

COURSE TITLE : ARCHITECTURAL DRAWING III
COURSE CODE : 5182
COURSE CATEGORY : A
PERIODS/WEEK : 6
PERIODS/SEMESTER : 78
CREDITS : 3

TIME SCHEDULE

MODULE	TOPIC	PERIODS
I	Data collection and analysis.	12
II	Functional planning	27
III	Preparation of two dimensional drawings.	27
IV	Working drawings	12
TOTAL		78

Course Objective :

Sl.	Sub	Student will be able to
1	1	Collect standard data related to spatial and functional planning.
	2	Understand building rules and regulations.
	3	Understand functional and conceptual planning of two storied buildings.
2	1	Understand the basic concept of planning framed structures
	2	Understand functional and conceptual planning of multi storied buildings
	3	Incorporate building services in building design.

NOTE: USE GOOD QUALITY ROUGH BUTTER & TRACING SHEETS TO PREPARE DESIGN AND DRAWINGS.

Upon completion of the course the student should be able to:

Module I: Data collection and analysis.

1.1.0. Collect standard data related to spatial and functional planning.

- 1.1.1. Make case studies of different types of multi storied buildings.
- 1.1.2 Analyze the data from case study

1.2.0. Understand building rules and regulations.

- 1.2.1. Know the standards specified in Kerala municipal building bye-laws.

Module II: Functional planning.

2.1.0. Understand functional and conceptual planning of two storied buildings.

- 2.1. 1. Design educational building-primary school
- 2.1.2. Design assembly building-museum/art gallery, library.
- 2.1.3. Design hospital building with 25 beds.

2.2.0. Understand the basic concept of planning framed structures

- 2.2.1. Determine illustrate structural details in plan and sections

Module III: Functional planning I

3.1.0. Understand functional and conceptual planning of multi storied buildings

- 3.1.1-Design of residential buildings-four storied apartment with two units in each floor, hostel building to accommodate 50 students.
- 3.1.2-Design commercial building -hotel with 10 rooms, shopping complex up to 4 stories
- 3.1.3 -Prepare 2 dimensional drawings of module 2 and module3.

3.2.0.Prepare plan, elevation and section.

3.3.0. Prepare site plan.

Module IV: Working Drawings

4.1.0. Incorporate building services in building design

- 4.1.1. Prepare service plan.
- 4.1.2 Draw structural details in plan and sections.

CONTENT DETAILS

Module I: Data collection and analysis.

Data collection related to spatial and functional planning- case studies of different types of multi storied buildings- data analysis from case study- **building rules and regulations**-the standards specified in Kerala municipal building bye-laws

Module II: Functional planning .

functional and conceptual planning of two storied buildings- Design- educational building, primary school ,assembly building-museum/art gallery, library, hospital building with 25 beds- **the basic concept of planning framed structures**- structural details in plan and sections

Module III: Functional planning

functional and conceptual planning of multi storied buildings-Design of residential buildings-four storied apartment with two units in each floor, hostel building to accommodate 50 students ,commercial building -hotel with 10 rooms, shopping complex up to 4 stories- 2 dimensional drawings of module 2 and module3-- plan, elevation , section and site plan.

Module IV: Working Drawings

Service plan- structural details in plan and sections.
