

MODEL QUESTION PAPER
MARKETING MANAGEMENT - SET I

(Maximum marks: 75)

(Time: 3 hours)

PART A

I. Answer all questions in one word or one sentence. Each question carries one mark.

(9 x 1 = 9 marks)

1	Social and managerial process of exchanging products and services in terms of money is called	M 1.01	R
2	Product, price, physical distribution and promotion are the elements in	M 1.03	R
3	Income and occupation comes under factor influence consumer buying process.	M 2.01	U
4	The first step in the buying process is.....	M 2.02	U
5	The difference between brand name and trade name is that	M 3.06	R
6	Newspaper is an example fortype of consumer product.	M 3.01	R
7	Marketing the same product irrespective of regional or other differences is known as	M 3.03	U
8	Durability of advertisements inmedia is higher than electronic media.	M 4.05	U
9	intermediary stands between consumer and wholesaler.	M 4.02	U

PART B

II Answer any eight questions from the following. Each question carries 3 marks

(8 x 3 = 24marks)

1	Memorise any three functions of marketing.	M 1.01	R
2	List out the buying roles.	M 2.02	U
3	State the needs for market segmentation.	M 2.03	R
4	Explain the types of consumerproducts.	M 3.01	R
5	Identify the need of conducting market tests.	M 3.05	U
6	State the concept of Product Life Cycle.	M 3.04	U
7	Illustrate Geographic market segmentation with two examples.	M 2.04	A
8	Discuss the functions of advertising.	M 4.04	R
9	Name any two types of packaging and illustrate with one example.	M 3.09	A
10	Summarise anythree functions of distribution channels.	M 4.01	R

PART C

Answer all questions. Each question carries seven marks

(6x7=42 marks)

III	Describe the external marketing environment. OR	M 1.04	U
IV	Differentiate Telemarketing and E marketing.	M 1.06	U
V	Describe any two factors influence consumer buying behavior. OR	M2.01	A

6	Retailer	IV
7		9X1=9
	Part B	
8	Exchange functions , Physical Distribution functions, Facilitating functions	I
9	Initiator, influencer, decider, buyer ,user , disposer	

II	Market segmentation makes it easier for marketers to reach their potential buyers. . 1 marketers can be more efficient with their time, money, and other resources . 2 3 Market segmentation also reduces the risk of an unsuccessful or ineffective marketing campaign. Marketers can effectively promote products to the market segment . It is possible for marketers to make adjustments in the products and communication to suit the needs of market segment. Convenience ,shopping goods, specialty goods ,unsought goods The market testing is a tool used by the companies to check the viability of their new product or a marketing campaign before it is being launched in the market on a large scale. It helps in understanding the demand and acceptance for a product by consumers and reduce risk on investment. 4 5 Like human beings, products also have a life-cycle and they pass through different stages in their life-cycle. These stages in the life of a product are collectively known as product life-cycle. PLC - stages – introduction ,growth, maturity and decline 6 Geographic segmentation: A company may divide the market into different geographical areas such as nations, regions, states, cities, urban/rural areas, or neighbourhoods and then decides to operate in one or few geographical areas, or to operate in all areas, but pay attention to geographical differences in consumer needs and wants. 7 Identifying Brands and Products , Providing Information to Consumers Persuading Consumers to Purchase Generating Product Demand Building Customer loyalty 8 Family packaging ,re use packaging , multiple packaging <u>Family packaging</u> – Family packaging means that all the products under a brand have similar type of visual packaging so that it's easy for consumers to recognize the products and judge the quality based on previous experience of the brand. <u>Reuse packaging</u> – Packaging that could	II II III III III II IV III
----	--	---

