

TED (21) – 2022
REVISION 2021

Reg. No.(A)
Name :

**DIPLOMA EXAMINATION IN ENGINEERING/TECHNOLOGY/ MANAGEMENT/
COMMERCIAL PRACTICE.**

6101C PRESENT PRINTING INDUSTRY

Time: 3 hours

Maximum Marks: 75

PART A

**I. Answer all the following questions in
one word or sentence.**

(9 x 1 = 9 Marks)

Module Outcome Cognitive level

1	Give two examples of commercial printed products	M1.02	U
2	What is relief printing	M1.01	U
3	What is hard proof	M2.02	U
4	Expand IPA	M2.03	U
5	What is waste segregation	M3.04	U
6	What is hazardous waste	M3.02	U
7	What is meant by ecofriendly printing	M4.02	U
8	Expand VOC	M4.03	U
9	What is Inkjet printing	M1.03	U

PART B

**II. Answer any Eight questions from
the following**

(8 x 3 = 24 Marks)

Module Outcome Cognitive level

1	Compare offset and digital printing	M1.03	U
2	Differentiate Relief printing and Intaglio printing	M1.01	U

3	Explain Electrophotography	M1.03	U
4	What are Machines involved in post press activities	M2.04	U
5	Explain different cylinder preparation methods of gravure	M2.02	U
6	What are the challenges in - close register multicolor work	M3.06	U
7	Recall Industrial Waste characteristics in general	M3.01	U
8	Explain about Waste segregation, recycle and reuse	M3.04	U
9	Explain about eco friendly inks and eco friendly substrates	M4.02	U
10	Describe about Alternative Materials used for printing practices	M4.03	U

PART C

III. Answer all questions from the following

(6 x 7 = 42 Marks)

Module Outcome Cognitive level

1. Explain in detail about different printed products OR 2. Write in detail about importance of conventional and digital printing methods	M1.02	U
	7	
	M1.03	U
3. Recall common printing technologies OR 4. Write about automation in conventional printing process.	M1.03	A
	7	
	M2.05	U
5. Explain Common Post-press practices OR 6. What is proofing and explain different types of proof	M2.04	U
	7	
	M2.02	U
7. Write about Common waste management practices OR 8. Explain Solvent Recovery process.	M3.04	U
	7	
	M3.05	U

9. Write about Major Waste streams in Printing Press.	M3.02	U
OR	7	
10. Explain Eco friendly printing in detail	M4.02	U
11. How to reduce waste generation at the beginning to end of a Press work	M4.01	U
OR	7	
12. Explain about Alternative Materials used for printing practices	M4.03	U

Prepared by:

Pranaya T P
Guest lecturer in printing technology
IPT & GPTC shoranur

Scrutinized by:

Name of Setter : PRANAYA T P

Signature with date :  28/9/23

Designation : LECTURER IN PRINTING TECHNOLOGY

Name of Scrutinizer :

Signature with date :

Designation :

Scoring Indicators

COURSE NAME : PRINT DESIGN

COURSE CODE :3101

QID :

Q No	Scoring Indicators	Split score	Sub Total	Total score
	PART A			9
I. 1	Balance		1	
I. 2	Lightness or darkness		1	
I. 3	Visual & tactile		1	
I. 4	how easy to distinguish one letter from another in a typeface		1	
I. 5	12 points		1	
I. 6	Agfa apogee Bit impose Brisque impose Signastation Impose		1	
I. 7	Illustration or portrait containing title of book		1	
I. 8	Adobe Indesign Adobe page maker Quark express		1	
I. 9	A color proof or early press sheet that is evaluated by the printer and the customer as to the quality of the color reproduction		1	
	PART B			24
II. 1	Line, shape, value, format, texture, space, color, type		3	
II. 2	Line originals- Line originals have no gradation of tone - that is, they possess no intermediate tones. Mono chrome , color originals Continuous tone- a variety of gradations between highlights (lightest areas), mid tones (mid-way areas) and solids (darkest areas) Halftone originals- Originals in which detail and tone values are represented by a series of evenly spaced dots of varying size and shape, the dot areas black and white, digitals, color half tone		3	
II. 3	Contrast -to attract the attention of the reader. It can be obtained by the use of different sizes and weight of type Proportion - relative visual size and weight (Shape) of particular graphical elements in a design composition Unity - creates a feeling of wholeness		3	

