

COURSE TITLE : ADVANCED PROCESS CONTROL LAB
COURSE CODE : 6219
COURSE CATEGORY : A
PERIODS/WEEK : 5
PERIODS/SEMESTER : 75
CREDITS : 3

On completion of this course the student will be able to

1. Design and set up alarm circuits for simple process control applications.
2. Design and Setup ON/OFF status of a device Using Control relay.
3. Performance evaluation of Pressure Process Station.
4. Performance evaluation of flow Process Station.
5. Performance evaluation of Level Process Station.
6. Performance evaluation of Temperature process station.
7. To plot the characteristic curve of P/I converter.
8. To plot the characteristic curve of I/P converter.
9. Construct PLC ladder diagram programming for Digital Logic gate function and simulate it.
10. Construct PLC ladder diagram programming for ON/OFF status of a device remotely operating device and simulate.
11. Construct PLC ladder diagram Programming for auto operation of 2 devices using timer and simulate it.
12. Construct PLC ladder diagram Programming for counter and comparator and simulate it.
13. Construct PLC Ladder Diagram Programming for a LIFT operation.
14. Water Level control using PLC.
15. Speed control of a motor using PLC.
16. Traffic Control using PLC.
17. Bottle filling system using PLC.
18. Study of SCADA package.
19. Study features of DCS.
