

MODEL QUESTION PAPER**Farm Machinery and Construction Equipment**

Time: 3 hours

Max. Marks. 75

Part AI. Answer **all** questions in one word or one sentence.

1. P.T.O stands for
2. Wheel tractors have higher speed than Crawler tractors. True or False
3. The tillage operation on rice paddies while flooded is known as
4. Which classification of tillage involves initial major soil working operation?
5. Which one of the following is not a secondary tillage tool?
(a) Disc Plough (b) Disc harrow (c) Mould Board (4) none of these
6. Scraper is used for
(a) Scraping of soils (b) Excavation only
(c) Excavation, transporting and dumping of soil (d) None of these.
7. is a self -propelled hauling equipment
8. type roller is used for compacting clay soil
9. Number of axles in a typical grader is

PART BII. Answer any **eight** questions from the following, Each question carries 3 marks.

1. List the applications of P.T.O shafts
2. List any three farming implements
3. Classify the secondary tillage equipment employed in tractor
4. Write a short note on primary tillage equipment
5. What is rotary tiller
6. Discuss the use of cage wheels
7. Name any 3 types of loader buckets
8. Write a short note on motor grader
9. Construct a general layout of crane
10. List the applications of excavator

3*8 = 24 marks

PART C

Answer **ALL** questions. Each question carries 7 marks.

III. Construct the layout of power train and transmission of a tractor

OR

IV. Outline the process of depth and draft control system in tractor

V. Identify any four farm machinery and comment their applications

OR

VI. Identify any four tractors and comment their applications

VII. Explain mould board plough with a neat sketch

OR

VIII. Illustrate the working of rotary tiller with suitable sketch

IX. Illustrate the operation of bulldozer with a neat sketch

OR

X. Outline the methods of loading and unloading operations

XI. With suitable sketch explain the working principle of front end loader

OR

XII. List any four Earth moving machinery and discuss their applications

XIII. Construct the layout of grader and illustrate its operation

OR

XIV. Explain the tipping mechanism employed in Tippers
