

COURSE TITLE : FABRIC FORMATION II-PRACTICAL
COURSE CODE : 4067
COURSE CATEGORY : B
PERIODS/WEEK : 6
PERIODS/SEMESTER : 84
CREDITS : 3

COURSE OUT COME

SI No.	Student will be able to
1	Know and Set the various loom mechanisms according to timing
2	Operate the loom, find the defects and rectify
3	Analyse the different sample cloths of compound structures
4	Select the designs and produce it in loom
5	Illustrate lattice pegging of the doobby for different designs

LIST OF EXPERIMENTS

- 1.0 Timing & Setting of Shedding, Picking & Beating
- 1.1 Study of plain tappet shedding mechanism
- 1.2 Sketch and identify various parts
- 1.3 Dismantle and assemble the parts
- 1.4 Study of cone over picking mechanism
- 1.5 Sketch and identify various parts
- 1.6 Dismantle and assemble the parts
- 1.7 Study of beating - up mechanism
- 1.8 Sketch and identify various parts
- 1.9 Dismantle and assemble the parts
- 1.10 Study the Setting for proper working
- 1.11 Verify Eccentricity of Slay
- 2.0 Setting of Let-off & Take – up Motions
- 2.1 Study of Negative Let –off motion
- 2.2 Sketch and Identify Various Parts
- 2.3 Dismantle and Assemble the Parts
- 2.4 Study the Settings for Proper Working
- 2.5 Study of seven - wheel Take – up motion
- 2.6 Sketch and Identify Various Parts
- 2.7 Dismantle and assemble the parts of take – up motion
- 2.8 Study the Setting for proper working

- 2.9 Study Dividend of Take – up motion

- 3.0 Timing & Setting of Dobby
- 3.1 Study the Working of Climax Dobby
- 3.2 Sketch and identify the parts
- 3.3 Dismantle & Assemble the Parts
- 3.4 Study of Designs for Dobby
- 3.5 Prepare the Design and Peg the Lattice suitable for RH & LH Dobby
- 3.6 Setting & Heald Leveling
- 3.7 Method of Pegging Lattice for Cross Border Dobby

- 4.0 Analysis of Compound structures, Extra Warp, Extra Weft & Net – Leno Fabrics
- 4.1 Analyse the given samples of cloth
- 4.2 Estimate Ends and Picks per unit length
- 4.3 Estimate Count of Warp and Weft
- 4.4. Identify Material of Warp and Weft
- 4.5 Determine Crimp of Warp and Weft
- 4.6 Draw Design, Draft, Lifting – plan & denting plan
- 4.7 Loom requirements to weave the Particular Design

The students should keep separate records for weaving mechanism & cloth samples and submit certified & bonafide records at the time of practical examination

LIST OF EQUIPMENTS / MACHINERIES/TOOLS

- 1. Power looms
- 2. Power loom fitted with Dobby
- 3 Climax dobby
- 4. Cross boarder dobby
- 5. Dobby Pegs & Lags
- 6. Sample cloths (Compound structures)
- 7. Spanner set, hammer, L-key set, screw driver set, box spanners, etc...
