

COURSE TITLE : MOULDS AND DIES DRAWING
COURSE CODE : 5119
SEMESTER : 5
COURSE CATEGORY : P
PERIODS/WEEK : 4
PERIODS/SEMESTER : 60
CREDIT : 3

TIME SCHEDULE

MODULE	TOPICS	PERIODS
1	Single cavity hand injection mould. Two cavity injection mould.	15
2	Four cavity injection mould. Two cavity injection mould with side core.	15
3	Three plate injection mould with four cavity. Single cavity compression mould.	15
4	Two cavity plunger transfer mould Simple single cavity die casting – dies.	15
	Total	60

COURSE OUT COMES

After the course students shall be able to:

1. Understand single cavity injection mould drawing.
2. Understand the drawing of Two cavity, Four cavity Injection mould.
3. know the drawing of Three plate Four cavity Injection mould.

SPECIFIC OUTCOMES.

MODULE 1.

1.1.0 Understand moulds and dies drawing.

- 1.1.1 Draw hand injection mould-single cavity-sprue gate-plate injection.
- 1.1.2 Create views of two cavity injection mould-edge gate-ejection with pin-detail drawing.

MODULE II.

- 2.1.1 Draw four- cavity injection mould-submarine gate, sleeve ejection.
- 2.1.2 Draw two-cavity injection mould-side core-detailed drawing.

MODULE III

- 3.1.1 Create drawings of three plate four cavity injection mould.
- 3.1.2 Design Compression mould – single cavity.

MODULE IV.

- 4.1.1 Draw sectional views of plunger transfer mould-two cavities-detailed drawing.
- 4.1.2 Create assembled views of die casting dies-simple- single cavity-cold chamber type.

REFERENCE BOOKS:

- 1. Tool design - C.B.Cole
- 2. Fundamentals of tool design - ASTM
- 3. Tool design - Donaldson
- 4. Machine drawing - P.I. Vargheese.
- 5. Die design fundamentals - Paquin
- 6. Basic Die making - Ostergarrd
