

MODEL QUESTIONPAPER
PACKAGING TECHNIQUES SET-1

[Maximum Marks: 75]

[Time: Hours]

PART – A

I. Answer all questions in one word or one sentence.

- 1 Draw the symbol of any two routing marks.
- 2 Define packaging.
- 3 Tell the use of two face tape in packaging.
- 4 Tell the ingredients of spirit varnish.
- 5 Define thermoforming.
- 6 Expand the term MAP.
- 7 Listout any two folding carton designs.
- 8 Label a corrugated board cross-section.
- 9 Expand FDA.

(9 x 1 = 9 Marks)

PART B

II. Answer any *eight* questions. Each question carries 3 marks.

1. Recall the procedures involved in Drum test.
2. Illustrate any six handling packet mark on packets.
3. Specify the properties of plastic that promotes packaging function.
4. Distinguish between glass and plastic based on packaging application.
5. Tell the importance of finishing operations in packaging.
6. Distinguish between compression molding and blow molding.
7. Recall the features of aerosol can.
8. Label the basic elements of box design.
9. Recall the importance of packaging rules and regulations.
10. Tell about any two advanced packaging techniques.

(8 x 3 = 24 Marks)

PART C

Answer all questions. Each question carries 7 marks.

III. Correlate the possibilities of printing with packaging.

OR

IV. Narrate the factors that influence in the design of a package.

V. Describe the features and functions of drop cap closures with sketch.

OR

VI. Describe the features and functions of snap cap closures with sketch.

VII. With sketch explain the working of plug assist forming.

OR

VIII. Describe the details of components and filling process of aseptic packaging unit.

IX. With sketch explain the working of a blister packaging unit.

OR

X. Describe the details of components and filling process of aerosol packaging unit.

XI. With sketch explain the working of rotary die carton making process.

OR

XII. Explain the manufacturing process of a single flute corrugated board.

XIII. Explain the relevance of considering shock absorbers in packaging design.

OR

XIV. Explain about various types of packaging based on packaging products.

(6 x 7 = 42 Marks)

**MODEL QUESTIONPAPER
PACKAGING TECHNIQUES SET-2**

[Maximum Marks: 75]

[Time: Hours]

PART – A

I. Answer all questions in one word or one sentence.

- 1 Give any two commercial products having flexible packet.
- 2 Tell the purpose of doing cobb test on packages.
- 3 Give any two package applications of wood.
- 4 Define the resilience of cushioning material.
- 5 Propellant in aerosol packages are used to
- 6 UHV in aseptic packaging means that.....
- 7 Illustrate design of label for a cosmetic item.
- 8 Expand MFPO.
- 9 Recall any two applications of tray and box carton.

(9 x 1 = 9 Marks)

PART B

II. Answer any *eight* questions. Each question carries 3 marks.

11. Spell the importance of packaging.
12. Specify the need of chemical and climate test on packages.
13. Distinguish between plastic and paper based on packaging applications.
14. Illustrate a hot melt lamination unit.
15. Recall the need and advantages of chemically reactive adhesive.
16. Tell the advantages of aerosol packaging.
17. Label a diagram showing thermo form fill seal unit.
18. Recall the importance of corrugated board in packaging.
19. Show the design of a box.
20. Recall the features of full seal end carton and its uses.

(8 x 3 = 24 Marks)

PART C

Answer all questions. Each question carries 7 marks.

III. Explain about the functions of packaging.

OR

IV. Describe about the information markings on packet with sketch.

V. Illustrate and explain the working of a packaging unit with flexible medium.

OR

VI. With a neat sketch explain the working of a heat sealing unit of a food product packaging unit.

VII. With a neat sketch explain the working of compression molding.

OR

VIII. With a neat sketch explain the working of transfer molding.

IX. Illustrate and explain the working of injection blow moulding process.

OR

X. Illustrate and explain the working of extrusion blow moulding process.

XI. Describe the importance of sand and dust test on packets. Explain the test procedure.

OR

XII. Describe the importance of mechanical tests on packets. Explain the test procedure of roll test.

XIII. Explain about the product filling method of aseptic packaging.

OR

XIV. Explain about the intelligent packaging techniques used to retain product quality.

(6x 7 = 42 Marks)
