

FOURTH SEMESTER DIPLOMA EXAMINATION IN ENGINEERING
IN TECHNOLOGY
(Common to BM/EC/EL)

CONSUMER ELECTRONICS
MODEL QUESTION PAPER–SET1

Time: 3 hours

Maximum Marks: 75

PART A

I. Answer all questions in one word or one sentence. Each question carries one mark.

(9x1=9 Marks)

1	Intensity of sound energy is represented as.....	M1.01	R
2	Write the number of octaves for two frequencies, f_1 and f_2	M1.01	U
3	What is called as the sound power per unit area?	M1.03	R
4	What is baffle?	M2.02	R
5	Woofer extendsfrequency response and tweeterfrequency response	M2.04	U
6	Define aspect ratio	M3.01	R
7	Brightness of an image is known as	M3.03	U
8	Name the microwave device used in microwave oven	M4.01	R
9	In a split AC, the indoor unit consists of	M4.04	R

PART B

II. Answer any eight questions from the following. Each question carries 3 marks

(8x3=24 Marks)

1	List the characteristics of microphone	M1.01	R
2	Why efficiency of indirect radiating loudspeaker is higher than direct radiating microphone?	M1.03	R
3	Explain the necessity of baffle in loudspeaker	M1.04	U
4	List the advantages of using CCTV	M2.02	R

5	Explain the necessity of reverberation	M2.04	U
6	List the requirements while installing a PA system	M2.04	R
7	Why is it necessary to down convert microwave signals received from satellites to relatively low frequency range before processing	M3.02	R
8	What is plasma?How its presence results in the flow of charge ,when a small voltage is applied across a plasma glass panel	M3.04	R
9	What are the basic Units of Mechanical Refrigeration systems ?	M4.01	R
10	How do induction cook-tops work?	M4.04	U

PART C

III. Answer all questions. Each question carries seven marks

(6x7=42Marks)

1	What is an Electret microphone? How it is constructed? OR	M1.02	R
2	Explain the working principle of loudspeaker and the function of voice coil in loudspeaker with diagram	M1.04	U
3	Draw a neat sketch of a bass reflex baffle.Explain how bass reflex baffle can give higher intensity of sound than an ordinary finite baffle	M2.01	U
4	OR What are the requirements for a good auditorium for pleasant listening?Give salient features of acoustical design for an auditorium	M2.02	R
5	Explain the need of a public addressing system?Draw the block diagram of a basic public addressing system OR	M2.03	U
6	What is a Digital Audio Player? How it works? What is the difference between analog audio and digital audio?	M2.04	R
7	Explain with a neat sketch how electrons emitted at the cathode of a monochrome picture tube focused,accelerated and deflected to produce a raster on the screen. OR	M3.01	U
8	With a neat sketch explain how a plasma TV works	M3.03	U
9	Explain the operating principle of Induction cooker	M4.01	U

	OR		
10	Explain the operating principle of microwave oven	M4.02	U
11	Explain the operating principle of washing machine	M4.03	U
	OR		
12	Explain the operating principle of air conditioner	M4.04	U
