

Program : Diploma in Architecture	
Course Code : 6182D	Course Title: Fundamentals of Design
Semester : 6	Credits: 4
Course Category: Program Elective	
Periods per week: 4 (L:3, T:1, P:0)	Periods per semester: 60

Course Objectives:

- To identify elements and principles of design used in building design process.
- To comprehend the concepts and architectural features of buildings designed by well-known Indian and world architects.

Course Prerequisites: Nil

Course Outcomes

On completion of the course student will be able to:

CO _n	Description	Duration (Hours)	Cognitive Level
CO1	Identify the elements and principles of design	12	Understanding
CO2	Familiarise the concept of space in Architecture	10	Understanding
CO3	Explain the design principles and architectural features of buildings in world architecture	20	Understanding
CO4	Explain the design principles and architectural features of buildings in Indian architecture	16	Understanding
	Series Test	2	

CO-PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	2						
CO2	2						
CO3					3		
CO4					3		

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Identify the elements and principles of design		
M1.01	Explain elements of design	4	Understanding
M1.02	Identify colour and Texture	4	Understanding
M1.03	Explain basic principles of Design	4	Understanding
Contents: Primary elements of design - point, line, plane and volume - characteristics and uses, Form - Definition, visual and relational properties, regular and irregular forms. Colour - Definition - Colour scheme (spectrum) - primary, secondary and tertiary colours - colour wheel - warm, cool, dark, light colours - complementary colours, analogues colour, monochromatic colour Texture - Definition and explanation of rough and smooth textures. The basic principles of composition such as Balance, Proportion, Scale, Rhythm, Contrast, Harmony and Character - Brief explanation with examples of buildings.			
CO2	Familiarise the concept of space in Architecture		
M2.01	Explain space in architecture	2	Understanding
M2.02	Outline spatial organizations	4	Understanding
M2.03	Illustrate spatial organizations	4	Applying
	Series Test I	1	
Contents: Definition of space, Explanation of interior and exterior spaces; Characteristics of interior space - Quantity and Quality; Spatial organizations - Centralized, Linear, Radial, and Clustered and Grid organizations- Brief explanation only.			
CO3	Explain the design concept and architectural features of buildings in world architecture		
M3.01	Identify the design concept and architectural features of given world-famous structures	12	Understanding
M3.02	Illustrate the architecture of world-famous structures	8	Applying
Contents: Design concept, architectural features along with a sketch of the following famous structures- Gustave Eiffel- Eiffel Tower FL Wright - Falling Water, Pennsylvania, USA Le Corbusier- Villa Savoye, France Mies Van der Rohe - Farnsworth House, Zaha Hadid - Heydar Aliyev Center Azerbaijan			

CO4	Explain the design concept and architectural features of buildings in Indian architecture		
M4.01	Identify the design concept and architectural features of buildings in Indian architecture	8	Understanding
M4.02	Illustrate famous structures in India	8	Applying
	Series Test II	1	
Contents: Design concept and overall features with sketch view of the following famous structures. Edwin Lutyens - Rashtrapathi Bhavan, New Delhi Charles Correa- Tube house Laurie Baker - CDS, Trivandrum			

Text / Reference:

T/R	Book Title/Author
T1	Principles of Architecture G. Muthushoba Mohan
R1	Francis DK Ching - Architecture Form, Space and Order
R2	Sabine Thiel Siling - Icons of Architecture - The twentieth century
R3	Banister Fletcher – History of world Architecture
