

COURSE TITLE : MACHINE SHOP
COURSE CODE : 2069
COURSE CATEGORY : B
PERIODS/ WEEK : 3
PERIODS/ SEMESTER : 45
CREDIT : 2

COURSE OUTCOME

No.	Student will be able to
1	Understand safety precautions
2	Practice the turning operation to produce various machine parts
3	Understand the various operations of shaper and planer.
4	Understand the key way-cutting
5	Know the Testing & inspection of machine tool operation
6	Understand the Dismantle and assemble machine tools.
7	Know the recondition the parts
8	Understand the various machine tools operations

LIST OF EXPRIMENTS

1. Lathe work
 - 1.1 To Familiarization with lathes- principle parts, work holding device, measuring instruments
 - 1.2 To practice Plain turning to the given accuracy
 - 1.3 To practice Taper turning, Forming, Drilling, boring, threading, knurling etc.
 - 1.4 Test on lathe
2. Work on shaper
 - 2.1 To familiarize with the operations
 - 2.2 To practice Shaping of a rectangular block
 - 2.3 To Shaping a 'V' in a rectangular block
 - 2.4 To practice Key way cutting
3. Work on Drilling machine & Slotter
 - 3.1 To mark and drill holes
 - 3.2 To practice Boring and counter boring
 - 3.3 To practice reaming
 - 3.4 To familiarization with the various operations of slotter

Work on planner & Advanced machines

- 4.1 To Familiarisation with the various operations
- 4.2 To Planning flat surface
- 4.3 To Familiarization with the various operations of CNC Machines

REFERENCE:-

- 1. Workshop manual by P. Kannaiah &K.L. Narayana
