

MODEL QUESTION PAPER

Green Building and Energy Conservation

Time: 3 Hour

Max. Marks: 75

Part A

I. Answer **all** questions in one word or one sentence.

1. Site selection for a green building means
 - a) Maximize open space
 - b) Design with a minimal footprint
 - c) Protect biodiversity
 - d) all of the above
2. Indoor air quality can be maintained by
 - a) Using good HVAC system
 - b) Use non -toxic paints
 - c) Dust free interior
 - e) All of the above
3. Full form of EIA
4. Find the odd one out
 - a) Coal
 - b) Petroleum
 - c) Biogas
 - d) Natural gas
5. IGBC stands for
6. Name one green rating system in India
7. List any two green building materials
8. Environmental design (ED) strategies involves
 - a) Storm water Management
 - b) Indigenous Landscaping
 - c) Green Building Materials and Finishes
 - d) all of the above
9. MNRE deals with

1*9 =9 marks

PART B

II. Answer any **eight** questions from the following, each question carries 3 marks.

1. Define green building
2. Write about passive heating technique
3. Define energy audit

4. Compare Solar Energy and Wind Energy in energy conservation aspect
5. Explain role of IGBC in green rating system
6. Explain functions of Government organization working for Energy conservation and Audit
7. Reuse of waste material can make green building materials. Explain with example
8. Define renewable energy
9. Write the role of NPC in green rating system
10. Explain principles of green building

3*8 = 24 marks

PART C

Answer **ALL** questions. Each question carries 7 marks.

iii. Describe features of green building

OR

iv. Use of materials and construction techniques plays an important role in bringing out an efficient green building. Elaborate

v. Any projects involved with environment needs a prior study about the impact and clearance for the project. Explain

OR

vi. Describe the methods by which energy conservation can be done

VII. Write necessity of energy conservation

OR

VIII. Describe the Energy Management Programs in India

IX. Explain the criteria for LEED India Rating System

OR

X. Explain criteria for GRIHA green rating system

XI Green rating system measures the efficiency of a building construction from planning level itself. Explain

OR

XII. Elaborate the functions of Government organization regarding Energy conservation and Audit

XIII. Explain the Environmental design strategies for building construction to improve environmental quality of buildings

OR

XIV Materials and products play an important role in the efficiency of a Green building. Explain

7*6 = 42 marks
