

SUBJECT TITLE	: SUPPLY CHAIN & LOGISTICS MANAGEMENT (Practical)
SUBJECT CODE	: 6259
SEMESTER	: 6
PERIODS/ SEMESTER	: 1 WEEK
CREDITS	: 2

OBJECTIVES:

As part of the study, students should undertake a practical training in a supply chain/logistics organisation so as to get practical knowledge in the area.

- a) To expose students to logistics/supply chain management organisations, experience, knowledge.
- b) To apply the management theories taught in the lecture rooms in real logistics organisation.
- c) To get exposed to environment of supply and logistics management work.
- d) To improve students practical skill in the field.
- e) To increase the students job prospect.

ACTIVITY:

One faculty from each branch can be appointed as advisor for this practical training on logistics management. The advisor can identify appropriate organisation / firm and co-ordinate the programme. The students may be divided into appropriate groups for doing the programme.

REPORT:

At the end of the training, reports shall be prepared and submitted by each group. The report shall include:

1. Basic and relevant details about the organisation.
2. Knowledge gained from the training exposure on logistic activities.
3. Contribution to industry/institution/Society, if any, through the programme.
4. Experience gained through the practical exposure in logistics organisation and work.
