

COURSE TITLE : ENGINEERING CHEMISTRY LAB
COURSE CODE : 2079
COURSE CATEGORY : B
PERIODS/ WEEK : 3
PERIODS/ SEMESTER : 45
CREDIT : 2

TIME SCHEDULE

MODULE	TOPIC	PERIODS
1	The reactions of the acid radicals.	10
2	The reactions of the basic radicals.	11
3	Analysis of simple salts	15
4	Analysis of binary mixtures	9
TOTAL		45

COURSE OUTCOME:

MODULE	GO	STUDENT WILL BE ABLE TO
1	1	Familiarize with the reactions of the acid radicals.
	2	Familiarize with the reactions of the basic radicals.
	3	Analyse simple salts
2	4	Analyse binary mixtures

SPECIFIC OUTCOMES

MODULE I

1.1.0 Understand the reactions of the following acid radicals

Carbonate, Sulphide, Sulphite, Sulphate, Thiosulphate, Nitrate, Fluoride, Chloride, Bromide iodide, Acetate, Oxalate, Phosphate, Borate and Chromate.

MODULE II

2.1.0 Understand the reactions of the following basic radicals

Chromium, Cobalt, Nickel Silver, Lead, Mercury, Copper, Cadmium, Bismuth, Arsenic, Antimony, Tin, Iron, Aluminium,, Zinc, Manganese, Calcium, Barium, Strontium, Magnesium, Sodium, Potassium, Ammonium and Magnesium.

MODULE III

3.1.0 Analyze simple salts (minimum of 8 salts)

The salts given for qualitative analysis should: -

1. be soluble in water or dilute acids or conc. HCl
2. contain one acid radical and one basic radical
3. not involve elimination of interfering acid radicals

MODULE IV

4.1.0 Analyze binary mixtures

The mixture given for qualitative analysis should

1. be soluble the water, dilute acids or conc. HCl
2. contain two acids and two basic radicals
3. not involve elimination of interfering – acid radicals
