

COURSE TITLE : TEXTILE WET PROCESSING II-PRACTICAL
COURSE CODE : 4068
COURSE CATEGORY : B
PERIODS/WEEK : 6
PERIODS/SEMESTER : 84
CREDITS : 3

COURSE OBJECTIVE:

Sub	Student will be able to
1	Apply acid and basic colours on protein fibres
2	Apply dyes on synthetic materials and blends
3	Analyse the defects in dyeing and rectify
4	Print textile materials under different styles and methods
5	Diagnose the defects in printing and rectify
6	Analyse dyestuffs and match the coloured sample cloths

LIST OF EXPERIMENTS

- 1.0 DYEING OF WOOL & SILK WITH ACID AND BASIC COLOURS
 - 1.1 Study about Acid and Basic dyes
 - 1.2 Dye the wool yarn in different shades using Acid dyes
 - 1.3 Dye the wool yarn in different shades using Basic dyes
 - 1.4 Dye the silk yarn in different shades using Acid dye
 - 1.5 Dye the silk yarn in different shades using Basic dyes
- 2.0 POLYESTER , POLYESTER COTTON BLENDS AND POLYESTER VISCOSE BLENDS DYEING
 - 2.1 Dye the polyester fabric/yarn in different shades using disperse dyes
 - 2.2 Dye the polyester cotton blend fabric//yarn using disperse dyes & Vat dyes
 - 2.3 Dye the polyester cotton blend fabric/yarn using Disperse & Reactive dyes
 - 2.4 Dye the polyester Viscose blend fabric/yarn using Disperse and Vat dyes
 - 2.5 Dye the polyester Viscose blend fabric/yarn using Disperse and Reactive dyes
 - 2.6 Study about dyeing Machines – Jigger dyeing M/c, HTHP dyeing M/c, Jet dyeing M/c
- 3.0 PRINTING
 - 3.1 Styles and Method of Printing
 - 3.2 Printing of cloth using blocks with Direct, Reactive ,Vat & Azoic dyes
 - 3.2 Printing of cloth using stencil by Brushing and Aerograph techniques with Direct & Reactive dyes
 - 3.3 Printing the cloth using screens with Pigment colours
 - 3.4 Developing the designs using Batik style in mono and multicolours

- 3.5 Developing the designs using tie and dye to produce mono and multi colours
- 3.6 Study about Rotary screen printing, CAD Printing

- 4.0 DYESTUFF ANALYSIS & COLOUR MATCHING
- 4.1 Analyze Dyestuffs & Colored materials
- 4.2 To identify the group of colours
- 4.3 Colour Matching.
- 4.4 Checking of colour fastness

LIST OF EQUIPMENTS / MACHINERIES

- 1. Stainless steel water baths
- 2. Stainless steel dye pots
- 3. Clip stenter (lab model)
- 4. Heaters
- 5. Jigger Dyeing machine(lab model)
- 6. Winch Dyeing machine (lab model)
- 7. HTHP Dyeing machine (lab model)
- 8. Flat bed screen printing machine (lab model)
- 9. Roller printing machine (lab model)
- 10. Transfer printing machine
- 11. Water mangles (lab model)
- 12. Hydro extractor
- 13. Drying machine
- 14. Damping machine
- 15. Calenders
- 16. Ager
- 17. Colour matching Software
- 18. Spectro photometer
- 19. Launderometer
- 20. Perspirometer
- 21. Padding mangle
- 22. Crock meter
- 23. pH meter
- 24. Thermometer
