

Program : Diploma in Architecture	
Course Code : 6182B	Course Title: Fundamentals of Landscape Design
Semester : 6	Credits: 4
Course Category: Program Elective	
Periods per week: 4 (L:3, T:1, P:0)	Periods per semester: 60

Course Objectives:

- To identify different elements and components of landscape using simple landscape designs
- To introduce different garden styles

Course Prerequisites: Nil

Course Outcomes

On completion of the course, the student will be able to:

CO _n	Description	Duration (Hours)	Cognitive Level
CO1	Identify the elements and principles of landscape design	15	Understanding
CO2	Identify the role of soft scape elements in landscape design	14	Understanding
CO3	Identify the role of hardscape elements in landscape design	15	Understanding
CO4	Describe Mughal, English and Japanese gardens	14	Applying
	Series Test	2	

CO-PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO 1	2				2		
CO 2	2				2		
CO 3	2				2		
CO 4					3		

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Identify the elements and principles of landscape design		
M1.01	Explain aesthetic and physical elements of landscape	5	Understanding
M1.02	Describe the role of water in landscape designs	5	Understanding
M1.03	Explain principles of landscape design	5	Understanding
Contents: Elements of landscape - aesthetic elements - line - plane - form - texture - tone/colour - light/shade - climate/season/time - scent/smell - physical elements - natural elements - plants - water - land form - rockery - man made elements shelter structures - earth related structures - enclosure structures - engineering structures - outdoor furnishings - sculptural component - special buildings Water as an element of landscape - purpose of water displays - esthetic factors - visual, psychological, auditory, sensory - functional reasons - recreation - circulation control - utilitarian - water displays - still water, moving water, free falling water, spouting water Principles of landscape design - balance - symmetrical balance - asymmetrical balance - scale - proportion - rhythm - contrast - harmony			
CO2	Identify the role of soft scape elements in landscape design		
M2.01	Explain different types of plants and their roles in landscape design.	4	Understanding
M2.02	Describe different methods of maintenance of plants	5	Understanding
M2.03	Discuss the construction, installation and maintenance of lawn	5	Understanding
	Series Test I	1	
Contents: Role of plants in landscape - Types of plants - trees - shrubs - climbers & creepers - ground covers - Classification of trees - flowering trees, shady trees, avenue trees, evergreen trees, deciduous trees - examples of each type - classification of plants according to growth cycle - annual - biennial - perennial - operational classification - bedding plants - hanging plants - house plants, plants suitable for the interiors - characteristics - terrarium Maintenance of plants - topiary, pruning, training, bonsai - Lawn - Construction - methods of installation - seeding, plugging, turfing - maintenance of lawns.			
CO3	Identify the role of hardscape elements in landscape design		
M3.01	Describe hardscaping elements suitable for landscape	8	Understanding
M3.02	Identify different materials and methods used for hardscaping	7	Understanding

Contents:

Hardscaping elements suitable for a landscape - functions of different hardscaping elements in landscape - materials and method of construction for pavements and fences - method of lighting in a landscape - site furniture in a landscape - gazebo - steps and ramps - functions of retaining walls - trellis - pergola -

CO4	Describe Mughal, English and Japanese gardens		
M4.01	Outline the different types of gardens	2	Understanding
M4.02	Explain different types of Mughal gardens	4	Understanding
M4.03	Explain different types of English gardens	4	Understanding
M4.04	Classify different types of Japanese gardens	4	Applying
	Series Test I	1	

Contents:

Formal and informal gardens

Mughal gardens - Planning principles - concept behind the design of Mughal garden - types of Mughal gardens - pleasure garden - Shalimarbagh; tomb garden -Taj garden

English gardens - country garden, classic garden, cottage garden

Japanese gardens - elements used in Japanese gardens - Types of Japanese gardens - hill garden, flat garden, dry (Zen) garden, tea garden, stroll garden
