pulping-Pulp Washing, Bleaching, Refining,. (3 marks)

Answer: Begin with the standard definition or identity of *2 Understanding raw materials used. Pulping-Pulp Washing, Bleaching, Refining,.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: തിരിച്ചറയ്ക്കുന്നതിനായി നിർവ്വചനം, തത്വം/ഘട്ടം, പ്രയോഗം എന്നിവ ഉൾക്കൊള്ളിക്കുക.

□□□□□ application □□□□ □□□□□□□□ □□□□□.

Define or explain Cleaning and Stock preparation. Paper/board making process, Finishing and. (3 marks)

Answer: Begin with the standard definition or identity of *Cleaning and Stock preparation. Paper/board making process, Finishing and.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□.

Define or explain 3 Understanding Converting, Paper recycling. (3 marks)

Answer: Begin with the standard definition or identity of *3 Understanding Converting, Paper recycling.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□.

Define or explain Paper and Board- Properties.. (3 marks)

Answer: Begin with the standard definition or identity of *Paper and Board- Properties..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□.

Module 3

Define or explain 2 Understanding classification. (3 marks)

Answer: Begin with the standard definition or identity of *2 Understanding classification*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Plastics-Manufacturing process-Extrusion.. (3 marks)

Answer: Begin with the standard definition or identity of *Plastics-Manufacturing process-Extrusion..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Plastics used for printing and packaging.. (3 marks)

Answer: Begin with the standard definition or identity of *Plastics used for printing and packaging..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Surface treatment on plastics 2 Understanding Chemical Etching, Waxing, Varnishing,. (3 marks)

Answer: Begin with the standard definition or identity of *Surface treatment on plastics 2 Understanding Chemical Etching, Waxing, Varnishing,.* State the governing principle,

list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 4

Define or explain Dampening Solution and Blanket.. (3 marks)

Answer: Begin with the standard definition or identity of *Dampening Solution and Blanket..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Leather, Al foil, Glass.. (3 marks)

Answer: Begin with the standard definition or identity of *Leather, Al foil, Glass..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Adhesive.. (3 marks)

Answer: Begin with the standard definition or identity of *Adhesive..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Metals used in printing and packaging. 1 Understanding Photographic and light sensitive materials &. (3 marks)

Answer: Begin with the standard definition or identity of *Metals used in printing and packaging. 1 Understanding Photographic and light sensitive materials &.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Ink-introduction and components**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **2 Understanding raw materials used. Pulping-Pulp Washing, Bleaching, Refining,.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **2 Understanding classification.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 4

1-mark definition: State the meaning of **Dampening Solution and Blanket..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
