

Program : Diploma in Commercial Practice	
Course Code : 5148B	Course Title: Introduction to MS Access
Semester : 5	Credits: 2
Course Category: Program Elective	
Periods per week: 3 (L:1, T:0, P:2)	Periods per semester: 45

Course Objectives:

- To provide a hands-on experience in data base management system concepts using MS Access software.
- To enable the students to distinguish between manual and computerized data base system.
- To enhance the problem-solving skills of students.

Course Prerequisites:

Topic	Course name
Basic knowledge of data and information.	Secondary School

Course Outcomes:

On completion of the course, the student will be able to:

COn	Description	Duration (Hours)	Cognitive Level
CO1	Apply concept of data base management system.	7	Applying
CO2	Apply the basic knowledge of data base tables and relationships.	17	Applying
CO3	Apply basic knowledge of query and SQL	11	Applying
CO4	Apply the basic knowledge of reporting.	8	Applying
	Series Test	2	

CO - PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3						
CO2	3						
CO3	3						
CO4	3						

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

Module outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Apply concept of data base management system.		
M1.01	Develop an idea about data base management system.	4	Applying
M1.02	Designing a data base.	3	Applying
Contents: Introduction to data base management system – Introduction to Database and RDBMS - Database Concepts- Manual Database -System, Comparison between a manual and, Computerized Database System, Common DBMS, Introduction to Microsoft Access, Features of Access, Starting Access, Access Terminology, Exiting Access, Microsoft Access Hardware & Software Requirements. Designing a Database- About designing a database, Steps in designing a database, creating a Database- creating a database using blank database, creating a database using database Wizard, opening an existing database.			
CO2	Apply the basic knowledge of data base tables and relationships.		
M2.01	Develop an idea about table, creating table and working with table.	4	Applying
M2.02	Designing a table.	4	Applying
M2.03	Modifying the table design.	6	Applying
M2.04	Creating relationship.	3	Applying
	Series Test – I	1	

Contents:

Tables- Introduction to Tables, Different Ways of creating a table, Guidelines for naming fields, controls and objects, creating a table by entering data in a datasheet, create a table using the Table Wizard, Working with Tables. Designing a Table- Create a table from scratch using Design view, Field/Variable name Conventions, About the Data types, Setting Primary Keys, Field Properties - Field Size, Format, Decimal Places, Input Mask, Caption, Default Value, Data Validation, Required, Allow Zero Length, Indexed, Sorting and Filtering Data. Modifying the Table Design - To insert the field within the table, Rename a field name in a table, Deleting Fields, Moving Fields, Changing a Field Size, Saving a Table, Working with Tables in Datasheet View - Viewing the Table in Datasheet view, Adding Records, Sizing the Columns, Navigating the Datasheet - Using the navigation Buttons, Using the Go To Menu, Finding a Specific Value - Using Wildcards, Editing And Deleting Records, Undoing Edits, Cutting, Copying and Pasting Data, Sorting and Filtering Data in a Datasheet - Quick-Sort Feature, Filter By Selection. Relationship - Relationship in a Database, how to relationship work, Types of Mapping in Relationships, Define Relationships.

CO3	Apply basic knowledge of query and SQL.		
M3.01	Explain the basic concept of query.	4	Understanding
M3.02	Identify steps involved in query creation.	4	Applying
M3.03	Demonstrate the working with SQL.	3	Applying

Contents:

Query Basics- Meaning of Query. Usage of Queries, Types of Queries, Steps for Creating a Query, The Design View, Working with Fields, Changing the order of Fields, removing a Field, inserting a Field, Hiding Fields, Sorting in Query. Perform Calculation in a Query, creating a Query, Query by Criteria, Examples of select query, Example of Cross Tab query, Creating Cross Tab Query, Working with Action Queries, Creating Make Table Query, Creating Append Query, Creating Delete Query, Creating Update Query, Setting Query Properties. Working with SQ.

CO4	Apply the basic knowledge of reporting.		
M4.01	Design report – creation, alteration and deletion.	4	Applying
M4.02	Creating reports with wizards.	4	Applying
	Series Test – II	1	

Contents:

Introduction to report, Parts of a Report, creating a Report, creating a Columnar Report with Auto Report, Tabular Auto report, Creating Reports with Wizards, Examples of Report.