	Psychological factors – motivation , leadership ,perception etc.	
IV	Explanation of Initiator, influencer, decider, buyer ,user , disposer	
	Initiator : The person who suggests or take initiative for the purchase. The person who first recognise the need.	I
V	Influencer : The person who provide information and advice and thus influence the purchase. The housewife tells her family about the new home appliance and her favorable description about it influences her husband and children.	II
	Decider : The person who has the power to decide whether or not to buy a product or service. The husband and wife may jointly decide about the purchase of a new refrigerator.	II
VI	Buyer : The person who actually buy a particular product or service. A housewife may be the person who actually buys all the foodstuffs, and toiletries, which are consumed by all the family members.	II
	User : The person who use or consume a particular product or service. All family members may use the car, watch the television, and listen to the stereo music system .	II
	Disposers : The person who carry out the disposal or discontinuation of a particular product or service.	
	i)It helps in product identification and gives ‘distinctiveness’ to a product. (ii) Indirectly it denotes the quality or standard of a product. (iii) It eliminates imitation of the product. (iv) It ensures legal rights of the product. (v) It helps in advertising and packaging activities. (vi) It helps to create and sustain brand loyalty to a particular product. (vii) It helps in price differentiation of products. (viii) It helps to identify the manufacturer of the product.	
	Explain with examples -Convenience ,shopping goods, specialty goods ,unsought goods	
VII	<u>Convenience goods</u> -These are the products the consumers want to purchase frequently, immediately, and with minimum effort. Milk, bread, butter, eggs, soap, newspaper, biscuits, tooth pastes, etc., are some examples of convenience goods. <u>Shopping goods</u> -Items which the consumers select & buy after making comparisons of substitutes based on quality, price/ style etc -jewellery,	III

VIII	furniture, appliances, shoes, etc. <u>Specialty goods-</u> A class of consumer goods with perceived unique characteristics, such that consumers are willing to spend special effort to buy them, are known as specialty goods. Examples of some of the specialty goods are photographic equipments, TV sets, video players, mobile phones, automobiles, etc. <u>Unsought goods-</u> Goods that the consumer does not know about / does not normally think of buying. Products that a customer purchases when he is faced with a sudden trouble Prospecting , Pre approach, Approach, Presentation and demonstration, Overcoming objections, Closing the sale , Follow up. Prospecting: The effort to develop a list of potential customers is known as prospecting. Sales people can find potential buyers, names in company records, customer information requests from advertisements, telephone and trade association directories, current and previous customers, friends, and newspapers. 2. Pre approach : Before approaching the potential buyer, the sales person should know as much as possible about the person or company. 3. Approach: During the approach, which starts communication process, the sales person explains to the potential customer the reason for the sales, possibly mentions how the potential buyer's name was obtained, and gives a preliminary explanation of what he or she is offering. The sales presentation is a detailed effort to bring the buyer's needs together with the product or service the sales person represents.	III
IX	4. Presentation and demonstration: During product demonstration, the sales person explain the features and benefits of the product/ service .He would try to convince the customer. A planned presentation would save the time of customer and sales person. 5. Overcoming objections: The primary value of personal selling lies in the sales person's ability to receive and deal with potential customers' objections to purchasing the product. In a sales presentation many objections can be dealt with immediately. These may take more time, but still may be overcome. 6. Closing the sale: Many sales people lose sales simply because they never asked the buyer to buy. At several times in a presentation the sales person may have to watch how near the buyer is to order the product. 7. Follow up: To maintain customer satisfaction, the sales person should follow up after a sale to be certain that the product is delivered properly and the customer is satisfied with the result. Coupons ,Free Samples ,Price-Off Offer,Free Gifts/ Free Service ,Competitions or Contests,Premiums ,Rebate/ cash refund offer PLC -picture Explanation of stages – introduction ,growth, maturity and decline	IV