II. 4	Readability- how easily people can read and understand printed text. Readability should facilitate smooth reading without any strain. Legibility- how easy to distinguish one letter from another in a typeface		3	
II. 5	Stroke- visual weight of a character. Serif- small line attached to the end of a stroke in a letter Stress- angle of shading of characters		3	
II. 6	Cover page Content page Sequence page		3	
II. 7	Work and turn- how the sheet of paper is flipped over side-to-side to be sent back through the press. Same gripper edge Work and tumble- flipping the press sheets from head to tail before backing them up. This allows the side guide to remain the same but different the gripper edges.		3	
II. 8	Attract attention Express character of a product by size, shape Convey necessary information Aesthetic appeal Develop interest, build confidence, promote sale. Quality of products		3	
II.9	Adobe indesign- graphic design software is used primarily in the publishing industry because you can design magazines, info sheets, books, posters, interactive pdfs, brochures. Adobe page maker- PageMaker is a desktop publishing program. It is a complete writing, editing, design and production tool for creating professional-quality publications Quark express- easy-to-use graphic design software that enables you to produce print designs, web designs, layouts, and tables in a fully digital platform		3	

II.10	Creating an advertise on the basis of information gathered about product Doing research on the company and the product and reactions of the customers Planning for type of media to be used, when and where to be used, and for how much time to be used. Taking the feedback from the clients as well as the customers and then deciding the future line of action		3	
	PART C			42
III. 1	Texture- defines the surfaces of shapes and forms. Texture that you feel (smooth, rough, fuzzy, slimy) with your fingers is called tactile while texture that the artist recreates on a flat surface is called visual texture. Tactile texture is three-dimensional because it has height, width and depth Space- Space is used to give a pleasing effect to the printed product. The shape or figure what you create on the page is called positive space and rest of the space on the page is called negative space. Value- Value it is the range of lightness and darkness of a visual element gives depth or dimension to an image and allows us to perceive detail. Format- Whether it is a business card voucher, book cover, envelops, newsletter, magazine and newspaper require a format. The format is a vital element in two-dimensional design. Simply it defines the shape and size of the product.		7	7
III. 2	Optical centre:- It is a centre where our eye hits first. It is slightly above the mathematical centre, also slightly to left Balance- is an equal distribution of visual weight. two types I. Symmetrical or formal Balance II. Asymmetrical or informal Balance Contrast- to attract the attention of the reader Contrast in Tone:- The dullness of a figure can be brightened by changing the tone Contrast in Value:- Contrast in value is obtained by placing a dark and light colors side by side. Contrast in Chrome:- It is obtained by placing a dull color with bright color Unity- creates a feeling of wholeness Harmony- As with music, graphical elements can be said to be working in harmony the individual parts come together as visually compelling and a meaningful whole Emphasis /focal point- Making a specific element stand out or draw attention to the eye. Rhythm- created when one or more elements of design are used repeatedly to create a feeling of organized movement Proportion- indicates the relative visual size and weight (Shape) of particular graphical elements in a design composition		7	7

III. 3	 Primary optical area- higher left portion of the page.user primary focus. the eyes will automatically focus Strong fallow area- moving to the higher right portion of the page, you can think of it as a follow up from the left portion but less important Weak fallow area- lower left portion is the blind portion of the Gutenberg Diagram Terminal area- lower right portion of the page there is a break in the reading or “page scan” process and the user will need to take an action. insert call-to-action such as buttons, links, forms, video, etc.		7	7
III. 4	Roman Serif Sans serif Novelty/decorative Black letter Script Display type		7	7
III. 5	a)Ascender Descender X height Base line b)Visualization thumbnail sketch rough layout comprehensive layout		7	7
III. 6	Proof reader- the person who marks correction in proof. Copy holder- person who reads originals		7	7
III. 7	Back matter- index, glossary, bibliography, appendix Text matter- chapter heading, side heading, chapter ending, running head line, marginal notes, foot notes		7	7
III. 8	Sheet work- 2 different plate for 2 side printing Half sheet work- on plate for 2 side printing Work and turn- how the sheet of paper is flipped over side-to-side to be sent back through the press. Same gripper edge Work and tumble- flipping the press sheets from head to tail before backing them up. This allows the side guide to remain the same but different the gripper edges		7	7
III. 9	Brocures advertise location, events, products, service Factors Bars&box Negative space Keep it simple Bigger, bolder and brighter Color		7	7

	Paper solution			
III. 10	Press proof- A press proof is a test print of the data directly in a printing press. This can be the press for the production run or a comparable press (using the same print technology) prepared especially for proof purposes. Progressive proof- set of color proofs produced on press using 4 color separation negatives Color proof -is a colored and color faithful proof and is produced using high-end inkjet printers or thermal sublimation printers in conjunction with powerful color management system. Contract proof- agreement between customer and printer and a color reference guide		7	7
III. 11	Advertising agency is just like a tailor. creates the ads, plan how, when and where it should be delivered and hands it over to the client. mostly not dependent to any other organisations types- Full service agencies Interactive agencies Creative boutiques Media buying agencies In-house agencies		7	7
III. 12	Adobe photoshop Adobe illustrator Coral draw In design Page maker Quark express		7	7
