

Model question
S3 Diploma Examination in Textile Technology
Design & Structure of Fabrics
PART A

I. Answer **all** questions in one word or one sentence.

1. The ----- weave is variously known as “calico” or “tabby” weave
2. The draft suitable for weaving fabrics having heavy warp thread density.
3. The move number used for constructing 10 end satin /sateen weave.
4. Write an example of warp faced twill
5. The huck a back weaves are basically ----- fabrics.
6. The loom equipment necessary for manufacturing pique structure.
7. Pique fabrics have very close resemblance to that of the -----
8. Give any end use of mock leno weaves.
9. The crepe effect can be achieved either by the use of ----- yarns.

1 x 9 = 9 Marks

PART B

II. Answer any **eight** questions from the following. Each question carries 3 marks.

1. Explain the basic elements of woven design.
2. Construct Irregular Wrap Rib design.
3. Mention the characteristics of plain weave.
4. Discuss the methods of weave representation.
5. Construct Left and Right hand twill in repeat of 5.
6. Distinguish Brighton's Honey comb with ordinary honey comb.
7. Explain the importance of wadding threads in Bedford cord design.
8. Write a short note on Double clothes.
9. Write a short note on Seer – Sucker fabric.
10. Describe Mock Leno weaves.

3 X 8 = 24 Marks

Answer **ALL** questions. Each question carries 7 marks.

III. Illustrate the modifications of plain design.

OR

IV. Explain straight, broken, pointed and mixed drafts.

V. Give the design for Diamond twill from a base twill of 3/2.

OR

VI. Construct design and draft for Brighton's honey comb on a repeat of 12.

VII. Construct the design, draft, peg plan and cross section for a plain faced bed ford cord on alternate picks. The ratio of face to cutting ends is 4:2

OR

VIII. Differentiate pique and Bedford cord.

IX. Explain the different methods for constructing crepe weaves.

OR

X. Construct the design and draft for a mock leno weave on a repeat of 10 X 10

XI. Construct Devon's Huck- a - Back (10 X 10) with suitable draft.

OR

XII. Give the design for herringbone twill of base twill of 5/5.

XIII. Give the design for weft wadded welt/pique structure on a repeat of 10.

OR

XIV. Explain the different methods of constructing extra warp figuring fabrics.
