

COURSE TITLE : PRINT FINISHING TECHNIQUES
COURSE CODE : 4104
COURSE CATEGORY : B
PERIODS/ WEEK : 6
PERIODS/ SEMESTER : 84
CREDIT : 5

TIME SCHEDULE

MODULE	TOPIC	PERIODS
1	Introduction to Binding and Finishing	18
2	Binding Operations.	23
3	Forwarding and Finishing operations.	23
4	Post press machineries.	20
TOTAL		84

Course Objective :

G .O.	ON THE COMPLETION OF THE STUDY OF THIS MODULE STUDENT WILL BE ABLE :
1	To comprehend different binding operations
2	To understand various post-press tools, materials and equipments
3	To understand different Binding operations.
4	To know about different forwarding and Finishing operations.
5	To understand about various Post press machineries.

MODULE I INTRODUCTION TO BINDING AND FINISHING

1.1.0 To comprehend different binding operations

- 1.1.1. To define book binding and finishing
- 1.1.2. To explain different classification of bookbinding methods
- 1.1.3. To identify styles of binding

1.2.0 To understand various post-press tools, materials and equipments

- 1.2.1. To list different tools , materials used for binding and finishing
- 1.2.2. To list different equipments used for binding and finishing
- 1.2.3. To explain ware house.

MODULE II SECURING METHODS

2.1.0 To understand different Binding operations.

- 2.1.1 To identify different styles of stitching.
- 2.1.2 To list out different sewing methods.
- 2.1.3 To identify different different end papers.
- 2.1.4 To describe Account book binding.

MODULE III FORWARDING AND FINISHING OPERATIONS.

3.1.0 To know about different forwarding and Finishing operations.

- 3.1.1** To list out various Forwarding and finishing operations.
- 3.1.2** To describe different edge decoration methods.
- 3.1.3** To state various finishing operations.

MODULE IV POST PRESS MACHINERIES.

4.1.0 To know about different binding and finishing machineries.

- 4.1.1** To select a particular machine for various post press works.
- 4.1.2** To describe the working of programmable cutting machine.
- 4.1.3** To identify the components of a wire stitching machine.
- 4.1.4** To explain how a perfect binder works

CONTENT DETAILS

MODULE I

Definition- book binding and print finishing. classification of binding- Stationery and letter press and its subdivisions. Styles of binding- Quarter bound book, Half bound book – old style and new style, Full bound book. Binding & Finishing- Tools, materials- Covering Materials, Reinforcing Materials, Securing Materials, Adhesives, Book Finishing Materials and Equipments. Ware House, Types of Ware House – White paper Ware House, Printed paper Ware House.

MODULE II

Stitching – Side Stitching and Saddle Stitching. Sewing, Types of Sewing – French Sewing, Tape Sewing or Sewing on Tapes, Raised Cord Sewing or Flexible Sewing, Recessed Card Sewing or Sawn-in Sewing, Two on & All along Sewing, Overcast Sewing. Loose Leaf Binding – Spiral Binding , Ring, Thong, Post and Comb Binding. Perfect Binding – introduction. Case Binding – preparation of case and casing-in.

End Paper – Types and its use –Self end paper, Single End Paper, Double end paper, Made End Paper, Reinforced End Paper, Cloth Joint End Paper, Zig Zag End paper.

Account Book Binding- Definition, operations. Quarter bound book, Half bound book – old style and new style, Full bound book.

MODULE III

Forwarding Operations

Cutting, Trimming, Difference between Cutting and Trimming. Folding – Types of Folding – Folding-to-paper, Folding-to-Print, Lump Folding. Creasing, Gathering, Collating, Binder's/Collating mark, Inserting, Attaching of Plates and Maps. Perforating – Types of Perforation, Punching and Drilling, Eyeletting, Index cutting, Numbering – Horizontal Numbering and Vertical Numbering. Die cutting and Slitting Operations. Headbands, Edge Decoration, Types of Edge Decoration – Coloring the edge, Painting, sprinkling, Gaufering, Marbling and Edge Guilding.

Finishing Operations

Print Finishing Operations - Embossing & Debossing, Blind Embossing, Gold Blocking /Foil Stamping, Lettering, Laminating, varnishing

MODULE IV

Programmable Cutting Machine and its operation – machine bed, clamp, back gauge, knife and safety mechanisms. Folding Machine and its operation – buckle folding, knife folding and combination folding stations. Wire Stitching Machine and its operation – wire unwind, wire straightener, cutter block, saddle and wire clencher. Rounding and Backing Machine and its operations – hopper, rounding station, backing station and delivery station. Gathering Machine and its operations. Laminating machine. Bundling machine. Perfect binding machine and its operation. Case making machine.
