

COURSE TITLE	: APPLICATION DEVELOPMENT LAB- II - (WEB)
COURSE CODE	: 5267
COURSE CATEGORY	: A
PERIODS/WEEK	: 5
PERIODS/SEMESTER	: 65
CREDITS	: 3

Software Requirement: PHP and MySQL

Course General Outcomes:

To develop a user friendly Web Application with database using PHP and MySQL

Specific Outcomes:

To Understand Fundamentals of Web Application development with database

- 1.1. Familiarisation with an IDE (such as Eclipse/NetBeans etc.)
- 1.2. Use of HTML5 form elements such as buttons, text field, text area, check box, radio buttons, lists, scroll bar, list box, combo box etc
- 1.3. Explain Concept of Event Handling, session etc
- 1.4. Develop simple programs using the above controls.

To explore the features of Advanced Web Application development with database

- 2.1 Develop menu driven programs - menus, menu bar, menu items etc
- 2.2 Implement Dialog boxes in programs

[Note: At the end this module, students shall design and develop the user interfaces, menus for their application]

To Implement Database Connectivity

- 3.1 Implement database integration in applications -store, retrieve, modify databases from applications.
- 3.2 Implementation of database operations with necessary programming structures

[Note: At the end this module, students shall design the database for their application and incorporate necessary database operations]

To Generate Reports

- 4.1 Implementation of general application features such as search, reports, backup etc
- 4.2 Create report
- 4.3 Converting reports to other format such as PDF
- 4.4 Implement backup & restore facility

[Note: At the end this module, students shall develop a complete web based database application.]

Instructions:

A simple web application may be developed in any one of the domains such as Banking, Electricity Billing, Library management, Payroll, Insurance, Inventory, Health care etc. Students may select the same topic that they used in their mini project in the previous semester. Application should be developed by using an IDE (such as Eclipse, NetBeans etc).

Programming language PHP must be used.

The course content given above is a general outline. The contents may be rearranged in tune with IDE/ Programming language for this lab without losing the course objective.

The lab record should contain all interim programs developed by the student during the development of the main application. The main application should be the last experiment.

Before the end of semester, the student should develop a complete Web based database application incorporating the features listed in the exercises above. In end semester examination the students will be evaluated based on the features listed above. Also the students have to demonstrate the database application software developed by them as part of the evaluation.