		
X		
XI	Explanation of Family packaging ,re use packaging , multiple packaging	IV
	<u>Family packaging</u> – Family packaging means that all the products under a brand have similar type of visual packaging so that it's easy for consumers to recognize the products and judge the quality based on previous experience of the brand. A package of a particular manufacturer, packed in an identical manner is known as family packaging. The shape and colour, the materials used for packaging will be similar for all the products in family packaging. In such cases ,packaging methods, material used for packaging ,the appearance etc. will be one and the same for all the products of a manufacturer.	III
XII	<u>Reuse packaging</u> – Packaging that could be used for some other purposes by the consumers after the packed goods have been consumed is known as re-use packaging. This aspect increases the sales value of the product considerably. Packages like bottles, containers, cardboard boxes, tins etc. can be used further after the products are consumed. <u>Multiple packaging</u> – It is the practice of placing several units in one container. This helps to introduce new products and increase sales. Eg. Baby kit, tool boxes , make up box etc. Explanation of Zero level ,one level, two level and three level channels. <u>Zero level channel or Direct marketing channel</u>:- Here the goods move directly from producer to consumer. That is, no intermediary is involved. This channel is preferred by manufacturers of industrial and consumer durable goods. The methods for doing direct marketing are ,door-to door sales, mail order catalogue/ email marketing , telemarketing. <u>One level channel</u>: Manufacturer-Retailer-Consumer (One Level	III

XIII	Channel): This channel involves the use of one middleman i.e. retailer who in turn sells them to the ultimate customers. <u>Two level channel: Manufacturer-Wholesaler-Retailer-Customer</u> .Under this channel, wholesaler and retailer act as a link between the manufacturer and the customer. This is the most commonly used channel for distributing goods like soap, rice, wheat, clothes etc. <u>Three level channel:Manufacturer-Agent-Wholesaler-Retailer-Consumer (Three level channels):</u> This level comprises of three middlemen i.e. agent, wholesaler and the retailer. The manufacturers supply the goods to their agents who in turn supply them to wholesalers and retailers. This level is usually used when a manufacturer deal in limited products and yet wants to cover a wide market.	IV
XIV	Brief explanation of print, electronic, outdoor and transit media. Print Media – Newspapers, Magazines, Trade Journal and Periodicals. Broadcast Media – Radio, T.V., Film, Screen Slides, Internet Transit Advertising – Railways, Buses, Aeroplanes, Trams, Taxis, Auto Rickshaws, Cars. Out-Door Advertising – Posters, Hoardings, Sky advertising, Other Forms – Window displays, point of purchase, Advertising specialities such as calendars, diaries, pen-stands, ball-pens Key-rings etc.	IV 6X7=42

MODEL QUESTION PAPER

MARKETING MANAGEMENT - SET II

(Maximum marks: 75)

(Time: 3 hours)

PART A

I. Answer all questions in one word or one sentence. Each question carries one mark.

(9 x 1 = 9 marks)

1	Product, price, physical distribution and promotion are the elements in	M 1.03	R
---	---	--------	---

2	Society is environment of marketing.	M 1.04	U
3	Income and occupation comes under factor influence consumer buying process.	M 2.01	U
4	The first step in the buying process is.....	M 2.02	U
5	Segmenting the market on the basis of age and income is known as	M 2.05	A

8	Part B	
9	Direct marketing involves engaging with customers directly. Emails, online adverts, flyers, database marketing, promotional letters, newspapers, outdoor advertising, phone text messaging, magazine adverts, coupons, phone calls, postcards, websites, and catalog distribution are some examples of direct marketing strategies.	I
II	Indirect marketing involves newsletters, blogs, social media account promotion and similar other activities that don't physically sell anything. These allow a business to build customer loyalty and trust and also build a rapport with potential buyers .	
1		
	Brief explanation of Exchange functions , Physical Distribution functions, and Facilitating functions.	I
2	Initiator : The person who suggests or take initiative for the purchase. The person who first recognise the need.	
	Influencer: The person who provide information and advice and thus influence the purchase. The housewife tells her family about the new home appliance and her favorable description about it influences her husband and children.	II
3	Decider: The person who has the power to decide whether or not to buy a product or service. The husband and wife may jointly decide about the purchase of a new refrigerator.	
	Buyer: The person who actually buy a particular product or service. A housewife may be the person who actually buys all the foodstuffs, and toiletries, which are consumed by all the family members.	
	User: The person who use or consume a particular product or service. All family members may use the car, watch the television, and listen to the stereo music system .	
	Disposers: The person who carry out the disposal or discontinuation of a particular product or service.	
	Undifferentiated marketing , also called mass marketing, is a strategy that	

