

COURSE TITLE : MODEL MAKING WORKSHOP & MASONRY LAB
COURSE CODE : 3189
COURSE CATEGORY : B
PERIODS/WEEK : 2
PERIODS/SEMESTER : 30
CREDITS : 1

TIME SCHEDULE

Module	Topic	Periods
1	Model making tools and materials	3
2	Model making	12
3	Brick masonry	15
4	Total periods per semester	30

Course Objective :

Sl.	Sub	Student will be able to
1	1	Identify tools required for model making
	2	Select materials suitable for making models of buildings and site
	3	Demonstrate planning principles with the use of different forms
2	1	Make building models in different mediums
	2	Apply finishes to create desired textures on the prepared models
	3	List tools and materials required for constructing masonry walls.
3	1	Construct corner walls in English and Flemish bond.
	2	Construct isolated piers in English and Flemish bond.

After completion of course student should be able to:

Module I: Model making tools and materials

1.1.0 Identify tools required for model making

1.2.0. Select appropriate materials required for model making

Module II: Model Making

2.1.0. Make models of basic geometric forms like cube, prism, pyramid, cylinder, cone and sphere

2.2.0 Make building models of single room structures.

Module III: Brick Masonry

3.1.0 List tools and materials required to construct brick masonry walls.

3.2.0 Construct corner walls of English bond and Flemish bond.

3.3.0 Construct isolated piers of English bond and Flemish bond.

COURSE CONTENT

Module I: Model making tools and materials

Model making tools – materials –

Module II: model making-

Models of geometric forms – combinations – single room buildings – flat roof – sloping roof
– site contours

Module III: Brick masonry

Masonry lab – tools –materials – Isolated piers – one and half brick – two brick – English – Flemish -
Brick masonry walls – corner walls – one brick thick – one and half brick thick – English bond – Flemish
bond
