

COURSE TITLE : ARCHITECTURAL DRAWING I
COURSE CODE : 3183
COURSE CATEGORY : B
PERIODS/WEEK : 5
PERIODS/SEMESTER : 75
CREDITS : 3

TIME SCHEDULE

Module	Topic	Periods
1	Data collection and analysis.	10
2	Functional planning	20
3	Preparation of two dimensional drawings.	30
4	Perspective views.	15
TOTAL		75

Course Objective :

Sl.	Sub	Student will be able to
1	1	Collect standard data related to spatial and functional planning.
	2	Study the qualities of site and analysis it.
	3	Incorporate design elements based on the site analysis.
2	1	Draw single room units based on the functional and aesthetic requirements.
	2	Prepare Plan, Section and Elevation of the Designed Building.
	3	Prepare three dimensional views of buildings.
3	1	Apply rendering techniques to two dimensional and three dimensional drawings.

After completion of course student should be able to:

Module I: Data collection and analysis.

1.1.0 -Understand the design methodology

- 1.1.1-Know the need of bubble diagram.
- 1.1.2-prepare activity relationship chart.

1.2.0 - collect data from standards.

1.3.0 –Conduct case studies of existing buildings.

- 1.3.1- Present the collected data.
- 1.3.2 -Analyse the data and prepare a design brief.

Module II: Functional planning.

2.1.0 - Understand the space requirements for various activities.

- 2.1.1 – Know the grouping and distribution of spaces.

2.2.0 - Prepare design layout of individual rooms.

- 2.2.1 –Prepare layout for Living, Dining, Kitchen and Bed room.

2.3.0 - Prepare design layout of single roomed shops.

- 2.3.1 –Design flower shop, milk booth and book stall.
- 2.3.2 –Design bus shelter and watch man's cabin.

Module III: Preparation of two dimensional drawings.

3.1.0 - Design single storied structures.

- 3.1.1 Design tourist information centre.
- 3.1.2 Design weekend cottage.
- 3.1.3 Design two bed room residence.

3.2.0.-Prepare the two dimensional drawings of single storied buildings.

- 3.2.1 Draw Plan, elevation and sections.
- 3.2.2 Indicate dimension by means of standard methods.
- 3.2.3 Indicate notations of materials with specifications.

3.3.0 Render the plan and elevation using pencil and colour.

Module IV: Perspective views.

4.1.0 – Understand the types of perspective views.

- 4.1.1 – Know the various terminology used in perspective drawings.
- 4.1.2 - Know the steps involved in drawing two point perspective views.

4.2.0-Draw the perspective views of small objects and small buildings.

4.2.1 - Draw the perspective views of single block and combination block.

4.2.2 - Draw the perspective views of single storied buildings.

Note: Use Drawings sheets to prepare design and drawings.

COURSE CONTENTS

Module I: Data collection and analysis.

Importance of architectural Drawing, design methodology – bubble diagram, activity relationship chart ; collection of design data from Time Saver Standards; Case studies of existing buildings- residential spaces - single room shops- Flower shop - Milk booth - Book stall - Bus shelter - Watch man's cabin - Tourist information centre, Weekend cottage - Presentation of collected data. -Analyse the data and prepare a design brief.

Module II: Functional planning.

Space requirements for various activities like living, dining, sleeping, cooking, sanitation - Design of spaces- Design layout of individual rooms- Living, Dining, Kitchen, Bed room; Design layout- of single room shops- Flower shop, Milk booth, Book stall; Design of a Bus shelter, Watch man's cabin.

Module III: Preparation of two dimensional drawings.

Design of single storied structures.-Tourist information centre, Weekend cottage, Two bed room residence- Two dimensional drawings of single storied buildings-__ Plan, elevation and section fully dimensioned and annotated with specifications.

Render the plan and elevation using pencil and colour.

Module IV : Perspective views.

Types of perspective views; terminology used in perspective drawings- ground plane - horizon plane - picture plane - cone of vision - station point - vanishing points - two point perspective views of small objects - single block - combination block - single storied buildings- flat roof - gable roof and hip roof.