4	markets one product for an entire market. It helps businesses reach more people at a lower cost and improves brand recognition. Differentiated marketing is a strategy that involves a company creating marketing campaigns for two or more market segments. It helps companies improve brand recognition, reach a wider audience, meet customers' needs, and increase revenue. <u>product mix</u> The total no. of products that a particular seller offers for sale to consumer called product mix of the company. A collection of products marketed by firm. <u>Product line</u> A group of products that are closely related each other as they function in a similar manner and are sold to the same consumer groups, marketed through the same strategy is called product line. Demand, Competition, Buyers, Suppliers, Economic Conditions, Government Regulations, Cost of the Product.	III
5		
6	<u>Family packaging</u> – Family packaging means that all the products under a brand have similar type of visual packaging so that it's easy for consumers to recognize the products and judge the quality based on previous experience of the brand. <u>Reuse packaging</u> – Packaging that could be used for some other purposes by the consumers after the packed goods have been consumed is known as re-use packaging.	III
7	<u>Multiple packaging</u> – It is the practice of placing several units in one container. This helps to introduce new products and increase sales. Eg. Baby kit, tool boxes, make up box etc. Sorting and Allocation, Sharing Risks, Taking Title of the goods, Logistics and Physical Distribution, Product Promotion, Negotiation, Financing, Provide information Like human beings, products also have a life-cycle and they pass through different stages in their life-cycle. These stages in the life of a product are collectively known as product life-cycle. The product life-cycle is an important tool for marketers. Each	IV

8	stage of PLC requires different type of marketing strategies . So the marketer should know exactly in which stage of the life cycle , their product exist .The length of the cycle and the duration of each stage may vary from product-to-product The PLC has four stages : - introduction, growth, maturity and decline. Explanation of , Publications, Events, News, Speeches, Public-Service Activities etc.	III
9	Part C Company itself – The functional departments such as finance, marketing ,manufacturing, human resource etc. top management, employees, company environment, trade unions etc. Suppliers – They provide the resources needed to produce goods and services to the organisation. Marketing intermediaries – They help the company to promote, sell, and distribute its goods to final buyers . Customers – The buyers who purchase company’s goods and services. Competitors - Those who market similar products and services against whom a company must gain strategic advantage.	IV
10	Publics - Any groups that have an interest in a company’s ability to achieve its objectives.	I
III	Functions of Marketing Marketing is responsible for the performance of 8 universal functions: buying, selling, transporting, storing, standardizing and grading, financing, risk taking and securing marketing information. Some functions are performed by manufacturers, others by marketing intermediaries like wholesalers and retailers. Buying and selling, the first two functions represent exchange functions. Transporting and storing are physical distribution functions. The final four marketing functions – standardizing and grading, financing, risk taking and securing market information – are often called facilitating functions because they assist the marketer in performing the exchange and physical distribution functions. 1. Exchange functions 2. Physical Distribution functions 3. Facilitating functions	

