

COURSE TITLE : QUANTITATIVE TECHNIQUES
COURSE CODE : 3253
SEMESTER : 3
COURSE CATEGORY : B
PERIODS/WEEK : 3 + 2
PERIODS/SEMESTER : 75
CREDITS : 4

TIME SCHEDULE

MODULE	TOPICS	PERIODS
1	NATURE & SCOPE OF STATISTICS	15
2	MEASURES OF CENTRAL TENDENCY & MEASURES OF DISPERSION	20
3	CORRELATION	20
4	INDEX NUMBERS	20

Course General Outcomes:

Sl.	G.O	On completion of this course the student will be able :
1	1	To Understand the meaning and scope of statistics
	2	To know the importance of classification and tabulation
2	1	To understand the measures of central tendency
3	1	To Understand the concept of correlation and its applications
4	1	To Understand the index number and its applications

SPECIFIC OUTCOMES

1.1.0 Know the definition, meaning and scope of statistics

- 1.1.1 Define Statistics.
- 1.1.2 State the functions of statistics
- 1.1.3 Explain the objects of statistics
- 1.1.4 State the limitations of statistics

1.2.0 Understand the meaning of statistical investigation

- 1.2.1 Explain statistical investigation.
- 1.2.2 Explain the various steps involved in statistical enquiry.
- 1.2.3 State the different types of data.
- 1.2.4 Explain the methods of collecting data

1.2.5 Distinguish between primary and secondary data

1.3.0 Understand the meaning and importance of classification and tabulation

1.3.1 Define classification

1.3.2 List the various objectives of classification

1.3.3 Explain the various kinds of classification

2.1.0 Understand the meaning and importance of measures of central value

2.1.1 State the meaning and importance of various measures of central value.

2.1.2 Define Mean, Median, Mode.

2.1.3 State the requisites of good Average.

2.1.4 List out the Advantages and Disadvantages of various measures of Central value.

Solve problems of Mean, Median, Mode.

3.1.0 Understand the meaning and measurement of correlation

3.1.1 State the meaning and importance of correlation

3.1.2 Explain the types of correlation

3.1.3 Explain the measurement of correlation-simple and rank correlation

3.1.4 Solve the problems on correlation.

4.1.0 Know the meaning, definition and uses of index number

4.1.1 Index number – meaning and definition

4.1.2 Uses of index number

4.1.3 Problems in construction of index number

4.1.4 Methods of constructing index number

4.1.5 Solve problems

4.1.6 List out test of adequacy of index number formulae – time reversal test only

CONTENT DETAILS

MODUE I: Meaning of statistics – definition – objectives – functions – importance – limitation – statistical investigation – meaning and definition – preliminaries to the collection of data – types of data – primary data – secondary data – classification and tabulation – meaning and definition – objectives of classification – kinds of classification – requisites of good classification – tabulation – meaning and definition of tabulation – essentials of good tabulation.

MODUE II: Measure of a Central Value – mean – median – mode – weighted mean – measures of dispersion – meaning – various measures – quartile deviation – Range

MODUE III: Correlation – meaning – types of correlation – measurement of correlation – simple and rank correlation

MODUE IV: Index number – meaning and definition-.uses of index number-problems in construction of index number- methods of constructing index number- solve problems-list out test of adequacy of index number formulae

BOOKS RECOMMENDED

1. S.P. Gupta, Statistical Methods,S.Chand & Co.
2. S.P.Gupta, Fundamentals of Statistics, S.Chand & Co
3. L.L. Potti, Statistics for B-Com, Thomson publication
