

Program: Diploma in Automation and Robotics	
Course Code:	Course Title: Robotic Case Studies
Semester: 3	Credits: 0
Course Category: EngineeringScience	
Periods per week: 4(L:0,T:0,P:4)	Periods per semester: 42

Course Objectives:

- To become familiar with the logics, theory, and uses of within a case selected
- To become familiar with the methodology, technology detailing of the selected case.
- To critically analyze case study design based on quality criteria
- To understand current challenges, issues, conflicts and dilemmas in the practice of a case study, as demonstrated by written and oral classwork.

Course Outcomes:

On completion of the course, the student will be able to:

CO n	Description	Duration (Hours)	Cognitive level
CO1	To make an in depth study of various robotic platforms/technology prevailing in industries and other fields	12	Analyzing
CO2	To familiarize with the data collection process related to the robotic case study.	15	Applying
CO3	To prepare a detailed presentation about the chosen robotic platform/technology	18	Applying
CO4	To practice miniature modeling of the analyzed work.	15	Applying

CO–PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3				3		
CO2	3						
CO3	3			3			
CO4	3			3			

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	To make an in depth study of various robotic platforms/technology prevailing in industries and other fields		
M1.01	Designing a case study report	4	Applying
M1.02	Make a thorough investigation through various robotics application areas to identify a case. Industrial Robots, Service Robots, Robots in Daily Life, Mobile Robots, Connected Robots, AI in Robotics, Collaborative Robots, Chatbotsetc	4	Applying
M1.03	Case Identification and Selection	4	Applying
CO2	To familiarize with the data collection process related to the robotic case study.		
M2.01	Collects the data with the objective of gathering multiple sources of details to the case under study.	8	Applying
	Record the theoretical, design and implementation aspects of the case.	7	Applying
CO3	To prepare a detailed presentation about the chosen robotic platform/technology		
M3.01	Articulate ideas, analysis and technical details in a public presentation.	9	Applying
M3.02	Report the details of the undergone case study as a document.	9	Applying
CO4	To practice miniature modeling of the analyzed work		
M4.01	Prepare a miniature model of the studied work or a part of the work.	10	Applying
M4.02	Exhibit the working model and present the working scenario.	5	Applying

General Instructions:

Task	Evaluation	% of Course Grading
Statement of Interest		
Attendance & Participation	Daily	10
Reading Responses	Weekly	10
Case Study Discussion Facilitation	TBD	10
Data Collection and Review		10
Talk/Presentation about the Case		20
Document work		20
Model	At the end of semester	20