IV	<u>Geographic segmentation:</u> A company may divide the market into different geographical areas such as nations, regions, states, cities, urban/rural areas, or neighbourhoods and then decides to operate in one or few geographical areas, or to operate in all areas, but pay attention to geographical differences in consumer needs and wants. The basic reason of using geographic base for segmentation is that people who live in the same area share some similar needs and wants that these needs and wants differ from those people living in other areas.	I
V	<u>Demographic segmentation :</u> Market is divided into groups on the basis of variables such as gender, age, income, family size, occupation, education, religion, etc. It is the most popular basis for distinguishing customer groups. Demographic variables are easy to measure. The various demographic variables are: Gender: Age & lifecycle, Income, Occupation . <u>Psychographic segmentation:</u> Creating market segments based on psychological characteristics .Buyers are divided into different groups on the basis of psychological characteristics as.;Lifestyle, Personality, Social class ,Opinions, Attitudes, Interests, Hobbies. <u>Behavioural segmentation</u> Buyers are divided into groups on the basis of their usage or response to a product. The variables used for behavioural segmentation are, Occasions , Benefits, User status, Usage rate, Loyalty status. <u>Age and Life Cycle Stages:</u> A man passes through various stages of his life cycle, such as infant, child, teenager, young, adult, and old. Need and preference vary as one passes through different stages of life <u>Occupation</u> : The occupation of a person has significant impact on his	II

VII	customer information requests from advertisements, telephone and trade association directories, current and previous customers, friends, and newspapers. 2. Pre approach : Before approaching the potential buyer, the sales person should know as much as possible about the person or company. 3. Approach: During the approach, which starts communication process, the sales person explains to the potential customer the reason for the sales, possibly mentions how the potential buyer's name was obtained, and gives a preliminary explanation of what he or she is offering. The sales presentation is a detailed effort to bring the buyer's needs together with the product or service the sales person represents. 4. Presentation and demonstration: During product demonstration, the sales person explain the features and benefits of the product/ service .He would try to convince the customer. A planned presentation would save the time of customer and sales person. 5. Overcoming objections: The primary value of personal selling lies in the sales person's ability to receive and deal with potential customers' objections to purchasing the product. In a sales presentation many objections can be dealt with immediately. These may take more time, but still may be overcome.	III
VIII	6. Closing the sale: Many sales people lose sales simply because they never asked the buyer to buy. At several times in a presentation the sales person may have to watch how near the buyer is to order the product. 7. Follow up: To maintain customer satisfaction, the sales person should follow up after a sale to be certain that the product is delivered properly and the customer is satisfied with the result.	IV
IX	Publications: Publications are widely practiced tools for developing public relations. Publications include publishing the annual reports, brochures, articles, company's newsletters, pamphlets and magazines, diaries, calendars, and audio-visual materials such as films, slides-and-sounds, video and audio CDs. These all publications reach the shareholders, general public, employees, customers, traders, etc., and can create a good image. Events: A company may highlight certain attractive events for developing public relations. It can draw public attention toward new products, other activities, and achievements by arranging special events. News:	

X	Many times, public relations professionals prepare favourable and interesting news stories about the company – its activities, products, employees, achievements, and so on. Though news generation requires a great deal of skills, knowledge, and experience. Speeches: Speeches are also widely used for public relations. Key position holders such as managing director, general manager, or outside experts deliver speeches on the company's products, policies, its outstanding achievements, etc., before a large audience to get popularity among various masses. Public-Service Activities: This tool includes various activities directed for the public welfare or interest. The firm can improve its goodwill by contributing money, time, and efforts to support community affairs where its offices and plant are located. Identifying Brands and Products Products, services and ideas are sold through businesses that are differentiated by their brand identities. Brand identity is communicated to the public via advertising. Providing Information to Consumers Advertising supplies the necessary information to consumers so that they know what is available and where to buy it. It broadcasts information on products, services and ideas sold on the open market through a variety of media portals. Persuading Consumers to Purchase Powerful, visual advertising presentations compel consumers to purchase goods, services and ideas as a way to achieve emotional fulfillment. Advertising tells you how the product, service or idea you are considering will improve your life. Generating Product Demand One of the powerful functions of advertising is to generate consumer demand for specific products, services and ideas through ad campaigns that target the audiences that are most likely to buy them. Building Customer loyalty Consistent quality advertising increases consumer loyalty for a product, service or idea. The goal of advertising is to build and reinforce relationships with customers, prospects, retailers and important stakeholders.	IV IV
