

MODEL QUESTION PAPER**MAINTENANCE ENGINEERING AND QUALITY CONTROL SET-1**

[Maximum Marks: 75]

[Time: Hours]

PART – A**I. Answer the following questions in one word or one sentence: Marks**

1. -----is a small repair.
2. -----is an objective of maintenance.
3. Tell one demerit of bead chain.
4. Specify an application of Helical spring.
5. -----convert AC to DC
6. Expand GATF.
7. Brunner zebra strip is used for -----
8. Name any two types of electrical drives.
9. List any two advantages of mechanical erection.

[9x1=9 Marks]**PART – B****II. Answer eight questions from the following. Each question carries 3 marks.**

1. Spell the importance of maintenance.
2. Tell about safety precautions to be followed in press area.
3. Recall the features of any two types of chains.
4. Illustrate a neat diagram of helical gear.
5. Recall the merits and demerits of bearings.
6. Explain the working principle of DC motors.
7. Explain the working principle of Magnetic starters.
8. Recall the advantages of plate control strip.
9. List the applications of UGRA plate control target film.
10. Define quality assurance and specify its role in printing.

[8x3=24 Marks]

PART – C

[Answer all questions. Each question carries 7 marks.]

- III. Differentiate preventive and predictive maintenance.
OR
- IV. Explain about any two types of lubricants.
- V. Explain about any three types of gears with diagram.
OR
- VI. Differentiate roller chain and silent chain.
- VII. Explain about the tools and equipments used for machine erection.
OR
- VIII. Explain the working of DC motor in detail.
- IX. Explain the features of Test form and its use in printing.
OR
- X. Define Six Sigma concepts and write its advantages.
- XI. Explain about different categories of repair.
OR
- XII. Briefly explain about safety precautions to be followed in press area.
- XIII. Explain the reconditioning procedure of an inking system.
OR
- XIV. Define electromagnetism and explain about any two electromagnetic switches.

[6X7=42 Marks]

MODEL QUESTION PAPER**MAINTENANCE ENGINEERING AND QUALITY CONTROL SET-2**

[Maximum Marks: 75]

[Time: Hours]

PART – A**I. Answer the following questions in one word or one sentence: Marks**

1. Recall one advantage of breakdown maintenance.
2. Recall one advantage of solid lubricant.
3. Ball bearing is a-----type of bearing.
4. Tell an application of helical spring.
5. Tell the basic need of cylinder bearing in machine.
6. Define friction coupling
7. Define quality.
8. Kaizen events are used for -----.
9. ICC is a-----kind of organization.

[9x1=9 Marks]**PART – B****II. Answer eight questions from the following. Each question carries 3 marks.**

1. List-out the safety precautions to be followed in press area.
2. Recall wick feed type lubricating system.
3. Tell about different types of springs.
4. Recall the merits and demerits of bearings.
5. Illustrate a neat diagram of spur gear.
6. Explain the working of AC motors.
7. Explain the working of magnetic contractors.
8. List-out the applications of FOGRA plate control target film .
9. Spell the advantages of six sigma concept
10. Recall the quality assurance steps involved in plate making.

[8x3=24 Marks]

PART – C

[Answer all questions. Each question carries 7 marks.]

III. Explain about different types of maintenance in detail.

OR

IV. Explain about various maintenance strategies.

V. Explain about different types of gears in detail.

OR

VI. Explain chain drive in detail.

VII. Explain about gravity feed method of lubrication.

OR

VIII. Prepare a note about safety precautions to be followed in press area.

IX. Differentiate limit switches and knife switches.

OR

X. Define reconditioning? Explain any repair methods of various parts .

XI. Briefly explain about the quality assessment methods.

OR

XII. Explain about color control bars used in printing.

XIII. Explain about the factors influencing the machine erection of printing machines.

OR

XIV. Describe about PLC power supply and its importance in machines.

[6x7=42 Marks]
