THIRD SEMESTER DIPLOMA EXAMINATION IN TOOL AND DIE
ENGINEERING

TOOL ENGINEERING DRAWING-I

MODEL QUESTION PAPER

[Time : 3 hours

(Maximum marks: 100)

[Note :--1. Answer three full questions.

2. A2 size drawing sheet to be supplied.

3. First angle projection method to be followed.

4. Missing dimensions to be suitably assumed.

5. Both sides of the drawing sheet to be used.

6. Credit will be given to neatness and accuracy.

7. Sketches accompanied.]

Marks

PART - A

I. a) Draw three views of hexagonal nut for M30 bolt. 15

OR

b) sketch the following rivet heads on general purpose with diameter 20mm.and show the standard proportions- 15 1)Flat head,2) mushroom head,3)Flat counter sunk head-90°

PART - B

II a) Draw the sectional elevation and plan of single rivetted lap joint for 16mm thick plate. show all dimensions in terms of rivet diameter with atleast 3 rivets in the row.

30

OR

b) Compute the limit dimensions of an interference fit on hole basis system, if

Basic size of the hole = 30mm dia

Minimum negative clearance = 0.001mm

Tolerance on the hole = 0.021mm

Tolerance on the shaft = 0.013mm

Represent the same on a schematic drawing. 30

PART - C

III a) The accompanying figure (i) show the details of a plate-drill jig. Assemble the parts and draw -

1) Sectional elevation

2) Prepare an item list. 55

OR

b) The accompanying figure (ii) show the details of a milling fixture used for slot cutting. assemble the parts and draw -

1) Elevation of assembled view.

2) Prepare an item list. 55
