

(Revision – 2021)

Reg. No.

Subject Code:

Signature.

Fourth Semester Diploma Examination in Printing Technology

MECHANISM OF PRINTING MACHINES-II

[Maximum Marks: 75]

[Time: Hours]

PART – A**I. Answer the following questions in one word or one sentence: Marks**

1. Why flexography called aniline printing.
2. A printing process which utilizes relief rubber plate is called.....
3. List out types of balancing.
4. Recall any two doctor blades used in gravure printing.
5. The _____ is held against the surface to be printed, and ink is forced through the _____ (and supporting screen) with utilize of a squeegee.
6. Mimeographing is the other common method of stencil printing, although it is seldom utilized anymore.
7. Inherent character of pigment used in gravure press causes.....
8. Listout any two printing process that most suited to deliver quality print on plastic substrates.
9. Improper ink drying in flexo print causes.....
10. Faint ink appears in non-image areas of the gravure print are called.....

[9x1=9 Marks]**PART – B****II. Answer eight questions from the following. Each question carries 3 marks.**

1. Tell about different types of anilox rollers and their basic features.
2. Describe-Cell depth, Cell volume & Cell Count.
3. Recall the factors to be considered in selecting image transfer in gravure.
4. Differentiate Etching and Engraving in gravure imaging.
5. Tell about screen fabrics.
6. Listout and specify the substrates that used for screen printing.
7. Differentiate drying in and bleeding.
8. Recall abrasion in detail.
9. Recall thin layer method of gravure cylinder preparation.
10. Tell about-any two ink problems related with flexo presses with their causes and remedies.

[8x3=24 Marks]

PART – C

[Answer all questions. Each question carries 7 marks.]

III. Explain flexographic rubber plate-making process with illustrations.

OR

IV. Explain about three roller inking system with diagram.

V. Describe carbon tissue gravure plate method in detail with diagram.

OR

VI. Explain Electro mechanical engraving method and laser engraving.

VII. Explain about the types of screenprinting stencils.

OR

VIII. Differentiate between monofilament screens and multifilament screens.

IX. Explain about trouble shooting related to gravure printing.

OR

X. Explain about trouble shooting related to screenprinting.

XI. Explain about the different cell structure of anilox roller with sketch.

OR

XII. Explain sheet photopolymer plate making in detail.

XIII. Explain about:

(a) Direct image method.

(b) Indirect image method

OR

XIV. Explain rotary screen printing and its working.

[6x7=42 Marks]
