

COURSE TITLE : BASIC ARCHITECTURAL DRAWING & ART DRAWING
COURSE CODE : 2189
COURSE CATEGORY : B
PERIODS/WEEK : 3
PERIODS/SEMESTER : 45
CREDITS : 2

TIME SCHEDULE

MODULE	TOPICS	PERIODS
1	Introduction to drawing instruments, and media	6
2	Orthographic projection	15
3	Three dimensional views	9
4	Rendering techniques	15
TOTAL		45

Course Objective :

Sl.	Sub	Student will be able to
1	1	Understand the use of engineering drawing instruments
	2	Identify different drawing media.
	3	Acquire basic drafting skills.
2	1	Understand the application of orthographic projection
	2	Identify conventional symbols used in drafting
	3	Apply enlarging and reducing scales in drawings
3	1	Develop centre line drawing of a single plan into plan, elevations and sections
	2	Prepare free hand three dimensional views
	3	Apply colours and shades to the drawings

Note: Examination is to be conducted as practical.

After the completion of the course student should be able to:

Module I: Introduction to drawing instruments and media

1.1.0. Understand the use of engineering drawing instruments

1.1.1. Know how to use T-square, set squares, scale set, pencils, pens, compasses, dividers, lettering aids, irregular curves and templates.

1.1.2. Identify different drawing media.

1.1.3. Know standard metric drawing paper sizes.

1.1.4. Select appropriate drawing media like drawing paper, butter paper and tracing paper

1.2.0. Acquire basic drafting skills.

1.2.1 – Fix paper to the drawing board

1.2.2 – Use different types of lines to prepare drawings

1.2.3 – Apply basic dimensioning techniques.

1.2.4 - Use free hand lettering of drawings

Module II: Orthographic projection

2.1.0. Understand the application of orthographic projection

2.1.1 – Draw multi-view of a given model

2.2.0 – Identify conventional symbols used in drafting

2.2.1 – Use conventional symbols to the drawings

2.3.0 - Apply enlarging and reducing scales in drawings

2.3.1 – Draw plans in enlarged and reduced scales

2.4.0 – Develop centre line drawing of a single room into plan elevation and section in a preferable scale.

2.4.1 – Draw plan, elevation and section from the given centre line

2.4.2 – Indicate dimension by means of standard methods

2.4.3 – Indicate notations and specification of materials.

Module III :Three Dimensional views

3.1.0. – Prepare free hand 3D views

3.1.1 – Sketch Three dimensional views of still life, interiors and exteriors in pencil.

Module: IV Rendering

4.1.0 – Understand the use of lines, curves and shapes in rendering

4.2.0 – Apply colours and shades to drawings

4.2.1 – Prepare colour wheels in primary, secondary and tertiary colours

4.2.2 – Prepare sketches in colour schemes

4.2.3 – Prepare tint and shade of colours

CONTENT DETAILS

MODULE I Introduction to drawing instruments and media

Introduction to drawing instruments – drawing media – paper sizes – Drawing paper – butter paper – tracing paper – fixing of paper – types of lines – dimensioning – free hand lettering

MODULE II -- Orthographic projection

Orthographic projection – top view – front view – rear view – left side and right side views – symbols – enlarging scale – reducing scale – developing centre line plan – prepare plans ,elevations and sections – dimensioning plans and sections – indicating specifications of materials – notations

MODULE III Three Dimensional views --

Three dimensional views – free hand sketching with pencil – still life – interior view- exterior view

MODULE IV Rendering

Rendering with pencil – pen and ink – application of lines, curves and geometric forms – colour – tint – shade – value - colour wheel - primary –secondary –tertiary– colour schemes
