

COURSE TITLE : **WEB DESIGN**
 COURSE CODE : **3263**
 COURSE CATEGORY : **B**
 PERIODS/WEEK : **4**
 PERIODS/SEMESTER : **60**
 CREDITS : **4**

TIME SCHEDULE

MODULE	TOPICS	PERIODS
1	World Wide Web fundamentals and client-server model	15
2	HTML Basics	15
3	HTML advanced and HTML5	15
4	Cascading Style Sheets - CSS	15

Course General Outcomes:

Sl.	G.O	On completion of this course the student will be able to :
1	1	To understand World Wide Web fundamentals and client-server model
2	1	To understand HTML Basics
3	1	To apply HTML advanced and HTML5 features
4	1	To use Cascading Style sheets (CSS)

Specific Outcomes:

MODULE – I: World Wide Web fundamentals and client-server model

1.1 To understand World Wide Web fundamentals and client-server model

- 1.1.1** Define World Wide Web(WWW)
- 1.1.2** Discuss the history of WWW
- 1.1.3** Summarize the need for WWW
- 1.1.4** List the elements in WWW
- 1.1.5** Summarize the technologies used in www
- 1.1.6** Explain the importance of internet in WWW
- 1.1.7** Distinguish WWW protocols

- 1.1.8 Summarize WWW Architecture
- 1.1.9 Illustrate Client-Server model in WWW
- 1.1.10 Describe web server and web browser
- 1.1.11 Outline The Apache Web Server
- 1.1.12 Distinguish websites, Web Pages, Static and Dynamic Web pages
- 1.1.13 Outline DNS server

MODULE – II: HTML Basics

2.1 To understand HTML Basics

- 2.1.1 Describe HTML and need for HTML and its history
- 2.1.2 Discuss Mark-up languages
- 2.1.3 Define Hyper Text
- 2.1.4 Describe Tag Based Mark-up
- 2.1.5 Identify HTML Tags
- 2.1.6 Describe Basic Structure of Web Pages
- 2.1.7 Summarize the head part of documents
- 2.1.8 Distinguish header tags (meta, title, style, base, link)
- 2.1.9 Explain body tag
- 2.1.10 Classify HTML elements
- 2.1.11 Distinguish Text elements, paragraphs, headings, ordered/unordered lists
- 2.1.12 Identify HTML attributes
- 2.1.13 Identify nested(container) elements
- 2.1.14 Use HTML tables
- 2.1.15 Use Hyper links, Images
- 2.1.16 Use Blocks/Divisions
- 2.1.17 Use Inline and Block Elements
- 2.1.18 Use Frames

MODULE – III: HTML advanced and HTML5

3.1 To apply HTML advanced features and HTML5

- 3.1.1 Explain HTML form
- 3.1.2 Describe need for form elements
- 3.1.3 Identify form tag and its attributes
- 3.1.4 Explain GET and POST methods
- 3.1.5 Describe action attribute
- 3.1.6 Identify form elements
- 3.1.7 Use Form Elements : Input box, Password box, select box
- 3.1.8 Use radio buttons and groups, checkbox and checkbox groups
- 3.1.9 Use file fields, hidden field, text area

- 3.1.10 Use submit and reset buttons
- 3.1.11 Identify Form elements special attributes
- 3.1.12 Summarize HTML5 basics
- 3.1.13 Demonstrate what is new in HTML5
- 3.1.14 Identify HTML5 input elements
- 3.1.15 Use number field, email field, range field, date field
- 3.1.16 Use datalist, keygen, output
- 3.1.17 Use HTML5 audio and video tags
- 3.1.18 Use iframes, object tag
- 3.1.19 Use HTML5 API

MODULE – IV: Cascading Style Sheets - CSS

4.1 To use Cascading Style Sheets - CSS

- 4.1.1 Describe Cascading Style Sheets (CSS) and its needs
- 4.1.2 Show Integration of CSS into HTML pages
- 4.1.3 Distinguish inline, internal and external styles
- 4.1.4 Describe style tag and style attribute, CSS style syntax
- 4.1.5 Use CSS element selectors
- 4.1.6 Describe internal style sheets and class representations
- 4.1.7 Explain id/tag based classes, user defined class names
- 4.1.8 Describe multiple/parent-child/nth element based class rep
- 4.1.9 Describe CSS property names and values
- 4.1.10 Distinguish styling texts and fonts, styling element backgrounds
- 4.1.11 Describe CSS box model, modelling CSS boxes
- 4.1.12 Use styling Hyper links, lists and tables
- 4.1.13 Explain Element floating
- 4.1.14 Show styling dimensions, alignment and display
- 4.1.15 Describe aligning HTML blocks – CSS layout design
- 4.1.16 Design simple template (header, 2 sidebars, content and footer).

CONTENT DETAILS

MODULE – I: World Wide Web fundamentals and client-server model

Introduction to World Wide Web (WWW) - History – Need for WWW – Elements in WWW - Technologies used in WWW – Importance of Internet in WWW – WWW protocols – WWW Architecture – Client-Server model – Introduction to Web Browsers – Introduction to web server – The Apache Web Server - Websites – Web Pages - Static and Dynamic Web pages - Introduction to DNS server.

MODULE – II: HTML Basics

Introduction to HTML – Need for HTML – History – Mark-up languages – What is Hyper Text- Tag Based Mark-up – HTML Tags – Basic Structure of Web Pages – head part of documents – header tags (meta- title – style – base -link) – body tag – HTML element classifications – Text elements – paragraphs - headings – ordered /unordered lists – HTML attributes – nested(container) elements – HTML tables - Hyper links – Images – Blocks/ Divisions - Inline and Block Elements - Frames

MODULE – III: HTML advanced and HTML5

HTML form – Need for form elements – form tag and it's attributes – GET and POST methods - action attribute - Form Elements – Input box – Password box – select box - radio buttons and groups – checkbox and checkbox groups – file fields – hidden field and it's applications – text area – submit and reset buttons – Form elements special attributes . Introduction to HTML5 – what is new in HTML 5 – HTML 5 input elements(types) – number field – email field – range field -date field – datalist – keygen – output. HTML5 audio and video tags – iframes – object tag - HTML5 API.

MODULE – IV: Cascading Style Sheets - CSS

Cascading Style Sheets(CSS) – introduction – need – Integration of CSS into HTML pages – inline, internal and external styles – style tag and style attribute – CSS style syntax – CSS element selectors- internal style sheets and class representations – id/tag based classes – user defined class names – multiple/parent-child/nth element based class rep – CSS property names and values – styling texts and fonts – styling element backgrounds – CSS box model – modelling CSS boxes – styling Hyper links, lists and tables. Element floating – styling dimensions, alignment and display - aligning HTML blocks – CSS layout design – Designing a simple template (header, 2 sidebars, content and footer).
