

COURSE TITLE : FASHION DESIGN & APPAREL MANUFACTURE
COURSE CODE : 6061
COURSE CATEGORY : A
PERIODS/ WEEK : 5
PERIODS/ SEMESTER : 75
CREDIT : 5

TIME SCHEDULE

Module	Topics	Period
1	Classification of Garments, Patterning and grading	20
2	Spreading, Cutting, and Sewing	19
3	Fusing, Pressing , Packing & quality control	20
4	Fashion Designing and Product Development	16
TOTAL		75

COURSE OUTCOME

Module	Go	Student will be able to
1	1	Understand classification of garments
	2	Know the patterning & grading of garments
2	1	Understand the spreading techniques involved in garment production
	2	Know the cutting process in the garment industry
	3	Understand the sewing operations
3	1	Understand the fusing operation in the garment industry
	2	Know the pressing & packing processes
	3	Understand the quality inspection of garments
4	1	Understand various fashion designing techniques
	2	Know the various product developments in garment industry

SPECIFIC OUTCOME

MODULE I CLASIFICATION OF GARMENTS, PATTERNING AND GRADING

1.0.0 Understand classification of garments

- 1.0.1 Describe the classification of Garments for Men, Women & Children
- 1.0.2 Explain how the Fabric selection for garments based on fabric properties
- 1.0.3 Describe the theory of Human anatomy – Eight head theory
- 1.1.4 Illustrate Measurement and its importance

1.2.0 Know the patterning & grading of garments.

- 1.2.1 State the Importance of paper pattern & types of paper patterns

- 1.2.2 Explain the Principles of pattern drafting
- 1.2.3 Describe Pattern grading
- 1.2.4 Illustrate pattern making for top and bottom garments
- 1.2.5 Describe grading of various components of garments
- 1.2.6 Describe marker planning
- 1.2.7 Design & Drafting pattern for gents shirts & ladies skirts

MODULE II SPREADING, CUTTING, AND SEWING

2.1.0 Understand the spreading techniques involved in garment production

- 2.1.1 State objectives of Spreading
- 2.1.2 List the methods of spreading
- 2.1.3 Identify different types of woven fabrics
- 2.1.4 Describe different types of lay
- 2.1.5 Describe rules in pattern lay out & methods of pattern lay out
- 2.1.6 Explain various methods of fabric lay out
- 2.1.7 State Importance of Marshden lay out and lay length

2.2.0 Know the cutting process in the garment industry

- 2.2.1 List the Tools required for clothing construction
- 2.2.2 Types of cutting machines
- 2.2.3 Illustrate Straight knife cutting machine
- 2.2.4 Describe round knife cutting machine
- 2.2.5 Illustrate band knife cutting machine
- 2.2.6 Describe Die cutters

2.3.0 Understand the sewing operations

- 2.3.1 Define stitches & list the classifications.
- 2.3.2 Define seams & list the types of seams.
- 2.3.3 Explain the working sewing machine with parts
- 2.3.4 Identify various types of sewing machines
- 2.3.5 State the Importance trimmings
- 2.3.6 Selection of needles & threads for different garments

MODULE III FUSING, PRESSING , PACKING AND GARMENT INSPECTION

3.1.0 Understand the fusing operation in the garment industry

- 3.1.1 State the objectives of fusing
- 3.1.2 Describe the methods of fusing
- 3.1.3 Definition of fusible interlining
- 3.1.4 Identify the factors affecting fusing quality

3.2.0 Know the pressing & packing processes

- 3.2.1 State the objectives of pressing
- 3.2.2 List the types of pressing
- 3.2.3 Illustrate the machines for pressing
- 3.2.4 Identify the types of packing and packing materials

3.3.0 Understand the quality inspection of garments

- 3.3.1 Illustrate the inspection of raw material & fabrics
- 3.3.2 List the various fabrics inspection system
- 3.3.3 Find the defects of woven, knitted & printed fabrics
- 3.3.4 Give example of measurement verification

MODULE IV FASHION DESIGNING AND PRODUCT DEVELOPMENT

4.1.0 Understand various fashion designing techniques

- 4.1.1 Definition of design
- 4.1.2 State the requirements of design
- 4.1.3 Define Harmony
- 4.1.4 List the aspects of harmony
- 4.1.5 Illustrate repetition & shape
- 4.1.6 Define proportion
- 4.1.7 Describe aspects of proportion and space relationship
- 4.1.8 Define Rhythms & emphasis

4.2.0 Know the various product developments in garment industry

- 4.2.1 State Social psychology of clothing design
- 4.2.2 Explain the structural and decorative designs
- 4.2.3 Identify the customer requirements of clothing
- 4.2.4 Compare Fashion garments and basic garments
- 4.2.5 Define the Designing and Quality control
- 4.2.6 Illustrate Product development, Process development, Product performance and specification
- 4.2.7 Explain balance between aesthetic performance and price factors

CONTENT DETAILS

MODULE – I CLASSIFICATION OF GARMENTS, PATTERNING AND GRADING

Classify garments for men, women and children – selection of fabrics for various garments -Theory of Human Anatomy - measurements and importance of measurements – body measurements for children, ladies and gents garments - Importance of paper patterns – types of paper patterns - Importance and principles of pattern drafting - pattern grading - Study of pattern making for various types of top and bottom garments - Grading of various components of garments - Study of marker planning -draft pattern for gents shirts – draft pattern for ladies skirts

MODULE – II SPREADING, CUTTING AND SEWING

Objects of spreading - methods for spreading -various types of woven fabrics - types of lay -pattern lay out - Rules in pattern layout - methods for layout - layout for asymmetrical designs - Economy of fabric in placing pattern - Rules for placement of pattern if the fabrics insufficient - importance of 'Marshden' layout, 'Marshden' lay and lay length – cutting process - types of cutting machines and die cutters - tools required for clothing construction -types of stitches and classification of stitches - Seams and different

types of seams - types of sewing machines - button hole, buttoning -Importance of trimmings- Selection of needles and threads for different types of garments - individual and group production systems.

MODULE – III FUSING, PRESSING AND PACKING

Object of fusing - Fusing – base cloth and resin coating system - Effect of temperature time and pressure in fusing - Effect of pressing and various types of pressing - Machinery used for pressing - controls in pressing – material handling systems – packing- various type of packing system- materials used for packing- various types of packing - Labels and tags-inspection of raw material –various fabric inspection system-4 point system-10 point system-fabric defects in woven & knitted fabric-acceptable quality level-type of inspection –garment defect

MODULE – IV FASHION DESIGNING AND PRODUCT DEVELOPMENT

Define design - Requirement of design –Elements of design – Principles of design-structural and decorative design - application of structural and decorative design in dresses - create variety through structural and decorative design - Define harmony - aspects of harmony – Define proportion - Aspects of proportion and space relationship - Define rhythm - Define emphasis - balance in dress design – social psychology of clothing - customers requirement of clothing - Designing and quality control -Fashion garments Vs Basic garments- Concept of technological environment of product development - Importance of process and product development - product performance and importance of specifications - Balance between aesthetic, performance and price factors
