Third Semester Diploma Examination in Printing Technology

MECHANISM OF PRINTING MACHINES-I

[Maximum Marks: 75]

[Time: Hours]

PART – A**I. Answer the following questions in one word or one sentence: Marks**

1. Jet spray is atype dampening system
2. -----is the function of Alcohol in dampening solution.
3. List the name of any two sheet fed offset machine manufacturers.
4. Lithography isprinting process.
5. Perfecting presses means... ..
6. List any two functions of Lug air shaft in web offset printing.
7. Jaw folder in inline finishing provides
8. Multicolor is atype of printing method.
9. List any two troubles related to paper.

[9x1=9 Marks]**PART – B****II. Answer eight questions from the following. Each question carries 3 marks.**

1. Differentiate friction feeder with suction feeders.
2. Label a neat diagram of swing arm grippers.
3. Recall the advantages of brush type dampening system.
4. Listout the factors influencing color sequence web offset.
5. Spell the advantages of make ready process.
6. Recall the functions of anti-set of powder.
7. Demonstrate the make-ready operation in web offset printing press.
8. Specify the various inline finishing operations doing in web offset machine.
9. Recall the troubles related to blanket cylinder.
10. Compare inks that used in sheet fed and web offset presses.

[8x3=24 Marks]

PART – C

[Answer all questions. Each question carries 7 marks.]

III. Summarize your idea on Centrifugal dampening system in detail.

OR

IV. Explain about types of detectors used in sheet fed presses.

V. Compare skeleton wheel with star wheels.

OR

VI. (a) Explain about Sheetfed offset press and its classifications. (5)

(b) List down any of the two sheet fed offset machine manufacturers name. (2)

VII. Explain types of feeders in detail.

OR

VIII. Explain three types of Sheet insertion system in detail.

IX. List out Troubles related to printing machine and their remedies.

OR

X. (a) Write down the importance of chill rollers in Web offset press. (4)

(b) Explain Pattern perforating. (3)

XI. Describe web offset press and its types.

OR

XII. Describe Zero speed splicer and splicing sequence on a zero speed pester.

XIII. Explain Brush Dampening system and its type with neat sketch.

OR

XIV. Compare Dahlgren dampening systems and Spray-bar dampening systems.

[6x7=42 Marks]

Third Semester Diploma Examination in Printing Technology

MECHANISM OF PRINTING MACHINES-II

[Maximum Marks: 75]

[Time: Hours]

PART – A**I. Answer the following questions in one word or one sentence:****Marks**

1. -----is the function of a vibrator roller.
2. -----is the principle of offset printing.
3. Bearer clearance printing means.....
4. Recall the purpose of using Anti setoff devices.
5. Expand CIC presses.
6. Listout the continuous flow dampening systems.
7. List any two troubles related to paper.
8. Segmented gluers are used for.....purposes.
9. Recall any two types of driers used in heat set web offset.

[9x1=9 Marks]**PART – B****II. Answer eight questions from the following. Each question carries 3 marks.**

1. Specify the features of pyramid type inking system.
2. Tell about digital inking system.
3. Contrast wet-on-wet printing and wet-on-dry printing.
4. Label a neat diagram of blanket cylinder.
5. Tell about anti setoff devices and its types.
6. Explain about automatic blanket washers for web offset.
7. Recall Pre-make-ready operation doing in web offset printing press.
8. Spell the troubles related to paper and their remedies.
9. Recall the function of drying system and its types.
10. List out the troubles related to ink and their remedies.

[8x3=24 Marks]

PART – C

[Answer all questions. Each question carries 7 marks.]

- III. Share your idea on setting of heat set ink.
OR
- IV. Explain modern inking systems with motorized ink control.
- V. Explain how the sheet feeding in the sheet-fed machine during the printing.
OR
- VI. Explain troubles related to inking system of sheet-fed press.
- VII. Expand your idea about dampening system and its types in detail.
OR
- VIII. Explain about multicolour printing process in sheet fed offset machine .
- IX. (a) Write down folding principle and parts of folder. (4)
(b) Differentiate scoring and creasing. (3)
OR
- X. Differentiate Ribbon folder and jaw folder.
- XI. (a) Explain the functions of chill rollers in heat set web offset printing. (4)
(b) Describe the evolution of chill roll design. (3)
OR
- XII. Explain the importance of color sequences related to drying process in printing unit.
- XII. Write down the detailed description of Infeed unit in web offset press.
OR
- XIV. Describe Flying paster and splicing sequence on flying paster.
