

COURSE TITLE : TEXTILE TESTING & QUALITY ASSURANCE-I PRACTICAL
COURSE CODE : 5068
COURSE CATEGORY : A
PERIODS/WEEK : 4
PERIODS/SEMESTER : 52
CREDITS : 2

COURSE OUTCOME

Sl. No.	Student will be able to
1	Practice to determine RH of the atmosphere
2	Understand to measure moisture content and regain of textile materials
3	Know the microscopical appearance of important textile fibers
4	Understand the fiber length test
5	Know the fineness and maturity of cotton fiber
6	Understand the fiber strength measurement
7	Understand the determination of trash content in cotton
8	Know the estimation of fiber properties by advanced testing instruments

LIST OF EXPERIMENTS

1. Relative humidity test by sling hygrometer
2. Estimation of moisture content and regain by conditioning oven
3. Determination of regain by electronic moisture meter
4. Identify the appearance of important textile fiber by microscope
5. Cotton fiber length test by bear sorter
6. Cotton fiber length test by digital fibro graph
7. Cotton fiber fineness test by Micronaire instrument
8. Cotton fiber fineness test by ATIRA fiber fineness tester
9. Fiber bundle strength test by Stelometer
10. Cotton fiber maturity test by caustic soda swelling method
11. Estimation of trash in cotton by trash analyzer
12. Cotton fiber properties test by AFIS
13. Cotton fiber properties test by HVI

INSTRUMENTS, EQUIPMENTS & TOOLS

Sling Hygrometer

Conditioning oven

Electronic moisture meter

Microscope

Baer sorter

Digital fibro graph

Micronaire instrument

ATIRA fiber fineness tester

Stelometer

Projection microscope

Trash analyzer

AFIS

HVI
