

COURSE TITLE : YARN FORMATION III-PRACTICAL
COURSE CODE : 5069
COURSE CATEGORY : A
PERIODS/WEEK : 4
PERIODS/SEMESTER : 52
CREDITS : 2

COURSE OBJECTIVE

Sl.No.	Student will be able to
1	Draw the gearing diagram of the ring frame and determine draft constant and twist constant
2	Arrange the tape for Z and S twist yarn. Thread the roving and piecing of broken end
3	Determine the causes of defects in yarn and rectify
4	Determine the speed, draft, twist, production, efficiency of ring frame
5	Gauge the spindle, change the traveller, identify the parts of the ring frame
6	Perform doffing and restart the frame
7	Determine the speed, production and efficiency of ring doubler
8	Estimate Production and efficiency of reeling.

LIST OF EXPERIMENTS

1. Draw the gearing diagram of the ring frame
2. Ring frame Spindle gauging and arranging the tapes for Z & S twist
 3. Setting of drafting rollers the staple in process
 4. Draw the gearing diagram of the ring frame
 5. Calculate the break draft and main draft constants in ring frame
 6. Calculate the draft wheel required for the count in process
 7. Calculate Twist constant of ring frame
 8. Calculate the twist wheel required
 9. Change draft and twist wheel
 10. Practice threading of roving
 11. Practice Piecing of yarn
 12. Practice Changing of traveller
 13. Calculate production and efficiency of the ring frame
 14. Practice doffing operations and restart the machine after doffing
 15. Calculate the production and efficiency of rotor spinning frame
 16. Draw the gearing diagram of ring doubler
 17. Calculate the twist constant
 18. Change the twist wheel for different counts of yarn
 19. Calculate production and efficiency of Two for one twister

20. Practice reeling, doffing and knotting

MACHINERIES, TOOLS AND EQUIPMENTS

1. Ring frame
2. Ring doubler
3. Reeling machine
4. Two for one twister
5. Spanner set
6. Screw drivers
7. Leaf gauges
8. Spindle gauges
9. Hammer set
10. Wheel puller
