

**COURSE TITLE : PRINTING MACHINES - I LAB**  
**COURSE CODE : 5108**  
**COURSE CATEGORY : P**  
**PERIODS/ WEEK : 5**  
**PERIODS/ SEMESTER : 55**  
**CREDIT : 2**

**Course Outcomes:**

| <b>G.O</b> | <b>ON THE COMPLETION OF THE STUDY OF THIS MODULE STUDENT WILL BE ABLE :</b>     |
|------------|---------------------------------------------------------------------------------|
| 1          | To demonstrate two colour printing with single colour sheet-fed offset machine. |
| 2          | Realize sheet reversal methods while printing on both side of a paper.          |
| 3          | Realize ink mixing concept.                                                     |
| 4          | To demonstrate printing of half-sheet work and sheet work imposition schemes.   |

**PRACTICAL EXPERIMENTS:**

1. Rainbow printing using single colour sheet-fed offset.
2. Half-sheet work method using work and turn.
3. Half-sheet work method using work and tumble(work and back).
4. Sheet work method using work and turn.
5. Sheet work method using work and back.

**NOTE**

1. Every experiment should start by following pre-make ready and make ready operations and should end with proper cleaning of machine with proper materials and aids.
