

Program : Diploma in Architecture	
Course Code : 4184	Course Title: Architectural Appreciation
Semester : 4	Credits: No Credit
Course Category: Program Core	
Periods per week: 3 (L:3, T: 0, P:0)	Periods per semester: 45

Course Objectives:

- To identify the social, cultural and geographical influences on architecture
- To analyze architectural styles and practices in various cultural settings
- To prepare the students to appreciate the aesthetic components of architecture.

Course Pre-requisites:

Topic	Course code	Course name	Semester
Knowledge of elements and principles of design		Fundamentals of Architecture	3
Knowledge of development of architecture		History of human settlements	3

Course Outcomes:

On completion of the course, the student will be able to:

CO _n	Description	Duration (Hours)	Cognitive Level
CO1	Illustrate elements and principles of design in architecture	6	Applying
CO2	Relate Art and Design with man, space and environment	15	Understanding
CO3	Explain the impact of industrial revolution on society and architecture	12	Applying
CO4	Appreciate different art and architectural movements	10	Applying
	Series Test	2	

CO – PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3						
CO2	3				2		2
CO3	3						
CO4	3						

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

Modular Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Discuss elements and principles of design in architecture		
M1.01	Recall elements and principles of design	2	Remembering
M1.02	Sketch buildings in different styles	2	Applying
M1.03	Discuss Architectural vocabulary of buildings	2	Applying
Contents: Appreciation of architecture using the elements of architecture and principles of design. Identifying and understanding the elements (Point, line, shapes, form) of Architecture and Principles of Design (unity, variety, harmony, rhythm, balance, proportion, emphasis, contrast, movement) in buildings.			
CO2	Relate Art and Design with man, space and environment		
M2.01	Discuss the concept of space	3	Understanding
M2.02	Identify the articulation of form in buildings	3	Understanding
M2.03	Explain organisation of spaces and sense of enclosure	3	Understanding
M2.04	Illustrate the theories of scale and proportion	6	Applying
	Series Test – I	1	
Contents: Relationship between Art and Design with man, space and environment. Concept of space. Articulation of form, Organisation of space sand sense of enclosure. Theories of scale and proportion, Vitruvian theory, Modular man, golden proportion.			
CO3	Explain the causes and effects of industrial revolution on transport, society and architecture		
M3.01	Explain the causes of Industrial revolution	2	Understanding

M3.02	Identify the causes of industrial revolution	2	Understanding
M3.03	Explain the effects of industrial revolution on transport, society and architecture	4	Understanding
M3.04	Describe the development of new materials and techniques in building industry	4	Understanding
Contents: Impact of Industrial Revolution on Architecture - The social, economic and political changes, affected, requirements of the society, new materials and technological development			
CO4	Appreciate different art and architectural movements		
M4.01	Explain the modern movements in architecture and their expressions in buildings	4	Understand
M4.02	Sketch the works of art /architecture representing the movements	2	Applying
M4.03	Describe the movements in architecture	4	Applying
	Series Test – II	1	
Contents: Appraisal of the early Movements in art and architecture: Early Modernism to Neo futurism. Chicago school, Bauhaus, De Stijl movement, Art Deco, Arts & Crafts and Art Nouveau
