

COURSE TITLE : INTERIOR DESIGN
COURSE CODE : 4182
COURSE CATEGORY : A
PERIODS/WEEK : 6
PERIODS/SEMESTER : 78
CREDITS : 5

TIME SCHEDULE

Module	Topics	Period
1	Introduction to interior design	21
2	Furniture in interior design	18
3	Finishing materials	18
4	Estimation	21
TOTAL		78

Course Objective :

Sl.	Sub	Student will be able to
1	1	Understand the principles and elements of interior design
	2	Analyse the various styles in interior design
	3	Know the role of furniture in interior design
2	1	Specify the finishes to be applied on different types of surfaces
	2	Identify the space requirement for interior spaces
	3	Estimate quantity and cost required for the execution of the prepared design.
3	1	Prepare and render interior drawings

After completing this course student should be able to:

Module I: Introduction to interior design.

1.1.0. Comprehend the principles and elements of interior design

- 1.1.1. Understand interior design, its principles and elements.
- 1.1.2. Identify the application of design elements in Interior design.
- 1.1.3. Explain how the quality of interior space can be enhanced by applying principles of design.
- 1.1.4. Know the psychological effects of space.

Module II: Furniture in interior design

2.1.0. Analyse the various styles in interior design

- 2.1.1. Identify the different styles in furniture.
- 2.1.2. Categorize furniture with respect to its style.

2.2.0. Know the role of furniture in interior design

- 2.2.1. Design furniture in periodic style to suit day to day usage.
- 2.2.2. Design furniture in modern style.
- 2.2.3. Design furniture and interior spaces for physically challenged people.

Module III: Finishing materials

3.1.0. Specify the finishes to be applied on different types of surfaces

- 3.1.1. Understand different finishing material for walls, floor and ceiling.
- 3.1.2. Know the method of application of finishing materials.
- 3.1.3. Know the role of fabric in interiors.
- 3.1.4. Design landscapes for interiors.

Module IV: Estimation

4.1.0. Identify the space requirement for interior spaces

- 4.1.1. Understand the anthropometric and ergonomic data.
- 4.1.2. Estimate quantity and cost required for the execution of a given interior scheme.
- 4.1.3. Prepare estimates of a given interior.

4.2.0 Prepare and render interior drawings

- 4.2.1. Prepare colour rendered drawings of different types of residential and commercial spaces

(FOR EXAMINATION QUESTIONS CAN BE INCLUDED IN ARCHITECTURAL DRAWING)

CONTENT DETAILS

MODULE I

Introduction to interior design - elements –point, line, plane, form, shape texture, colour, light - application of design elements in Interior design - principles – proportion- anthropomorphic proportions- scale- balance-harmony- unity- variety- rhythm- Emphasis- - quality of interior space - enhancing by applying principles of design - space modulation-psychological effects of space.

MODULE II

Furniture in interior design - various styles in interior design - different styles in furniture-Ancient furniture in Egypt–Mesopotamia-Greece-Rome- Categorize furniture in modern style –Italian – English – American-Classification of furniture based on materials and function-modular furniture- role of furniture in interior design - Design furniture in periodic style to suit day to day usage - Design furniture in modern style - Design furniture and interior spaces for physically challenged people

MODULE III

Finishing materials- finishes to be applied on different types of surfaces - finishing material for walls, floor and ceiling – criteria for selection - method of application of finishing materials - Know the role of fabric in interiors – Curtains- function-terminology- materials- blinds- carpets-manufacturing methods – types –rugs- installation –Landscape in interiors – plants used in different types of spaces-Design landscapes for interiors.

MODULE IV

Estimation - space requirement for interior spaces - anthropometric and ergonomic data - Estimate quantity and cost required for the execution of a given interior scheme .
