

COURSE TITLE : MANAGEMENT INFORMATION SYSTEM
COURSE CODE : 4254
SEMESTER : 4
COURSE CATEGORY : A
PERIODS/WEEK : 5 (3+2)
PERIODS/SEMESTER : 75
CREDITS : 4

TIME SCHEDULE

MODULE	TOPICS	PERIODS
1	MEANING AND ROLE OF MIS	17
2	DATA BANK CONCEPT AND DBMS	20
3	INFORMATION SYSTEM FOR DECISION MAKING	18
4	DETAILED SYSTEM DESIGNING	20

Course General Outcomes:

Sl.	G.O	On completion of this course the student will be able :
1	1	To Understand the role of MIS within the company
2	1	To Understand information storage and retrieval
3	1	To Understand Information system for decision making
4	1	To apply employability skills

SPECIFIC OUTCOMES

1.1.0 Understand meaning and Role of MIS

- 1.1.1 Define MIS
- 1.1.2 Explain the terms information and systems
- 1.1.3 Describe MIS
- 1.1.4 Explain the role of MIS within the company
- 1.1.5 Describe briefly the organization systems
- 1.1.6 Explain the system approach to organizing

2.1.0 Understand the data bank concept

- 2.1.1 Explain the manual and computer system of information storage
- 2.1.2 Explain data bank information storage and retrieval
- 2.1.3 Describe different types of computer based application

2.2.0 Understand the objectives of DBMS

- 2.2.1 Explain Data fields
- 2.2.2 Explain Data records

2.2.3 Explain Data files

2.1.4 Describe Physical and logical storage structure

3.1.0 Understand Information system for decision making

3.1.1 State the Evolution of information systems

3.1.2 Explain basic information systems

3.1.3 Explain Decision making and MIS

3.1.4 Define MIS-making programmed designs

3.2.0 Understand Strategic and Project planning for MIS

3.2.1 Explain general Business Planning

3.2.2 Explain MIS planning

3.2.3 Understand conceptual system design (All steps are required)

4.1.0 Understand Detailed system designing

4.1.1 Describe inform and involve the organization

4.1.2 Explain the Aims of detailed designing

4.1.3 Explain project management of MIS detailed designing

4.1.4 Define sub systems

4.1.5 Categorise detailed operating sub systems and information flows

4.1.6 Determine the degree of automation of each operation

4.1.7 Explain Inform and involve the organisation again.

4.1.8 State Inputs, outputs processing

4.1.9 Find System testing

4.1.10 Illustrate on organisation to operate the system

4.1.11 Explain Document the detailed design.

4.2.0 Understand Implementation, Evaluation and maintenance of MIS

4.2.1 Explain the pitfalls in MIS development

CONTENT DETAILS

MODULE I Meaning and Role of MIS-Define MIS-Explain the terms information and systems –the decision supporting system - the role of MIS within the company - organization systems - the system approach to organising

MODULE II A bank concept -the manual and computer system of information storage – data bank information storage and retrieval - different types of computer based application - objectives of DBMS - Data fields -Data records - Data files - Describe Physical and logical storage structure

MODULE III Information system for decision making -Evolution of information systems – basic information systems -Decision making and MIS - MIS-making programmed designs - Strategic and Project planning for MIS - Explain general Business Planning - Explain MIS planning -Understand conceptual system design (All steps are required)

MODULE IV Stand Detailed system designing-Discuss inform and involve the organisation - Aims of detailed designing-Explain project management of MIS detailed designing -Define sub systems -Sketch detailed operating sub systems and information flows - Determine the degree of automation of each operation -Inform and involve the organisation again -Inputs, outputs processing -System testing - Discuss on organisation to operate the system -

Document the detailed design--Understand Implementation, Evaluation and maintenance of MIS -Explain the pitfalls in MIS development .

BOOKS RECOMMENDED

1. Robert G.Mundrick,Joel E.Rose and James.R.Clagget, Information system for modern management (Third edition) –t (Prentice hall of India)
