

Program : Diploma in Architecture	
Course Code : 6187	Course Title: Interior Design
Semester : 6	Credits: 1.5
Course Category: Program Core	
Periods per week: 3 (L:0, T:0, P:3)	Periods per semester: 45

Course Objectives:

- To introduce the principles of interior design
- To use appropriate materials and ergonomically designed furniture
- To develop interior design using CAD software

Course Prerequisites:

Topic	Course code	Course name	Semester
Elements and principles of architecture, space planning		Fundamentals of Architecture	3
Draw plan and sectional elevation of a single room		Architectural Drawing, I	3
Working Drawings of joinery details and staircases		Working Drawing I	3
Working drawings of kitchen and toilet		Working Drawing II	4

Course Outcomes:

On completion of the course, the student will be able to:

CO _n	Description	Duration (Hours)	Cognitive level
CO1	Introduce the design methodology for interior design	12	Understanding
CO2	Develop furniture design for residential interiors using CAD software in accordance with Anthropometric data	12	Applying
CO3	Develop presentation drawings of residential interiors.	9	Applying
CO4	Develop presentation drawings of commercial interiors	9	Applying
	Lab Test	3	

CO-PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3					2	
CO2	3		3	2			
CO3	3		3				
CO4	3		3				

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

Module Outcome	Description	Duration (Hours)	Cognitive Level
CO1	Introduce the design methodology for interior design		
M1.01	Discuss elements and principles of interior design	4	Remembering
M1.02	Explain design methodology	2	Understanding
M1.03	Classify the materials used for walls, floors, ceilings, sanitary fixtures, lighting and electrification, blinds and curtains.	2	Understanding
M1.04	Explain space modulation	2	Understanding
M1.05	Identify materials used for interiors by conducting market survey. (This can be done in groups (5 or 6 students/batch))	2	Understanding
Contents: Introduction to design methodology. Space modulation - quantitative and qualitative - quality of interior space - colour and light - psychological effects of space. Materials used for walls, floors, ceilings, sanitary fixtures, lighting and electrification, blinds and curtains. conduct market survey and prepare a report.			
CO2	Develop furniture design for residential interiors using CAD software in accordance with Anthropometric data		
M2.01	Identify different types of furniture and furniture design concepts	3	Understanding
M2.02	Illustrate the furniture design concepts in accordance with anthropometric data for residential interiors	3	Applying
M2.03	Develop furniture design for differently abled people.	3	Applying
M2.04	Develop presentation drawings and working drawing using CAD software	3	Applying
	Lab Test I	1.5	

Contents:

Design living room furniture - different types of sofas - L type, corner type;
 bedroom furniture - cot, side tables, wardrobes, bunk beds, study table, dining tables, chairs, cupboards, shelves, display furniture. Furniture design for differently abled people
 - Prepare presentation drawings and working drawing using CAD software.

CO3	Develop presentation drawings of residential interiors.		
M3.01	Identify different design concepts of residential interiors.	2	Understanding
M3.02	Illustrate plan, sectional elevations and specifications of residential interiors using CAD software	4	Applying
M3.03	Illustrate reflected ceiling plan of bed room and living room using CAD software	2	Applying
M3.04	Illustrate flooring pattern of bed room and living room using CAD software	1	Applying
Contents: Design concepts of residential interiors, plan, sectional elevations and specifications of residential interiors using CAD software, reflected ceiling plan of bed room and living room using CAD software, flooring pattern of bed room and living room using CAD software.			
CO 4	Develop presentation drawings of commercial interiors.		
M4.01	Identify different design concepts of commercial interiors using CAD software	2	Understanding
M4.02	Illustrate plan, sectional elevations and specifications of Commercial interiors using CAD software	2	Applying
M4.03	Illustrate reflected ceiling plan of commercial interior using CAD software	2	Applying
M4.04	Illustrate flooring pattern of commercial interior using CAD software	3	Applying
	Lab Test II	1.5
