

Program : Diploma in Architecture	
Course Code : 3187	Course Title: Model Making Workshop
Semester : 3	Credits: 1.5
Course Category: Program Core	
Periods per week: 3 (L:0 T:0 P:3)	Periods per semester: 45

Course Objectives:

- To equip students with the basic skills in model making
- To build up concepts in model making using different materials.

Course Prerequisites:

Topic	Course code	Course name	Semester
Surface development and basic Geometry		Engg: Graphics	1

Course Outcomes :

On completion of course, the student will be able to:

COn	Description	Duration (Hours)	Cognitive Level
CO1	Demonstrate model making methods	3	Understanding
CO2	Make models of solids and their combinations	6	Applying
CO3	Make models of simple buildings with flat and sloped roof using suitable materials	18	Applying
CO4	Develop models of site contours	12	Applying
	Series Test	6	

CO-PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1				2		2	
CO2				2		2	
CO3				2		2	
CO4				2		2	

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

On completion course, the student will be able to:

Module outcomes	Description	Duration (Hours)	Cognitive level
CO1	Demonstrate model making methods		
M 1.01	Familiarize various materials used to make architectural models.	1	Understanding
M 1.02	Familiarize various tools used to make architectural models.	1	Understanding
M 1.03	Identify various types of architectural models and compare the methods of making architectural models.	1	Understanding
CO2	Make models of solids and their combinations		
M 2.01	Recall the method of drawing surface development	1	Remember
M 2.02	Illustrate surface development of various solids to make models	2	Applying
M 2.03	Construct models of solids and their combinations from surface development.	3	Applying
	Series Test I	3	
CO3	Make models of simple buildings with flat and sloped roof using suitable materials		
M3.01	Discuss different parts of single storey building with flat roof and slope roof.	1	Remembering
M3.02	Develop model of a single storey building with flat roof and slope roof using suitable materials.	12	Applying
M3.03	Apply painting on model surface using various finishes.	3	Applying
M3.04	Make use of various techniques in presenting models	2	Applying

CO4	Develop models of site contours		
M4.01	Explain contouring and its features	1	Understand
M4.02	Illustrate the concept of site contours.	5	Applying
M4.03	Develop model of site contours using suitable materials.	6	Applying
	Series Test - II	3
