

COURSE TITLE : TEXTILE WET PROCESSING I -PRACTICAL
COURSE CODE : 3068
COURSE CATEGORY : B
PERIODS/WEEK : 5
PERIODS/SEMESTER : 75
CREDITS : 3

COURSE OBJECTIVE

Sl. No.	Student will be able to
1	Identification of Textile fibers
2	Identify the chemicals and pre-treatments for cotton textiles
3	Understand defects and remedies of pre-treatments
4	Know the Classification of dyes .
5	Understand the Application of water soluble colours
6	Understand the Application of water insoluble colours
7	Know the After treatments given to Direct, Sulphur and Vat dyed materials
8	Analyse the effects of different variants in dyeing
9	Know the Application of Naphthol colours

LIST OF EXPERIMENTS

1.0 IDENTIFICATION OF TEXTILE FIBERS AND PREPARATORY TREATMENTS FOR COTTON YARNS & FABRICS

- 1.1 Identification of Textile fibers by different methods
- 1.2 De-sizing of grey fabrics using dilute hydrochloric acid
- 1.2 Scour the fabric/yarn
- 1.3 Bleach the given scoured fabric/yarn using oxidizing and reducing agents such as
 - 1.3.1 Bleaching powder.
 - 1.3.2 Sodium hypochlorite
 - 1.3.3 Hydrogen peroxide

2.0 DYEING OF COTTON/ VISCOSE USING DIRECT, BASIC & REACTIVE DYES

- 2.1 Dyeing of different shades using direct dyes
- 2.2 Dyeing of different shades using basic dyes
- 2.3 Apply after treatments to direct dyed materials for
 - 2.3.1 Fastness to light
 - 2.3.2 Fastness to wash
 - 2.3.3 Fastness to light and wash
 - 2.3.4 Fastness to perspiration
 - 2.3.5** Topping with basic dyes
- 2.4 Dyeing different shades using Cold and Hot Reactive Dyes

3.0 DYEING OF SULPHUR & VAT DYES ON COTTON & VISCOSE

- 3.1 Dyeing of Cotton & Viscose with different shades using
 - 3.1.1 Sulphur dyes
 - 3.1.2 Vat dyes
 - 3.1.3** Solubilised Vat dyes
- 3.2 Apply After treatments to Sulphur dyed materials

4.0 DYEING OF COTTON WITH AZOIC COLOURS

- 4.1 Dye cotton Yarn/Fabric with different shades using various Naphthol and base combinations

LIST OF EQUIPMENTS/ MACHINES AND TOOLS

- 1. Stainless steel dye vessels
- 2. Stainless steel water baths
- 3. Heaters
- 4. Kier
- 5. 'J' Box scouring and bleaching unit- Lab model
- 6. Working tables
- 7. pH meter
- 8. Thermo meter
- 9. Projection microscope
