

TED (21) - 3184

Reg.No.

REVISION: 2021

Name:.....

**DIPLOMA EXAMINATION IN ENGINEERING /TECHNOLOGY/ MANAGEMENT/
COMMERCIAL PRACTICE.**

WORKING DRAWING –I

[Note: - Two numbers of drawing sheets to be provided.]

Time: 3 hours

Maximum Marks: 75

PART A

I. Answer all the following questions in one word or sentence. (9x1=9 Marks)

		Module outcome	Cognitive level
1	Differentiate between ties and spiral reinforcement.	M1.01	U
2	Define raft foundation.	M1.02	R
3	What is meant by pile shoe?	M1.03	R
4	Define transverse reinforcement.	M1.01	R
5	Differentiate between king closer and queen closer.	M2.01	U
6	Differentiate between baluster and balustrade in a stair	M3.01	U
7	Define rebate in a door/window.	M4.01	R
8	Differentiate between transom and mullion	M4.01	U
9	What is meant by Pratt truss?	M4.04	R

PART B

II. Answer any four questions from the following. (4 x 6 = 24 Marks)

1	Draw to a suitable scale, the plan of a typical raft foundation for a single room building having size, 400cm x 600 cm.	M1.02	A
2	Draw to a suitable scale, the plan of two consecutive courses of one and half brick thick corner wall in Flemish bond.	M2.01	A
3	Draw plan and elevation of a typical bifurcated stair.	M3.01	A
4	Draw to a suitable scale, the plan of a double shuttered paneled	M4.01	A

	door of size,100cmx 210cm.		
5	Draw elevation of a typical three shuttered glazed window of size 150cm x 150cm and mark the parts. Show all dimensions.	M4.03	A

PART C

III. **Answer all questions from the following.**

(6 x 7 = 42 Marks)

1	Draw to a suitable scale, the plan and section of a typical circular pile of diameter 30cm. The reinforcement details:- Main reinforcement:- 25mm dia bars ,6 nos Spiral reinforcement 8mm dia OR	M1.03	A
2	Draw to a suitable scale, the plan showing layout for following pile groups. a.4 piles and b.5 piles Show arrangement of piles, pile cap and pedestal	M1.04	A
3	Draw to a suitable scale, the plan of two consecutive courses for the cross walls in English bond: 20cm with 20cm. OR	M2.02	A
4	Draw to a suitable scale, the plan of two consecutive courses for the cross walls in Flemish bond : 20cm with 20cm.	M2.01	A
5	Draw plan and elevation of a typical spiral stair. Floor to floor height is 220cm. OR	M3.01	A
6	Draw to a suitable scale, the plan and elevation of a typical circular stair. Floor to floor height is 300cm.	M3.01	A

7	Draw to a suitable scale, the sectional elevation of a wooden stair having following details. Stair room size= 420cm X 240cm. Floor to floor height = 330cm. Assume missing data. OR	M3.03	A
8	Draw to a suitable scale, the sectional elevation of a dog legged R.C.C. stair having following details. Stair room size= 360cm X 180 cm. Floor to floor height = 300cm. Assume missing data.		
		M3.02	A
9	Draw to a suitable scale, the elevation of a half glazed and paneled door of size 100 cm x 20cm and mark the parts. Show all dimensions. OR	M4.02	A
10	Draw to a suitable scale, the vertical sectional elevation of a glazed window of size 150 cm X 150 cm	M4.03	A
11	Draw to a suitable scale, the elevation of a typical tubular steel truss of 12.00 m span. Supporting wall is 30cm thick. OR	M4.04	A
12	Draw to a suitable scale, the elevation of a typical angular steel truss of 12.00 m span. Supporting wall is 30cm thick.	M4.04	A
