

SECOND SEMESTER DIPLOMA EXAMINATION IN ENGINEERING
AND TECHNOLOGY**BASICS OF PRINTING PROCESSES****MODEL QUESTION PAPER – SET-1**

Time: 3 hours

Maximum Marks: 75

PART A**I. Answer all questions in one word or one sentence. Each question carries one mark.****(9 x 1 = 9 Marks)**

1	Recall the three productive areas of printing company.	CO1	R
2	Lithography is invented by.....	CO1	R
3	Give examples for impact printing.	CO2	R
4	Planography means- image carrier having and.....are on the same plane.	CO2	R
5	Recall the process of desensitization of lithographic plate.	CO3	R
6	Specify the role of anilox roller in flexographic printing.	CO3	R
7	Recall the one purpose of use of squeegee in screen printing.	CO4	R
8	Inkjet is a ----- printing method.	CO4	R
9	Illustrate a screen-printing imaging unit	CO4	R

PART B**II. Answer any eight questions from the following. Each question carries 3 marks****(8 x 3 = 24 Marks)**

1	Listout the operations included in pre press.	CO1	R
2	Examine the importance of post press area in printing.	CO1	U
3	Describe about the scope of printing the packaging products.	CO1	U
4	Describe the ink that used for various non impact printing.	CO2	U

5	Recall the limitations of relief printing.	CO2	R
6	Explain the working principle of offset printing.	CO3	R
7	Tell about the functions of doctor blade in gravure printing.	CO3	U
8	Explain the working principle of stencil printing process.	CO4	R
9	Tell about the features of image carrier used with screen-printing.	CO4	U
10	Recall the advantages of digital printing.	CO4	R

PART C

Answer all questions. Each question carries seven marks

(6 x 7 = 42 Marks)

III	Explain about various post-press operations doing in printing press.	CO1	U
	OR		
IV	Demonstrate the plant layout of a printing press that showing Press, Prepress and Post press		
V	Explain the working principle of a relief printing with diagram.	CO2	U
	OR		
VI	Explain the working principle of a planographic printing with diagram.		
VII	Illustrate and explain about the printing unit of offset printing.	CO3	U
	OR		
VIII	Explain in detail about anilox roller of flexographic printing.		
IX	Illustrate and explain about photographic stencil preparation method.	CO4	U
	OR		
X	Explain about the equipments used in stencil printing.		
XI	Explain about the role of dampening solution in planographic printing.	CO2	U

	OR		
XII	Explain about the factors that influence the preparation of stencil to get a good screen print.		
XIII	Illustrate the inking system of offset unit and explain its working.	CO3	U
	OR		
XIV	Illustrate the inking system of flexo unit and explain its working.		

SECOND SEMESTER DIPLOMA EXAMINATION IN ENGINEERING
AND TECHNOLOGY

BASICS OF PRINTING PROCESSES

MODEL QUESTION PAPER – SET-2

Time: 3 hours

Maximum Marks: 75

PART A

I. Answer all questions in one word or one sentence. Each question carries one mark.

(9 x 1 = 9 Marks)

1	Define the term printing.	CO1	R
2	Recall any two post-press operations.	CO1	R
3	Lithography means.....	CO2	R
4	Specify the working principle of intaglio printing.	CO2	R
5	Specify the basic function of impression cylinder in flexo unit.	CO3	R
6	Listout the ingredients used in dampening system.	CO3	R
7	Define handcut stencil.	CO4	R
8	Recall the term digital printing.	CO4	R
9	Recall any two commercial printed products.	CO1	R

PART B

II. Answer any eight questions from the following. Each question carries 3 marks

(8 x 3 = 24 Marks)

1	Recall the history of stone printing.	CO1	R
2	Recall the printed product classification.	CO1	R
3	How does the intaglio printing is differ from letterpress?	CO2	R
4	Differentiate impact and non impact printing methods.	CO2	U

5	Explain the working principle of relief printing process.	CO3	U
6	“Digital printing belongs to non-impact printing”. Explain.	CO3	U
7	Label the cross-sectional view of litho plate.	CO4	R
8	Explain about tools and equipments used in pre press.	CO4	U
9	Recall the applications of screen printing.	CO1	R
10	Explain about inkjet printing applications.	CO3	U

PART C

Answer all questions. Each question carries seven marks

(6 x 7 = 42 Marks)

III	Describe the history of relief printing.	CO1	U
	OR		
IV	Describe the history of screen printing.		
V	Compare relief printing with intaglio printing.	CO2	U
	OR		
VI	Explain- how does lithography and flexography are diverge in image carrier.		
VII	Explain about the working principle of inking system in gravure printing.	CO3	U
	OR		
VIII	Explain about the working principle of inking system in flexographic printing.		
IX	Explain about the fabric stretching of the screen printing process.	CO4	U
	OR		
X	Explain any two photographic stencil preparation methods.		
XI	Examine the scope of impact printing with digital printing applications.	CO2	U
	OR		

XII	Examine the advantages of stencil printing compared to impact printing techniques.		
XIII	Explain about- the working of sheet-fed offset machine with neat diagram.	CO3	U
XIV	OR Explain about- the working of web-fed offset machine with neat diagram.
