

COURSE TITLE	: BIOMEDICAL INSTRUMENTS LAB
COURSE CODE	: 5249
COURSE CATEGORY	: A
PERIODS/WEEK	: 5
PERIODS/SEMESTER	: 65
CREDITS	: 2

LIST OF EXPERIMENTS

On completion of the course, the student will be able:

I.

- 1.1 To construct a pacemaker circuit and plot the output waveform.
- 1.2 To construct AGC and plot the output characteristics.
- 1.3 To set up X-ray timer circuit and observe the output.
- 1.4 To set up Chart drive circuit
- 1.5 To construct ESU waveform generator and observe the output waveforms.
- 1.6 To setup an ECG simulator and observe its output waveform.
- 1.7 To verify basic principle of biotelemetry using IC 4046. (Transmitting ECG signals)
- 1.8 To setup a QRS detector circuit and observe the output.

II. Study of medical equipments

`

- 2.1 To demonstrate ECG monitor and recorder
- 2.2 To demonstrate EMG recorder
- 2.3 To demonstrate EEG recorder
- 2.4 To demonstrate Sphygmomanometer
- 2.5 To demonstrate the working of colorimeter
- 2.6 To demonstrate the working of pH meter
- 2.7 To demonstrate the working of HB meter
