

MODEL QUESTION PAPER
SCREEN PRINTING SET-1

[Maximum Marks: 75]

[Time: Hours]

PART – A

I. **Answer the following questions in one word or one sentence:**

Marks

1. Screen printing is aprocess.
2. Name one multi filament screen.
3. List any two screen printing substrates.
4. Recall any two features of On-Contact screen printing process.
5. List out any two screen printing drying equipment.
6. Name one specialized areas of screen printing.
7. Recall any two limitations of manual screen printing.
8. List out two features of Automatic screen-printing machine.
9. Define Carousel machine.

[9x1=9 Marks]

PART – B

II. **Answer eight questions from the following. Each question carries 3 marks.**

1. Recall the categories of squeegee blades.
2. Tell the purpose of stencil.
3. Specify the features & properties of screen-printing paper substrates.
4. Recall Polymerization drying method.
5. Explain basic registration techniques.
6. Recall the imaging features of off-contact screen printing process.
7. Spell the advantages of jet dryers.
8. Specify the features of container screen printing machine.
9. Classify Screen printing machines.
10. Illustrate a manual screen printing unit.

[8x3=24 Marks]

PART – C

[Answer all questions. Each question carries 7 marks.]

III. Explain about Screen printing materials in detail.

OR

IV. Demonstrate the preparation photo stencils – Indirect stencil systems.

V. Explain the process of stretching screen fabric to frame, and screen reclamation.

OR

VI. Demonstrate the preparation photo stencils – Direct stencil systems

VII. Explain in detail about various Screen-printing drying equipment.

OR

VIII. Describe the characteristics various types of screen- printing ink.

IX. Explain about the selection criteria of screen-printing substrates for halftone printing.

OR

X. Explain various screen-printing drying methods adopted for specialized printing..

XI. Illustrate the method of halftone preparation for screen printing.

OR

XII. Describe the preparation of printed circuit boards using screen printing method.

XIII. Differentiate Semi-automatic screen- printing machine and Automatic screen-printing machine.

OR

XIV. Differentiate flat be hinged frame, flat bed vertical lift, cylinder-bed presses.

[6x7=42 Marks]

MODEL QUESTION PAPER
SCREEN PRINTING SET-2

[Maximum Marks: 75]

[Time: Hours]

PART – A

Answer the following questions in one word or one sentence:

Marks

1. Tell any two disadvantages of screen-printing process.
2. Name one mono filament screen fabric.
3. Define polymerization.
4. List out any feature of solvent based ink.
5. List any two features of Off-Contact screen printing process.
6. Tell any two screen printing machines configurations.
- 7 . Specify one application of screen printing in specialized area.
- 8 . List out any two features of semi-automatic screen-printing machine.
- 9 . Recall any two screen-printing inks, based on ink vehicle.

[9x1=9 Marks]

PART – B

Answer eight questions from the following. Each question carries 3 marks.

1. Define flocking process.
2. Recall the hardness categories of squeegee blades.
3. Tell the features of ultraviolet dryers
4. Recall the features of radiation curable ink.
5. Examine the peculiarities of screen-printing to for textile printing applications.
6. Recall on-contact screen printing process.
7. Demonstrate the preparation steps of printed circuit boards using screen printing method.
8. Illustrate Flat-bed vertical lift screen printing machine.
9. Label a cylinder-bed press configuration.
10. List out the advantages of screen-printing using machines.

[8x3=24 Marks]

PART – C

[Answer all questions. Each question carries 7 marks.]

III. Illustrate the history of screen-printing process.

OR

IV. Explain about Direct/Indirect photo stencil systems with sketch.

V. Explain the types and characteristics of squeegee used in screen printing process.

OR

VI. Explain the preparation of knife cut stencil and Capillary stencil system.

VII. Demonstrate the features of 1) wicket dryers 2) Jet dryers 3) Infrared dryers.

OR

VIII. Describe the following :

a) Evaporation ink drying method b) Oxidation ink drying .

IX. Describe the screen-printing image transfer in to paper, paperboard and wood.

OR

X. Describe about the special screen printing features of screen-printing on plastic and metals.

XI. Describe basic registration techniques adopted in screen printing.

OR

XII. Explain in detail method of halftone preparation for screen printing.

XIII. Describe screen printing machines configurations.

OR

XIV. Demonstrate the working of 1) Rotary Screen Printing machine 2) Carousel Screen printing machine.

[6x7=42 Marks]
